ALBANIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Albania lies between 39° and 43° N. latitude and between 19° and 21° E. longitude; it is bordered by Yugoslavia to the north and east, Greece to the south and the Adriatic and Ionian Seas to the west. The maximum length of the country is 336.2 km. and its maximum breadth is 148.2 km. Much of Albania is mountainous, particularly northern Albania where the mountains continue the Crna Gora chain of Montenegro, and in the east along the Macedonian border. Albania is one of the highest countries in Europe, having an average height of 708 metres above sea-level. Throughout its history, Albania has been subjected to earthquakes. Climate is Mediterranean throughout most of the country. The Adriatic and Ionian Seas play a moderating role in the country's climate, although frequent cyclones in the winter months make the weather unstable. The average temperature is 14° C. in the north-east and 18°C. in the south-west. The language is Albanian, the principal dialects being Gheg (north of the Shkumbini river) and Tosk (in the south). The literary language is being formed on the basis of a strong fusion of the two dialects with the phonetic and morphological structure of Tosk prevailing. Religion no longer plays a significant part in Albanian life, and all religious institutions have been closed. Before the foundation of the People's Republic, Islam had been the predominant faith, with very small numbers of Catholics in the north and Greek Orthodox in the south. The flag (proportions 7 by 5) is red, with a two-headed black eagle, above which is a gold-edged, five-pointed red star.

Recent History

The Albanian Party of Labour was founded in 1941. The leader of the Party, Enver Hoxha, led the Liberation Army against the Germans and the Italian occupation of Albania. During the war years Albania suffered severe losses—28,000 killed and 43,000 deported out of a population of 1.1 million. Independence was finally proclaimed in 1944, and in 1946 Albania became a People's Republic. Enver Hoxha has been in the seat of power since that date. In the immediate post-war years, Albania was largely a dependency of Yugoslavia, the two countries establishing a monetary and customs union. Yugoslavia's influence and aid was gradually replaced by that of the Soviet Union, and after the breach between Yugoslavia and the Soviet Union in 1949, Albania remained a firm ally of the latter under Stalin. Following the death of Stalin in 1953, Albania became alienated from the Soviet Union over Khrushchev's policy of rapprochement with Yugoslavia. Relations deteriorated until in 1961 diplomatic relations with the U.S.S.R. were broken off. The Soviet Union's place as Albania's main ally and benefactor was taken by the People's Republic of China. Albania virtually ceased to participate in the activities of CMEA in 1961 and in 1968 she withdrew from the Warsaw Pact. In most aspects of political and ideological policy Albania's position has been identified with that of the People's Republic of China. In 1971 Albania sponsored the motion whereby the People's Republic of China gained admission to the United

Nations, of which Albania herself had been a member since 1955. At the end of 1972, Soviet overtures towards normalization of relations between the Soviet Union and Albania were emphatically rejected. Recently, however, various international contacts have been developing, and trade and diplomatic relations have been established with many countries, including, notably, Greece, Yugoslavia and several west European countries. The general elections of September 1970 showed a 99.7 per cent vote in favour of the Democratic Front.

Government

Albania is a People's Republic with a one-party system of government. The supreme legislative organ is the People's Assembly, elected for a four-year term by all citizens over 18 years of age. The Assembly elects a Presidium which fulfils the functions of Head of State as a collective organ of leadership under the President of the Presidium. The Council of Ministers is appointed, and can be dismissed, by the People's Assembly. The Constitution explicitly recognizes the special position of the Albanian Party of Labour which works closely with the Government and is the main policy making body. At its congresses the Party elects the Central Committee which, in turn, elects the Political Bureau.

The primary organs of local government are the District People's Councils, which are elected for a three-year term by all citizens over 18 years of age. As with the People's Assembly, candidates are nominated by local organizations of the Party of Labour, the Democratic Front, Trade Unions, the Labour Youth Union, the Women's Union or by other mass organizations. The People's Councils elect Executive Committees made up of a Chairman, Deputy Chairman, Secretary and members. In cases of conflict in the People's Councils, disputes are referred to the People's Assembly or to government departments. Tirana, the capital, is divided into ten townships.

Defence

Defence in Albania is conducted under the auspices of the People's Army which was founded in 1943. Military service lasts for two years in the Army, and three years in the Air Force, Navy and paramilitary units. According to western estimates, the total strength of the armed forces was 38,000 in 1973, comprising Army 30,000, Air Force 5,000 and Navy 3,000. The internal security forces numbered 5,000 and the frontier force 10,000. Defence expenditure, in 1973 was estimated at 589 million lekë. A defence agreement with China was reported to have been concluded after the Soviet intervention in Czechoslovakia in 1968.

Economic Affairs

Before liberation in 1944 Albania was an extremely backward country. Its semi-feudal social system was dominated by Italy to the extent that the economy was half-feudal, half-colonial. Before liberation 80 per cent of the population was illiterate, and 87 per cent of the people

worked in agriculture. By 1965 Albania had been turned into a socialist agrarian-industrial country. The Albanian economy operates on the principles of the public ownership of the means of production, planned management of the national economy and a certain level of financial autonomy for the enterprises. Each individual enterprise operates under the auspices of a single state plan. The year 1951 saw the beginning of long-term planning, with the first Five-Year Plan (1951-55). Successive plans have reorganized industry and agriculture on collectivist lines. The principal indices of economic development during the fourth five-year period, 1965-70, are as follows: Total industrial and agricultural production rose by 61 per cent (industrial production by 83 per cent and agricultural production by 28 per cent). State investment increased by 55 per cent, as did the national income, while real income per capita grew by 17 per cent. Freight transport increased by 53 per cent, and retail trade by 45 per cent. During the Fourth Plan period, industrial production rose at an annual rate of 12.9 per cent. Production of capital equipment doubled between 1965 and 1970, while the production of consumer goods grew by 58 per cent. This rate of economic development is being accompanied by the most rapid rate of population growth in Europe. A projected total population of 2,445,000 by 1975 represents an annual growth rate of 2.8 per cent from 1970.

Industry now utilizes natural resources, and Albania refines her own oil. Important items in production include copper and iron, agricultural raw materials, machinery and equipment, chemical materials, fertilizers, building materials and textiles. Industrial products account for about 80 per cent of Albania's exports. Whereas in 1938 industrial production accounted for 9.1 per cent of total production in the country, in 1970 it accounted for 66.8 per cent, output increasing 64-fold. Agricultural production has increased threefold since before the Second World War, and the area of cultivable land has doubled; recently, however, agricultural production has fallen short of planned targets. During the post-war years there has been an extensive socialist transformation of the countryside: land reclamation, mechanization and complete collectivization of agriculture, utilization of chemicals, etc. Albania's principal exports include chrome and ferro-nickel ore, copper wire, bitumen, tobacco and cigarettes, timber and furniture, textiles, craftwork, canned foods, wine and other beverages, fruit and vegetables, etc.

Albania's breach with the Soviet Union in the years 1960-61 damaged the Albanian economy. The Soviet Union withdrew all aid, left many projects only half-completed, ceased supplies of industrial equipment and cancelled economic agreements. The economic blockade imposed on Albania by the U.S.S.R. left her virtually in total European isolation. In recent years trade and contacts with China have increased considerably and the Albanian economy has overcome the setbacks of 1960-61. Particular progress has been made in the spheres of copper, chromium, nickel and coal production and electric power generation. Crop yields have increased considerably, particularly wheat and maize. In 1970 Albanian industry supplied 70 per cent of consumer requirements which had previously been imported. A predominant part of Albania's foreign trade is now with China. A joint Sino-Albanian shipping company was formed, having 14 ocean-going

ships with a total tonnage of 50,000 tons, and in June 1965 an agreement was signed which, with subsequent trade protocols, provides Albania with financial, technical and material aid. This has greatly helped achieve the complete electrification of the country in 1970. With the completion of the Mao Tse-tung hydro-electric plant and the Korçë thermo-electric plant in 1971, total power output reached 2,000 million kWh. In 1969 a special protocol was signed in Peking which allowed for Chinese participation in many new Albanian export industries. In 1970 Albania signed a long-term trade and economic agreement with China, in accordance with which China granted long-term interest-free loans.

Some 95 per cent of Albania's foreign trade is with the socialist countries, although trade with non-communist countries is growing annually. Albania is currently trading with 40 countries of the world and has signed trade protocols with various socialist, Western and developing countries.

Transport and Communications

There are 302 kilometres of railway track in Albania linking the main cities (including branch lines), all of it built since 1944; a new line linking Elbasan with Prenjas is under construction. Rail transport accounts for 24 per cent of all land transportation and 4,019,000 passengers travelled by rail in 1967. Roads now link the remotest regions of the country although, despite progress in the sphere of road building the lesser roads, particularly in the highlands, are mostly unsuitable for motor transport. A total of 55,934,000 passengers travelled on road services in 1967. There is a marked absence of private automobiles in Albania, and bicycles and mules are widely used. Albania has a developing sea transport; over 104,000 tons of goods were transported by sea in Albanian ships in 1967. Ships use the main ports of Durrës, Vlorë and Sarandë. Under the 1966-70 Five-Year Plan, several targets in the field of transport were exceeded, the volume of goods transported increasing by 53 per cent. There is a new airport at Rinas for international flights, but there is no internal air service.

Social Welfare

In Albania all medical services are free of charge. There are now hospitals, clinics and maternity homes throughout the country which provide free treatment for the entire population. In 1969 there were 158 hospitals and 1,400 physicians. Between 1965 and 1970, the number of the population to one doctor dropped from 1,870 to 1,180. The 1969 health budget amounted to 238,542,000 lëks, 5.3 per cent of the state budget, while in 1971 socio-cultural expenditure accounted for 25.8 per cent of the budget. Kindergartens and nursery schools receive subsidies of 68 and 66 per cent respectively. There is a non-contributory state social insurance system for all workers, and a pension system for the old and disabled. Income tax has been abolished for all workers, employees and co-operative members, government expenditure being met by surpluses earned by state enterprises. Albania is thus one of the first communist countries in Europe to be free of direct taxation for her people. A state social insurance law came into force on January 1st, 1967, which

ALBANIA—(INTRODUCTORY SURVEY)

provides many social benefits for the population in addition to free medical attention.

Education

By 1956, illiteracy had been wiped out among persons under 40 years of age. About 20 per cent of children in the age group of three to six years attend nursery school (*kopshite*); children between the ages of seven and fifteen years attend an "eighth-grade school" which is compulsory. Secondary schools in Albania may be divided into three main categories, namely twelve-year schools (*shkollat 12-vjeçare*) giving four-year courses which complete the education of the eighth-grade school, secondary technical-professional schools (*shkollat e mesme tekniko-profesionale*) which combine vocational training with a general education, and lower vocational schools (*shkollat e ulte profesionale*) which train workers in the fields of agriculture and industry, etc. The school-year in secondary schools lasts six and a half months. In addition, all pupils must spend two and a half months working in industrial or agricultural production and one month in military training. In the 1972-73 school year there were 699,000 students enrolled at eighth-grade, secondary and high schools. Approximately one in every three persons is undergoing education. In the same year 30,200 students were enrolled at higher education institutes in Albania; the State University of Tirana has 8,283 full-time and 7,800 night and correspondence students, with another 2,384 registered at its branches throughout the country. The university has 7 faculties, 5 scientific research institutes, and several annexes in the regions. Students at higher education institutes spend seven months of every year at the institute, two months in production work, one month in physical culture and military training, and two months on vacation.

Tourism

The prospect of mass tourism is not welcomed by many Albanians, but in 1970 Enver Hoxha, First Secretary of the Party of Labour, specifically stressed the need to develop tourism. All aspects of tourism in Albania are handled by *Albturist*, the official state tourist department. The development of tourism began in 1956 but has only seriously been encouraged by the state over the last four or five years. There are few recognized resorts apart from Durrës, although great potential exists in the beauty spots on the coast and in the scenery of the interior. Visas are essential for foreign visitors. A very favourable exchange rate of about 24 lekë to £1 sterling is in operation for tourists.

Sport

Sport is officially encouraged in Albania, association football and volleyball being among the most popular sports.

Public Holidays

1974: May 1 (May Day), November 7 (Victory of the October Socialist Revolution), November 28 (Proclamation of Independence), November 29 (Liberation Day 1944).

1975: January 1 (New Year's Day), January 11 (Proclamation of the Republic).

ALBANIA—(THE CONSTITUTION, THE GOVERNMENT)

THE CONSTITUTION

The Constitution of the People's Republic of Albania was adopted in March 1946 and amended by the People's Assembly on July 4th, 1950. By its terms Albania is a People's Republic, with authority vested in the People's Assembly and the People's Councils of local administrative districts formed during the struggle for national liberation. The supreme legislative organ is the People's Assembly which is elected for a term of four years by a general, equal, direct and secret ballot on the basis of one deputy to every 8,000 persons. All citizens over 18 years of age have the right to elect and stand for election. The People's Assembly is convoked by a decree of its Presidium for two ordinary sessions a year, and for extraordinary sessions by a decision of the Presidium or at the request

of one third of the deputies. The People's Assembly elects its Presidium, which consists of a President, being also the President of the Albanian People's Republic, three Vice-Presidents, a Secretary, and ten members. It also elects the Council of Ministers and the Supreme Court of Justice, and appoints the Attorney-General and his assistants. The functions of the Presidium between sessions of the People's Assembly are defined by Article 58 of the Constitution. Laws and amendments to the Constitution are made valid by a majority vote of the People's Assembly.

The country is divided into twenty-six districts for the purpose of local administration. The local organs of State power are the People's Councils, elected for a three-year term.

JUDICIAL SYSTEM

Justice is administered under the Constitution by the Supreme Court, and by District, Village, County and Township Courts created by a special law in October 1968 as links of the judicial system which functions within the ranks of the people. Military Tribunals are held at the Supreme and District Courts. Courts of justice are independent in the exercise of their functions, and are separated from the administration.

Until March 1966 the judicial system was supervised by a Minister of Justice and his officials. This department now no longer exists and its principle responsibilities are discharged by the Supreme Court. The current Penal Code came into force in September 1952, while the Civil Code has gradually been adopted since 1954. Trials are held normally in public. The accused is assured the right of defence, and the principle of presumption of innocence is sanctioned by Article 13 of the Code of Penal Procedure. The Supreme Court and the District Courts are made up of a professional judge and two Assistant Judges, who are workers elected in the same way as the judges. Trials in the Village, County and Township Courts are held before an Assistant Judge from the District Court and two social activists. Second-degree cases are held in the Supreme Court before three judges, and in the District Courts before Assistant Judges. The verdicts of the lower courts may be altered, within the law, by the higher courts, and judges

ALBANIA—(RELIGION, THE PRESS)

may be recalled before the expiration of their term by their electors or the organ which has elected them.

Public order is kept by the forces of the People's Police, by the organs of State Security and by frontier forces, all of which are administered by the Ministry of the Interior. The People's Police is also dependent on the local organs of State Power.

The Supreme Court is elected for a four-year term by the People's Assembly; between sessions of the Assembly, individual members of the Court are elected by the Presidium of the People's Assembly. The District Courts are elected for a three-year term by a secret ballot of all voting citizens.

President of the Supreme Court: ARANIT ÇELA.

THE ATTORNEY-GENERAL

The Attorney-General and his deputies are appointed by the People's Assembly. District Attorneys are appointed by the Attorney-General and are responsible only to him.

Attorney-General: DHORI PANARITI.

RELIGION

There is no formal practice of the previously predominant Muslim religion although certain social traditions persist. All religious institutions were closed by the government in 1967. All of the old mosques have now been shut down and are preserved as centres of cultural interest. Formerly the population was approximately 70 per cent Muslim, 15 per cent Roman Catholic (in the north) and 15 per cent Greek Orthodox (in the south).

Muslims:

Sunni: Grand Mufti HAFIZ SULEJMAN MYRTO; organized in four zones (Tirana, Shkodër, Gjirokastrë, Korçë), each under a Grand Mufti.

Bektashi: Primate ILJAZ FEHMI DEDE (also World Primate of Bektashi sect).

Autocephalous Orthodox Church: Primate and Archbishop of all Albania SOFRON BOROVA.

Roman Catholics: centre at Shkodër; Apostolic Administrator ERNESTO ÇOBA, Kryepeshkevi, Shkodër.

THE PRESS

The Albanian Press recognizes itself as a powerful medium of educational and organizational propaganda with a profound Marxist-Leninist ideological content, playing an important role in the Communist moulding of the people and in mobilizing them for the building of socialism and the defence of the country. It expresses Party doctrine probably more forcefully than any other European Communist press. A policy of decentralization is suggested by the development in recent years of numerous local newspapers, generally the organs of the regional Party committees.

In 1938 there were 15 newspapers and periodicals published in Albania; even disregarding the growth of local newspapers, this figure has now trebled. The most important publications are the Communist Party daily, *Zëri i Popullit* (circ. 106,000), and *Bashkimi* (circ. 30,000), the organ of the Democratic Front.

The Albanian news agency, ATA, has a monopoly of news distribution in Albania.

TRADE UNIONS

The Albanian Trade Unions were established on February 11th, 1945. They are political and social organizations of the working class and develop an all-round activity for the class and revolutionary education of the workers, for their mobilization in carrying out the tasks of socialist construction and the participation of the working class in governing the country, directing the economy, working out and carrying out the state's plans and solving the problems of work and production. The leading principle of the organization is democratic centralism. The Trade Unions are organized by industries on a regional basis. The supreme organ of the Unions is the Congress which is usually convened every five years. The Congress elects the Central Council of the Albanian Trade Unions and the Auditors. The Central Council elects the presidency, secretariat, President and Secretary General. In every work and production centre there is a trade union grass-root organization which elects the trade union committee, while in each ward and district there is a ward committee and a district council. Voluntarism is a fundamental principle of the Albanian Trade Unions. There are only a small number of full-time officials, compared with more than 50,000 elected activists.

ANDORRA

Location, Climate, Language, Religion, Capital

The small principality of Andorra (founded in 1278) consists of 465 square kilometres in the Eastern Pyrenees, bounded by France and Spain, and lying about half way between Barcelona and Toulouse. The climate is alpine with much snow in winter and a warm summer. The official language is Catalan. The population numbers 23,092 of whom 6,829 are Andorrans. The National colours are blue, yellow and red. The population is entirely Catholic and the territory is included in the Spanish Suffragan See of Urgel. The capital is Andorra la Vella.

CONSTITUTION AND GOVERNMENT

Andorra has no proper constitution, and its peculiar autonomy is a legacy of feudal conditions; the country, although administratively independent, has no clear international status. Andorra is a principality, under the suzerainty of the President of France and the Spanish Bishop of Urgel. The valleys pay a nominal bi-annual tax, the *questia*, to France and to the Bishop of Urgel. France is represented in Andorra by the *Viguier de France*, and the Bishop by the *Viguier Episcopal*. Each co-ruler has set up a permanent delegation for Andorran Affairs. The Prefect of the East Pyrenees is the Permanent Delegate of the French Co-Prince.

Episcopal Co-Prince: H.E. DR. JOAN MARTI ALANIS, Bishop of Urgel.

French Co-Prince: (vacant).

Viguier Episcopal: FRANCESE BADIA-BATALLA.

Viguier de France: CLAUDE-FRANÇOIS ROSTAIN.

General Council of the Valleys

This council submits motions and proposals to the permanent delegation. The twenty-four members represent the parishes of Andorra and are elected for four years, half the Council being renewed every two years. All men and women of the age of 21 and over may vote. The Council nominates the *First Syndic* (*Syndic Procureur Général*) and the *Second Syndic*, who cease to be members of the Council on their election. In the December 1971 General Election, two "progressive" candidates gained seats.

First Syndic: JULIA REIG.

Second Syndic: MARC VILA RIBA.

JUDICIAL SYSTEM

Civil Law: judicial power is exercised in civil matters in the first instance by two civil judges (*Bayles*), one appointed by the Viguier de France and the other by the Viguier Episcopal. There is a Judge of Appeal appointed alternately by France and Spain, and in the third instance (*Tercera Sala*) cases are heard in the Supreme Court of Andorra at Perpignan or in the court at Urgel.

Criminal Law: is administered by *Tribunal des Cours*, consisting of two Viguier, the Judge of Appeal, the two Bayles and two members of the Council General.

ECONOMIC AFFAIRS

Andorra's products are mainly agricultural, cereals, potatoes, tobacco and vegetables being the principal crops. Livestock is raised and there are approximately 25,000 sheep, 3,000 cattle and 1,000 horses. There is a milk farm outside the capital. Iron, lead, alum, stone and timber are produced. Andorra la Vella is a great market for all European goods owing to favourable excise conditions; many foreigners trade in the principality. Smuggling has reputedly flourished in the past, and customs controls at the borders are stringent.

RADIO

Radio-Andorra: Roc des Anellets, B.P. 1, Andorra la Vella; Gen. Man. M. DEGOY; privately owned, broadcasts in French and Spanish on 428m. (701 k/c); pub. *Bulletin d'Information* (weekly).

Sud-Radio: 7 ave. Méritxell, Andorra la Vella; Dir. J.-L. HORBETTE; daily transmissions on short and medium wave-lengths.

FINANCE

French and Spanish currencies are in use. There is a 3 per cent levy on alcohol and motor fuels. There is no income tax, death duty or customs. Andorra's first budget was drawn up in 1954.

TRANSPORT AND COMMUNICATIONS

Roads are maintained by Fuerzas Hidroeléctricas de Andorra S.A. A good road connects the French and Spanish frontiers (7,800 feet). There are about 14,500 automobiles in Andorra. There is a bus service between Andorra la Vella and Seo de Urgel in Spain, Barcelona-Bourg-Madame and Perpignan in France. Postal services are run by the French Post Office, while telephones are managed by Radio Andorra.

TOURISM

Sindicat d'Initiativa de les valls d'Andorra: Andorra la Vella.

Andorra is much visited by tourists, winter and summer. In winter many slopes are used for skiing and in summer the high fields are occupied by campers. There are about 4,000,000 visitors a year.

AUSTRIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Austria lies in Central Europe, between Switzerland, Liechtenstein, Germany, Czechoslovakia, Hungary, Yugoslavia and Italy. The climate varies sharply owing to great differences in elevation. The mean annual temperature lies between 45° and 48°F. (7° and 9°C.). The population is 99 per cent German-speaking, with small Croat, Czech and Slovene-speaking minorities. About 89 per cent are Roman Catholics and about 6 per cent are Protestants. The national flag (proportions 3 by 2) consists of three horizontal bands—red, white and red. The state flag has, in addition, the coat of arms in the centre. The capital is Vienna.

Recent History

Austria was annexed by Germany in 1938. After the Second World War the country was divided into four zones occupied by forces of the U.S.A., U.S.S.R., Britain and France. On May 15th, 1955, the four powers signed a State Treaty with Austria ending the occupation and recognizing her independence. Parliament then passed an act on October 26th which declared Austria a permanently neutral state. However, she applied for membership of the United Nations and was accepted on December 14th, 1955.

A period of over twenty years of coalition government came to an end in April 1966 with the formation of a cabinet composed of the People's Party only. In the 1970 general elections for the *Nationalrat* (First Chamber) no party could achieve an absolute majority and though a coalition government was expected the Socialist Party, with three seats more than the People's Party, decided to take office, led by Dr. Bruno Kreisky as Federal Chancellor. The Socialists had already gained control of the *Bundesrat* (Second Chamber) in 1969. However, another election was called in October 1971 at which the Socialist Party also achieved an absolute majority in the *Nationalrat*. In 1973 elections in the provinces of Vienna and Upper Austria changed the parties' representation in the *Bundesrat*, both now having 29 seats. As the Socialist Party must provide the chairman for the first half of 1974, they have lost their effective majority in the second chamber until July 1974.

Government

Austria is a federal republic divided into nine provinces, each of which has its own Provincial Assembly (*Landtag*). There is a bi-cameral parliamentary system. The first chamber, the *Nationalrat* (National Council), is elected on a basis of proportional representation by universal adult suffrage. The second chamber, the *Bundesrat* (Federal Council), is composed of representatives of the Provincial Assemblies. Members of the *Nationalrat* are elected for four years. The Federal President, elected for six years, is the Head of State. The Federal Chancellor is the Head of Government.

Defence

After the ratification of the State Treaty in 1955, Austria declared her permanent neutrality. To protect her independence, the armed forces were instituted; a

numerical limitation of the total strength of the armed forces is not defined by the State Treaty. Military service consists of six months' initial training, followed by 60 days' reservist training. Usually about 40,000 men are conscripted each year. At present the total strength of the army is around 12,000 regulars and 40,000 conscripts, including about 3,500 air defence troops (Austrian air units are an integral part of the army). The 1973 defence budget totalled 5,080 million Schilling, about 3.65 per cent of the total Federal budget.

Economic Affairs

The Austrian economy is no longer mainly dependent on tourism and agriculture. Mining and manufacturing industries provided nearly 36 per cent of the Gross Domestic Product in 1972.

Austria possesses iron ore and oil deposits, lignite, magnesite, lead and some copper. Hydro-electric power resources are also being developed and electricity is now being supplied to neighbouring countries. After the war about a quarter of Austrian industry was nationalized, including most of the heavy industry. Industrial relations are good and the proportion of working days lost through strikes is lower than in almost any other country in Europe. There is very little unemployment and around 200,000 foreigners are now working in Austria. In the last decade production has risen steadily and increased by 49.2 per cent between 1964 and 1972.

Tourism is a valuable source of income, winter and summer. The Danube is popular with excursionists and foreign tourists and is important commercially and as a source of energy, about 5 million tons of freight being transported annually. Although most river trade is with Federal Germany, an increasing traffic passes between Austria and Czechoslovakia, Hungary, Yugoslavia and the Soviet Union. Barges carrying up to 1,000 tons can be accommodated.

In spite of recent trends in agriculture towards mechanization and larger holdings, 17.4 per cent of the working population were engaged in agriculture and forestry in 1971, and the system is still based mainly on small holdings. However, the country still produces over 82 per cent of its agricultural needs.

Economic growth has been steadily maintained for the last 15 years, and in 1972 there was an increase of 6.4 per cent in the Gross Domestic Product, which reached 476,600 million Schilling. The strength of the economy was shown in May 1971 by the 5.05 per cent revaluation of the Schilling and in March and July 1973 by revaluations of 2.25 per cent and 4.8 per cent respectively. The living standard is still somewhat below that of most advanced European economies but it is rising steadily and may be soon expected to reach the level of her neighbours. The national income per head was about 57,000 Schilling in 1972.

Austria became a member of the European Free Trade Association in 1960, since which time exports to member countries have risen from 12 to 29 per cent of Austria's

AUSTRIA—(INTRODUCTORY SURVEY)

total, and now more than one-fifth of her total trade is with these countries; one-eighth is with Eastern Europe. However, although the proportion of Austria's exports to the European Economic Community dropped from 50 to 38 per cent between 1960 and 1972, two of her principal markets remain Federal Germany and Italy, and after applications in 1961, 1963 and 1971 for a form of associate membership of the EEC which would not compromise her neutrality, two treaties were signed in 1972 providing for eventual free trade of industrial goods between EEC and EFTA members, and for some concessions on agricultural produce between Austria and the Community.

Transport

Austria has a highly developed system of public transport by road, rail, air and river. The Danube provides Austria with an artery particularly important for the transport of timber, steel and other raw materials. A passenger service is maintained on the Upper Danube and between Vienna and the Black Sea. There are six commercial airports. Railways total about 6,700 kilometres (4,200 miles), roads 95,000 kilometres (60,000 miles), and commercial waterways 351 kilometres (228 miles).

Social Welfare

Social Insurance in Austria dates back to the 1880s. Regulations introduced by the German regime in 1938 were maintained until the new Social Insurance Law of 1956. A comprehensive Social Welfare Scheme covering Industrial Accident Insurance, Old Age Pensions, Health Insurance, etc. is compulsory for all employees and otherwise insured persons. There are also provisions for other groups such as unemployment insurance, children's allowances, maternity allowances, rent allowances, provision for war victims, etc.

Education

Since 1962 education has been free and compulsory between the ages of 6 and 15. The central controlling body is the Federal Ministry of Education and Art (*Bundesministerium für Unterricht und Kunst*), higher education and research coming under the competence of the Federal Ministry of Higher Education and Research (*Bundesministerium für Wissenschaft und Forschung*). Provincial boards (*Landesschulräte*) supervise school education in each of the nine federal provinces, and district school boards (*Bezirksschulräte*) in local regions.

Starting at the age of 6, all children undergo four years of education at a primary school (*Volksschule*). At the age of 10 they may transfer to secondary education, or continue until the age of 14 in the *Hauptschule* (upper primary school). The senior division of the primary school (*Volksschuloberstufe*) is limited to rural areas and is losing ground due to the extension of the *Hauptschule* and the (academic) general secondary schools (*Allgemeinbildende höhere Schulen*). In the ninth year of general compulsory schooling the polytechnic course (*Polytechnischer Lehrgang*) includes all pupils who do not attend a school leading to higher levels of education.

After completion of primary education about 20 per cent of the pupils (school year 1972/73) enter one of the two forms of (academic) general secondary education (*Allgemeinbildende höhere Schulen*) leading to higher education, i.e. the *Gymnasium* (generally arts biased) or the *Realgym-*

nasium (generally science and mathematics biased), in which they may study until the age of 18. Success in the *Reifeprüfung* ("Maturity examination") constitutes a qualification for university or comparable further education.

At the age of 14 there are numerous possibilities for transfer between those schools mentioned and various types of intermediate and (upper) secondary technical, vocational and otherwise specialized educational establishments, secondary technical, vocational and agricultural schools (*Berufsbildende höhere Schulen*), which also give access to higher education.

Austria has twelve scientific institutions of higher learning (*Wissenschaftliche Hochschulen*), among which are the Universities of Vienna (f. 1365), Graz, Innsbruck and Salzburg. Six art schools (*Künstlerische Hochschulen*) rank as universities.

Tourism

Austria's mountains, forests and valleys make it an ideal resort in both summer and winter. Celebrated beauty spots are the Salzkammergut Lake District, the Tyrol and Vorarlberg valleys and the Vienna woodlands. Vienna is a centre for music and art lovers and historians, with its opera houses and concert halls, art galleries and museums. In winter thousands of visitors go to Austrian skiing resorts. Festivals are held all over Austria in the summer. Internationally famous are the Vienna Festival and the Salzburg Music Festival.

Receipts from tourism totalled 38,826 million Schilling in 1972.

Visas are not required for nationals of the following countries: Argentina, Australia, Barbados, Belgium, Bolivia, Brazil, Bulgaria, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, Dominica, Ecuador, El Salvador, Finland, France, Federal Republic of Germany, Gibraltar, Greece, Iceland, Ireland, Israel, Italy, Jamaica, Japan, Luxembourg, Malta, Mexico, Monaco, Morocco, the Netherlands, New Zealand, Norway, Pakistan, Paraguay, Peru, Poland, Portugal, Romania, South Africa, Spain, Sweden, Switzerland, Tunisia, Turkey, the United Kingdom, the U.S.A., Uruguay and Yugoslavia.

Sport

Skiing and football are the most popular sports.

Public Holidays

1974: May 1 (Labour Day), May 23 (Ascension Day), June 3 (Whit Monday), June 13 (Corpus Christi), August 15 (The Assumption), October 26 (National Day), November 1 (All Saints' Day), December 25 and 26 (Christmas).

1975: January 1 (New Year's Day), January 6 (Epiphany), March 31 (Easter Monday).

THE CONSTITUTION

Austria is a democratic republic, having a president (*Bundespräsident*), elected directly by the people, and a two-chamber government. The republic is organized on the federal system, comprising the provinces (*Länder*) of Burgenland, Carinthia, Lower Austria, Upper Austria, Salzburg, Styria, Tyrol, Vorarlberg and Vienna. There is universal suffrage for men and women over the age of 20.

The National Council (*Nationalrat*) consists of 183 members, elected by universal direct suffrage, according to a system of proportional representation. It functions for a period of four years.

The Federal Council (*Bundesrat*) represents the federal provinces. Vienna sends 12 members, Lower Austria 11, Styria 9, Upper Austria 9, Carinthia 4, Tyrol 4, and the other provinces 3 each, making 58 in all. The seats are divided between the parties according to the number of seats they hold in the provincial assemblies and are held during the life of the provincial government which they represent. Each province in turn provides the chairman for six months.

For certain matters of special importance the two chambers meet together; this is known as a *Bundesversammlung*.

The President is the head of the State, and he holds office for six years. His powers include appointing ambassadors, conferring honours, etc. Although he is invested with special emergency powers, he normally acts on the authority of the Government, and it is the Government which is responsible to the National Council for governmental policy.

The Government consists of the Chancellor, the Vice-Chancellor and the other ministers, who may vary in number. The Chancellor is chosen by the President from

the party with the strongest representation in the newly elected National Council, and the other ministers are then chosen by the President on the advice of the Chancellor.

All new acts must be read and put to the vote in both houses. A new bill goes first to the National Council, where it usually has three readings, and secondly to the Federal Council, where it can be held up, but not vetoed.

The Constitution also provides for appeals by the Government to the electorate on specific points by means of referendum. There is further provision that if 200,000 or more electors present a petition to the Government, the Government must lay it before the National Council.

The Provincial Diet (*Landtag*) exercises the same functions in each province as the National Council does in the State. The members of the *Landtag* elect a government (*Landesregierung*) consisting of a provincial governor (*Landeshauptmann*) and his councillors (*Landesräte*). They are responsible to the *Landtag*.

The spheres of legal and administrative competence of both national and provincial governments are clearly defined. The constitution distinguishes four groups:

1. *Law-making and administration are the responsibility of State:* e.g. foreign affairs, justice and finance.
2. *Law-making is the responsibility of the State, administration is the responsibility of the provinces:* e.g. elections, population matters and road traffic.
3. *The State lays down the rudiments of the law, the provinces make the law and administer it:* e.g. charity, rights of agricultural workers, land reform.
4. *Law-making and administration are the responsibility of the provinces in all matters not expressly assigned to the state:* e.g. municipal affairs, building, theatres and cinemas.

THE PRESS

Austria's *Wiener Zeitung*, founded in 1703, is the oldest daily paper published in the world, and Austria's Press history dates back to 1605, when its first newspaper was published. During the nineteenth century the Press suffered repression under the absolute monarchy and this situation was not legally liberalized until the Press Law of 1922 which states that "The freedom of the Press is assured and subject only to the limitations defined in this law". During the years of German annexation the Press was to a large extent subordinated to the Nazi propaganda machine. After the Second World War the Allies published several newspapers including the original *Kurier*, and the Austrian Press rapidly recovered from the effects of a totalitarian administration.

Agitation within the Press against relatively heavy taxation and costs has been appeased to some extent by concessions in the 1969 Purchase Tax Law. But this concession was repealed at the beginning of 1973 when value-added tax was introduced in Austria. Newspapers have to pay 8 per cent on copy sales price and 16 per cent of the receipts of advertising in value-added tax. Reform has also been demanded in the Press Law with particular regard to *right of reply*. According to this section of law, any person or persons who feel themselves to have been subject to an incorrect statement in the Press can (and often do) demand to have a formal reply of equal volume and position published in the offending newspaper. This is considered by the majority of the Press as an obstacle to its freedom. Other objections have been raised on such points as the lack of constitutional guarantees for freedom of opinion and circulation, and the compulsory supply of copy to the Ministry of the Interior. The Austrian Press is still subject to *Nachzensur* (after-censorship) and a paper's registered *Verantwortlicher Redakteur* (Responsible Editor) is penally liable for material printed which contravenes the law on such points as libel or "corruption of minors". For many years no "Responsible Editor" has been imprisoned, although fines have been imposed and issues confiscated. In practice there is complete freedom of opinion and circulation in the Austrian Press subject to the restrictions of the 1922 Press Law.

In 1961 the Austrian Press Council (*Presserat*) was founded. It consists of representatives of the publishers and journalists and its principal duties are to watch over the freedom of the Press and to ascertain grievances of the Press. In March 1973, 2,824 publications appeared in Austria, of which 125 were weekly newspapers, 32 dailies (including part-issues), 1 Monday and 2,666 journals and technical magazines. Daily circulation on weekdays amounted to an average of 2,459,800 copies in the second half of 1972. The political parties each have at least one newspaper, and independent papers tend to follow a political line. Although there is a strong provincial Press in Graz, Linz, Salzburg and Innsbruck, the country's Press is centered in Vienna. The four highest circulation dailies are the *Kronen-Zeitung*, the *Kurier*, the *Kleine Zeitung* and the *Arbeiter Zeitung*. *Die Press* (independent), the *Arbeiter Zeitung* (socialist) and the *Salzburger Nachrichten* are the country's most respected dailies. In November 1970 the highly respected *Volksblatt*, the most important People's Party daily, ceased publication owing to financial difficulties, but in 1971 the *Niederösterreichisches Volksblatt* was founded as a replacement organ of the People's Party in Vienna.

NATIONALIZED INDUSTRIES

After the devastation of the Second World War all the major parties agreed that nationalization of Austria's major industrial enterprises was the best way to promote economic recovery. In July 1946 the National Council passed a law giving the state control in the sectors concerned with coal and ore mining, iron and non-ferrous metals, mineral oil production and processing, transportation, chemical production, machine engineering and motor vehicle construction. More than seventy firms were nationalized and these were reorganized into 16 major concerns. In 1972 the four chief concerns, *Vöest* (United Austrian Iron and Steel Works), *Alpine Montan*, *Böhler* and *Schoeller Bleckmann*, were merged to form a single concern, leaving 13 main concerns in all. They now employ about one-sixth of the total labour force and contribute one-fifth of the country's industrial production. In order to rationalize the administration of the State's interest in these 13 concerns and their subsidiaries, a Federal Law passed in January 1970 transferred the controlling interest to the Austrian Industry Administration Company.

Österreichische Industrieverwaltungs-Aktiengesellschaft (ÖIAG) (*Austrian Industry Administration Company*): 1015 Vienna I, Kantgasse 1, Postfach 99; f. 1970 to form an effective co-ordination of the nationalized enterprises on the basis of economic management and to promote research activities in the subsidiary companies; Chair. TRADE FAIRS

Trade Fairs play an important part in the economic life of Austria. The largest are held during the spring and autumn at Vienna, but there are also a number of important fairs held in the provinces.

Vienna International Trade Fair: 1071 Vienna, Messeplatz; f. 1921; twice yearly (March and September); exhibits of all categories except cars, lorries, etc.; 40 countries represented; average number of visitors 650,000; Pres. EDUARD STRAUSS; Dir. ALFRED PORGES; publ. *Die Wiener Messe*.

AUSTRIA—(TRADE AND INDUSTRY, TRANSPORT, TOURISM)

Grazer Süd-Ost-Messe: Messeplatz 1, P.O.B. 63, 8011 Graz; f. 1906; twice yearly (May and October); exhibits of all categories, but special emphasis on agriculture, iron and steel, hotel and building equipment; average number of visitors 500,000; Dir. JOSEPH STOEFLER.

Export- und Mustermesse Ges. m.b.H. Dornbirn: Realschulstrasse 6, 6850 Dornbirn; annually July; main emphasis on the textile industry; average number of visitors 250,000.

Innsbrucker Messe Ges. m.b.H.: 6020 Innsbruck, Maria-Theresien-Strasse 45; annually (September); mainly devoted to tourism and equipment for the tourist; average number of visitors 200,000.

Österreichische Holzmesse-Klagenfurter Messe (*Austrian Timber Fair*): Messedirektion 9021 Klagenfurt, Postfach 79, Valentin-Leitgeb-Strasse 11; annually (summer season); main emphasis on timber and articles made of wood; average number of visitors 300,000.

International Agricultural Fair: Fair-management of Wels, Upper Austria; annual; held alternately in Wels and Ried; agriculture, cattle-breeding, industry, trade; average number of visitors 1,300,000; 310,000 square metres with 23 halls; international participation; f. 1878; Pres. WALTER PAMER.

TRANSPORT

RAILWAYS

Österreichische Bundesbahnen (*Austrian Federal Railways*): Head Office: 1010 Vienna, Elisabethstrasse 9; Gen. Man. Dr. KARL KALZ.

Vienna Divisional Management: 1020 Vienna, Nordbahnstrasse 50; Pres. Dr. ERHARD D'ARON.

Linz Divisional Management: 4020 Linz/Donau, Bahnhofstrasse 3; Pres. Dipl.-Ing. WILHELM HAAGER.

Villach Divisional Management: 9500 Villach, 10. Oktoberstrasse 20; Pres. Dipl.-Ing. FRANZ BACHLER.

Innsbruck Divisional Management: 6020 Innsbruck, Claudiastrasse 2; Pres. Dr. ADOLF RAUCH.

The Austrian Federal Railways operate 90 per cent of all the railway routes in Austria. Of a total length of 5,874 km., 2,468 km. are at present electrically operated.

There are ten other railway companies: Achensee Railway, Graz-Köflach Railway, Győr-Sopron-Ebenfurt Railway, Montafon Railway, Salzburger Stadt-Werke-Verkehrsbetriebe Local Railway, Stern and Hafferl Light Railways Co., Stubaital Railway, Styrian Provincial Railways, Vienna Local Railways, Zillertal Railway.

ROADS

There are 94,831.5 km. of classified roads in Austria of which 588 km. are modern motorway, 9,259.7 km. main roads and 22,593.4 km. secondary roads.

A 300-km. autobahn connects Salzburg and Vienna and a further section of the Süd-Autobahn connects Vienna with the Italian border.

MOTORISTS' ORGANIZATION

Österreichischer Automobil-, Motorrad- und Touring Club (Ö.A.M.T.C.): 1010 Vienna I, Schuberttring 3; Tel. 72 990; formed 1946 from Österreichischer Touring Club and Österreichischer Automobil Club; 570,000 mems.; Pres. Dr. h.c. Dipl.-Ing. MANFRED MAUTNER MARKHOF; Sec.-Gen. Dr. ROLF E. VEIT; publs. *Auto-Touring* (fortnightly), annual Touring Guides and maps.

Most of the provinces also have their own motoring organizations, affiliated to the Ö.A.M.T.C.

INLAND WATERWAYS

Ministry of Transport: 1010 Vienna, Elisabethstrasse 9; responsible for the administration of inland waterways.

Erste Donau-Dampfschiffahrtsgesellschaft (*The Danube Shipping Co.*): Vienna; fleet consists of 8 passenger vessels, 45 tankers, 197 freight ships, barges, etc.

Österreichische Bundesbahnen (*Austrian Federal Railways*): 1010 Vienna, Elisabethstrasse 9; administers steamboat services on the Bodensee (Lake Constance) and the Wolfgangsee.

Only the Danube is navigable. It enters Austria from Germany at Passau and flows into Hungary near Hainburg. The length of the Austrian section of the river is 351 km. Danube barges carry 700–1,000 tons, but loading depends on the water level which varies much during the year. Cargoes are chiefly mineral oil and derivatives, coal, coke, iron-ore, iron, steel, timber and grain.

CIVIL AVIATION

The main International Airport is at Schwechat, nearly 11 miles from Vienna. Transport is provided by the airlines between the capital and the airport. There are also international flights from Innsbruck, Salzburg, Graz, Klagenfurt and Linz, and internal flights between these cities.

Österreichische Luftverkehrs-Aktiengesellschaft (*Austrian Airlines*): 1031 Vienna, Salesianergasse 1; f. 1957; external flights from Vienna to Amsterdam, Athens, Beirut, Belgrade, Berlin, Bucharest, Budapest, Copenhagen, Frankfurt, Geneva, Istanbul, London, Milan, Moscow, Munich, Paris, Prague, Rome, Salonica, Sofia, Tel Aviv, Warsaw, Zurich, from Graz and Salzburg to Frankfurt and Zurich and from Klagenfurt and Linz to Frankfurt; Aircraft fleet: 9 DC-9-32, 2 DC-9-50 on order plus one option; Chair. and Dir.-Gen. OTTO BINDER; Dirs. D.Dr. A. HESCHGL, Dr. H. PAPOUSEK.

Austria is served by 27 foreign airlines.

BELGIUM

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Belgium lies in north-west Europe bounded to the north by the Netherlands, to the east by Luxembourg and Germany, to the south by France, and to the west by the North Sea. The climate is temperate. Dutch, spoken in the north (Flanders), and French, spoken in the south (Wallonia), are the two main official languages. The Law of August 1963 established four linguistic regions, the French, Dutch and German-speaking areas and Brussels, which is situated in the Flemish part and has bilingual status. Approximately 55 per cent of the population are Dutch-speaking, 44 per cent French-speaking and 0.6 per cent speak German. The population is overwhelmingly Roman Catholic. The national flag (proportions 15 by 13) carries three vertical stripes—black, yellow and red. The capital is Brussels.

Recent History

Since the Second World War, Belgium has emerged as one of the leaders of international co-operation in Europe. It is a founder member of the Benelux Economic Union, the Western European Union, the Council of Europe, the Organization for Economic Co-operation and Development, the European Coal and Steel Community and the European Economic Community (the Common Market). As the headquarters of EEC, NATO and over 100 other international organizations, Brussels has become an important European capital. Belgium granted independence to her former colony, the Belgian Congo (now Zaire), in 1960 and the Trusteeship Territory of Ruanda-Urundi became independent in 1962 as the Republic of Rwanda and the Kingdom (now the Republic) of Burundi.

The language dispute between the French-speaking Walloons and the Dutch-speaking Flemings has been the main problem in politics since the war. The government of Gaston Eyskens was peculiarly successful in surviving until December 1971 in an atmosphere of linguistic calm. In May 1970 the Government's attempts to introduce constitutional reforms which would provide cultural and economic decentralization and special voting procedures for Flemings and Walloons foundered over the problems of the status and territorial limits of Brussels, the mostly French-speaking capital, that lies inside Flanders. The Government bowed, in 1970, to some of the Flemish demands. In the borough elections of October 1970, Brussels voters came out in force against these concessions, bringing success for the *Front Démocratique des Francophones (F.D.F.)* in Brussels. The threat represented by the growing importance of the more extremist parties, led the Government to reintroduce the constitutional reforms with concessions to both sides, and in spite of further protests in Brussels, a revised Constitution incorporating the reforms was accepted. Now Belgians are officially recognized as either Flemings or Walloons, and each community has regional powers in economic and cultural affairs. A recent decree has made the use of Dutch mandatory in Flanders in social relations between employer and employee and in documents used by firms. The decree is not interpreted

judicially and has as its principal aim the protection of the rights of Dutch-speaking workers in Flanders and the improvement of relations with the management. There are also provisions to ensure linguistic equality in central government and Parliament.

General elections in autumn 1971 recorded new advances in the standing of federalist linguistic parties on both sides, reinforcing the position of the French-speaking federalist parties in Brussels. Though the main political parties held their ground, Mr. Eyskens was unable to form a new Government until January 1972.

Disagreement between the Social Christian and the Socialist coalition parties on several key points of the linguistic programme, caused the Government to resign ten months later, on November 22nd. Edmond Leburton, appointed by the King as *formateur*, directed the ensuing negotiations towards the formation of a new tripartite coalition with the participation of the Freedom and Progress Party (Liberals). An enlargement of the coalition would in theory ensure the Government a majority position in Parliament, enabling it to introduce its envisaged linguistic legislation. On January 21st, 1973, an agreement was reached and approved, despite a large proportion of negative votes, by the members of the three parties involved. The formation of the Government was officially announced on January 26th. Various concessions had been made in order to meet the demands of both linguistic groups. For the first time, a German-speaker represented the interests of the small German-speaking community in the Government, led by Edmond Leburton.

However, disagreement over a proposed Belgo-Iranian oil project led to the resignation in January 1974 of the coalition Government. A General Election was held on March 10th. The new Government is a coalition of the Christian Socialists and the Liberals under Leo Tindemans, the former Deputy Prime Minister and leader of the Christian Socialists.

Government

Legislative power is vested in the King, the Senate and the Chamber of Deputies. The Senate has three classes of members: directly elected, elected by Provincial Councils, and co-opted. Members of the Chamber of Deputies are elected directly by universal adult suffrage. The members of each house are elected for four years. Proportional representation is used. There are nine provinces.

Defence

Belgium is a member of NATO and maintains an army, navy and air force. The headquarters of SHAPE was transferred to Casteau in Belgium during 1967. Military service lasts 12–15 months and the total strength of the armed forces is 89,600 (of whom nearly 50 per cent are conscripts), comprising Army 65,000, Navy 4,600, Air Force 20,000. The defence budget for 1973 totalled 35,648 million Belgian francs. Compulsory national service has recently been reviewed and the Government plans to replace it by a professional army by 1978.

Economic Affairs

Because of its geographical position, Belgium is well situated for international trade and is one of the most successful importers and exporters in the world, maintaining a large merchant fleet. Belgium's population represents 0.25 per cent of the world total, yet the country accounts for 4 per cent of total international trade, its rate of increase being an annual 10 per cent since 1960. Over half Belgium's external trade is with the other members of the EEC. Principal individual trade partners are Federal Germany, the Netherlands, France, Zaire and the U.S.A. Since 1921 Belgium and Luxembourg have formed an Economic Union, and in 1960 the Benelux Treaty, incorporating the Netherlands, came into force. The country is among the most densely populated in Europe and is mainly industrial. Industrial activity has concentrated in recent years in the increasingly populous Flemish areas of the North, but the Government is encouraging re-investment in the southern, Walloon, region. There are two Ministers of Regional Economy. Apart from coal, and to a lesser extent clay, sand and stone, the country has no natural resources and purchases essential raw materials abroad; thus the export trade—of vital importance to the economy—is dependent largely on the state of the world market. About 40 per cent of Belgium's G.N.P. is exported. Major exports are iron and steel products, machinery, chemical and pharmaceutical goods, textiles and glass. Agriculture provides Belgium with about four-fifths of its food.

The year 1969 saw near record expansion, accompanied by a marked acceleration in price increases and wage rises. In the second half of 1970 the boom began to ease off as a result of tight budget policy and restrictive monetary measures. 1970 saw the near completion of total economic union between the three Benelux countries; this established Benelux as a single customs area and also introduced co-ordination between the Prime Ministers on social affairs and industrial and transport policies.

The Bank Rate underwent six increases between December 1968 and September 1969, rising from 3½ per cent to 7½ per cent, and although it dropped to 5 per cent at the end of 1972, it now stands high once more at 8½ per cent. To avoid the risk of inflation, the introduction of the Value Added Tax, imposed by the EEC, was postponed until January 1971. The inflationary pressure resulting from the rapid expansion of the previous three years was held in check during 1971, a year of relative stagnation, but the recovery during 1972 caused renewed pressure. In the summer of 1973 Belgium sought to protect domestic employment and avoid devaluation by ignoring the OECD's recommendations and severing monetary links with the revalued guilder and, despite a rate of inflation of 7.3 per cent, G.N.P. grew by 6 per cent, compared with 5.4 per cent in 1972. During the same period the balance of payments remained healthy and investment was strong. The peak seems to have passed, however, and, in common with other EEC countries which have been enjoying a minor boom, Belgium is likely to see a considerable deceleration in its economy in 1974 with the Ministry of Economic Affairs forecasting a 3 per cent increase in G.N.P. and some predicting nil growth. The slowing down of the economy has, of course, been aggravated for Belgium—a country that relies very heavily on imported energy—by the reduction of oil supplies by the

Arab states as a result of the recent Middle East conflict. Unemployment, already high at 93,200 in October 1973, has little chance of decreasing in 1974, and consumer prices, which have been rising at about 6.2 per cent over the last few years, show signs of reaching 7 per cent during the year.

Transport and Communications

The Société Nationale des Chemins de Fer Belges maintains 4,124 km. of main line railway. On the roads, buses and trams (Société Nationale des Chemins de Fer Vicinaux) are much used. There are over 23,700 km. of main roads and seven international motorways. The navigable inland waterways cover over 1,768 km., and some canals are accessible to barges of 1,450 and 2,000 tons. The Zeebrugge-Bruges canal takes vessels of 8,000 tons. The modernized port of Antwerp (now the second biggest in Europe), handles a large tonnage of inland and ocean traffic and specializes in general cargo and containers. SABENA is one of the oldest and largest airlines in the world. Belgium's merchant fleet comprised 95 ships, totalling 1,091,677 tons, in 1973.

Social Welfare

Social Welfare is administered by the National Office for Social Security. Contributions are paid by employers and employees towards family allowances, health insurance, unemployment and pensions. Most allowances and pensions are tied to the cost of living index. Workers and employees are entitled to 4 weeks holiday for every twelve month period of work. They also receive a "holiday bonus". They are insured against accidents occurring on the work premises or on the way to and from work, though only bodily injuries are liable to such reparations. Family allowances in 1973 were as follows: 736 francs for the first child, 1,240 francs for the second child, and for the third and for each of the following 1,736 francs per month. There is no housing problem in Belgium; on average 33,350 houses are built annually.

Education

Education in Belgium is compulsory from 6 to 14. The school-leaving age is to be raised to 16. A characteristic of Belgian education is the co-existence of two separate education systems: the *école officielle* is a state secular school and the *école libre* is a private denominational school receiving state subsidies. Under the School Pact of 1958 primary and secondary education were provided free and parents were given the right to choose the type of education for their children; in 1967 43 per cent of school-age children attended *écoles officielles* and 57 per cent attended *écoles libres*. Under the 1963 Language of Instruction Act teaching is given in the language of the region; in the Brussels district teaching is done in the mother language of the pupil.

Primary education is from 6–12; for children who do not continue with secondary education, a two-year course attached to the primary school is provided, but this is now generally being replaced by the lower secondary school.

Secondary education consists of: general education, *normale* (for the training of primary school teachers), technical and artistic (vocational). General education at secondary level is divided into (a) *humanités anciennes*; traditionally based on classical literature, the course is

BELGIUM—(INTRODUCTORY SURVEY, STATISTICAL SURVEY)

essentially literary though including some scientific education; (b) *humanités modernes* centred either on mathematics, science or economics. Both sectors are divided into two three-year cycles and pupils may change from one sector to the other during the first four years of their course.

University Education: University entrance requirements are a minimum pass mark at the end of the last year of secondary school plus a maturity examination. Courses are divided into a 2–3 year course of general preparation known as degree candidature followed by 2–3 years of specialization. There are four Universities, two of which are divided into French and Flemish-speaking sections, and two University Centres.

The National Study Fund provides grants where necessary and nearly 35 per cent of students are receiving scholarships. Annual educational expenditure amounts to some 20 per cent of the total budget. Since the reforms of 1970, two Ministers of Education have been responsible for the French and Dutch-speaking regions respectively.

Tourism

Ostend and other seaside towns attract many visitors. The forest-covered Ardennes is excellent hill-walking country. There are towns of rich historic and cultural interest such as Bruges, Ghent, and Antwerp.

Visas are not required for nationals of the following countries: Andorra, Argentina, Australia, Austria, Barbados, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, France, The Gambia, the Federal Republic of Germany, Greece, Guatemala, Haiti, Hon-

duras, Iceland, Iran, Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, the Republic of Korea, Lesotho, Liechtenstein, Luxembourg, Malawi, Malaysia, Malta, Mauritius, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Nicaragua, Niger, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Portugal, San Marino, Senegal, Singapore, South Africa, Spain, Swaziland, Sweden, Switzerland, Thailand, Togo, Tunisia, Turkey, United Kingdom, U.S.A., Upper Volta, Uruguay, Vatican, Venezuela, Yugoslavia.

Sport

The most popular sport is football.

Front Démocratique des Francophones (F.D.F.) (*French-Speaking Front*): 182 Chaussée de Charleroi, 1060 Brussels; members from Mouvement Populaire Wallon and the Christian Rénovation Wallonne; combined forces with the Rassemblement Wallon in 1968 elections.

The French-speaking Federalist party, the Rassemblement Wallon, made significant gains in the November 1971 elections.

Partei der Deutschsprachigen Belgier (P.D.B.) (*German-speaking Party*): f. 1972; to promote the interests of the German-speaking minority; Leaders: JOHANN WEYNAND (Elsenborn), REINER PANKERT (Eupen), MICHEL LOUIS.

Parti Feministe Unifié (P.F.U.): B-1040, Brussels; f. 1972; for radical re-evaluation of women's role in society; Leader NINA ARIEL; Sec. CLAIRE BIHIN.

JUDICIAL SYSTEM

The independence of the judiciary is based on the constitutional division of power between the legislative, executive and judicial bodies, each of which acts independently. Judges are appointed by the Crown for life, and cannot be removed except by judicial sentence. The law of 1967, in force since 1970, unified civil procedure in the district courts, and reorganized the courts' areas of competence. Each of Belgium's nine provinces is divided into judicial districts. The judiciary is organized on four levels, from the judicial canton to the district, regional and national courts. The lowest courts are those of the *Justices of the Peace*, of which there are 222, and the *Police Tribunals* (20); each type of district court numbers 26, 1 in each canton, including the *Tribunals of the First Instance*, *Tribunals of Commerce*, and *Labour Tribunals*. There are 3 regional *Courts of Appeal*, 3 regional *Labour Courts*, and 1 *Court of Assizes* in each province. The highest courts are the 3 civil and criminal *Courts of Appeal* and the supreme *Court of Cassation*. The *Military Court* is in Brussels.

Armée du Salut (Salvation Army): Head Office: 34 Nouveau Marché aux Grains, 1000 Brussels; f. 1889; Territorial Commander JEAN BORDAS; Sec.-Gen. S. VANDERKAM; publs. *Cri de Guerre*.

THE JEWISH COMMUNITY

There are about 35,000 Jews in Belgium.

Consistoire Central Israélite de Belgique (Central Council of the Jewish Communities of Belgium): 2 rue Joseph Dupont, Brussels; Leadership M. PAUL PHILIPFFSON.

THE PRESS

In pursuance of Article 18 of the Belgian Constitution: "The Press is free; no form of censorship may ever be instituted; no cautionary deposit may be demanded from writers, publishers or printers. When the author is known and is resident in Belgium, the publisher, printer or distributor may not be prosecuted."

This juridical freedom has determined the creation of newspapers and the variety of their political tendencies. It has also given them full responsibility in such matters as prices, advertisement tariffs, investment and management.

The Press legislation has its roots in the clauses of the Constitution which provide for the freedom of the Press (see Article 18 above), and for certain guarantees of procedure in case of violation of the laws governing the Press in Article 96. Many laws and decrees have been enacted in application of these principles, such as the law of October 16th, 1830 (Freedom of the Press), the decree of July 19th, 1831 (Competence and Procedure in matter of violation of the laws governing the Press), the decree of July 20th, 1831, modified by the law of April 16th, 1847 (Violation of the laws governing the Press).

There are 45 general information dailies, 29 of which are autonomous, the remainder depending largely or totally on the former (some are only, under a different title, regional editions of a larger paper).

Of the dailies, 28 are in French, 16 in Dutch and one is in German. Seven deal with economic and financial matters, and two are devoted to sport. A trend towards concentration showed itself in 1966 in the acquisition by *Le Soir* of *La Meuse* and *La Lanterne*, and in 1968 of the group "La Nouvelle Gazette". The "Le Soir" group now consists of nine dailies with a total circulation of 546,200 copies. The only other significant group consists of five Catholic papers, with 330,600 total circulation, linked with *De Standaard*.

Most of the important newspapers are family concerns, and family interests predominate even when newspapers have multiple ownership. Examples of family ownership of major papers are as follows: *Le Soir* (Rossel), *Het Laatste Nieuws* (Hoste), *La Libre Belgique* (Jourdain), *La Dernière Heure* (Brébart), *De Standaard* and *De Gentenaar-Landwacht* (Sap), *Het Belang van Limburg* (Theelen).

It should also be mentioned that *Le Peuple* and *De Volksgazet* are semi-official organs of the Belgian Socialist Party. *Het Volk* and *La Cité* are published by the Christian Workers Movement. There are few official political organs, though newspapers without any political colour are rare.

Nearly all the Belgian dailies have political leanings and are divided between the three traditional parties: Social and Christian Party, Belgian Socialist Party, Freedom and Progress Party. It is not, however, possible to establish a parallel between the supporters of the parties and the readership of the dailies. For example, the readers of the Socialist newspapers are far fewer than those who vote for that party, and though *Le Soir* claims its neutrality with regard to the parties, it nevertheless adopts a decided viewpoint in many cases.

Although there is no easy division of the daily papers into popular and serious press, most papers attempting to provide a serious news coverage, *La Libre Belgique* and *De Standaard* stand out amongst the most influential and respected. The widest circulating dailies in French are: *Le Soir* (270,547), *La Lanterne* (188,033) and *La Libre Belgique* (160,000); and in Dutch: *Het Laatste Nieuws* (305,025), *De Standaard* (333,601), *Het Volk* (218,200); and *Gazet van*

Antwerpen (208,053). The major weeklies include: *Ons Land* (251,300), *Le Soir Illustré* (255,000), and *Le Patriote Illustré* (51,000), the latter two associated with the dailies *Le Soir* and *La Libre Belgique* respectively; and the cultural periodicals *Pourquoi Pas?* (86,000) and *Europe Magazine* (76,000). The popular women's periodical *Femmes d'Aujourd'hui* (213,000) has the distinction of considerable sales in France. Some periodicals are printed in French and in Dutch.

Length of Inland Waterways: 1,768 km.

Under the Ten-Year Plan of Port Extension started in 1956: construction of several harbour docks in the Port of Antwerp; building of new giant lock at Port Frederic, near Antwerp, to take four 30,000-ton vessels or one 100,000-ton vessel. These installations have been in use since 1968.

Under the Investment Plan started in 1957: canals and rivers widened and deepened to allow passage of 1,350-ton

barges; Meuse system down to French border widened and deepened; under a new investment plan, studies for the harbour docks on the Left Bank of the Scheldt river between Antwerp and the Holland/Belgium frontier. Modernization of the ports of Ghent and Zeebrugge. Work has started on the widening and deepening of the Albert canal to allow the passage of 9,000-ton ore convoys (pushed convoys); the building of a new giant lock in the port of Zeebrugge to take one 125,000-ton vessel has started.

Following the ratification of the Scheldt-Rhine Treaty in April, 1965, construction started on a new canal, about 54 miles long, between Antwerp and Dordrecht, connecting the Scheldt with the Rhine. The canal is scheduled to be in operation in 1975 and 92 per cent of the cost is to be borne by Belgium.

SHIPPING

Antwerp is the principal port of Belgium. It is also the largest railway port on the Continent. The harbour area covers 13,200 acres and is equipped with 40 miles of deep-water quays, 50 miles of railway track and 16 dry docks. 15,000 dockers are employed and in 1971 Antwerp was visited by 18,653 ships. Over 45,000 million francs have been invested since 1960 in the modernization and industrialization of the port. Other ports include Zeebrugge, Ostend, Ghent, Liège and Brussels.

BULGARIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Bulgaria, in the eastern Balkans, is bounded to the north by Romania and to the east by the Black Sea. Turkey and Greece lie to the south and Yugoslavia to the west. The climate is one of fairly sharp contrasts between winter and summer. The language is Bulgarian, a branch of the Slavonic group, written in the Cyrillic alphabet. Most people adhere to the Bulgarian Orthodox Church and there is a substantial minority of Muslims. The national flag (proportions 3 by 2) has three horizontal stripes of white, green and crimson, with the white uppermost; in the top left-hand corner is the state emblem, surmounted by a five-pointed red star. The capital is Sofia.

Recent History

The Fatherland Front, a left-wing alliance formed in 1942, seized power with help from the Soviet Union in 1944 and set up a government under Kimon Georgiev. The constitutional monarchy formally ended when Bulgaria was declared a republic in 1946, and in elections soon after Georgi Dimitrov became both Prime Minister and First Secretary of the Communist Party in a government formed from members of the Communist-dominated Fatherland Front. Opposition parties were now abolished and a new constitution based on the Soviet model was adopted. On his death in 1949, Dimitrov was succeeded by Vassil Kolarov as Prime Minister in the same year and as First Secretary in 1950. Kolarov died in 1950 and was succeeded by Vulko Chervenkov. The political trials and executions which were common during this period and into the fifties became less frequent after the death of Stalin, and rehabilitation of those who had been disgraced began in 1956. Bulgaria has remained, however, a satellite under the influence of the Soviet Union.

Todor Zhivkov became First Secretary in 1954 and, following an ideological struggle within the Communist Party, succeeded Anton Yugov as Prime Minister in 1962. In 1965 a coup against the government failed. When a new constitution was adopted in May 1971, Zhivkov relinquished his position as Prime Minister to become the first Chairman of the newly formed State Council. This move is seen to strengthen his position at the head of the government. In the last decade relations with Western states have improved and since 1971 there has been increased co-operation with Greece in economic and technical fields. Bulgaria was one of the five Warsaw Pact countries whose forces occupied Czechoslovakia in 1968. Disagreements have arisen between Bulgaria and Yugoslavia over the Macedonian question, but in 1973 diplomatic moves were made to encourage good relations between the two countries.

Government

The People's Republic of Bulgaria is a socialist state. The National Assembly is the supreme organ of State power and is elected for a term of five years. It elects the State Council from the people's representatives. The State Council of the People's Republic of Bulgaria is a supreme and permanently acting organ of State power, which is

responsible for taking decisions and supervising their implementation. As a supreme organ of the National Assembly, the State Council performs a combination of legislative and executive duties. The Council of Ministers is the supreme executive and administrative organ of State power. The Bulgarian Communist Party is the leading force in the society and state.

Defence

Bulgaria is a member of the Warsaw Pact. Military service is for two years in the Army and Air Force, and three years in the Navy. The total strength of the armed forces is 152,000, comprising an Army of 120,000, Air Force 22,000 and Navy 10,000. Para-military forces number 17,000, including border troops, and there is a voluntary People's Militia of 150,000. The Defence budget in 1973 totalled 422 million leva.

Economic Affairs

Bulgaria is a very fertile country and since the end of the Second World War her agriculture has been organized on a large-scale co-operative and mechanized basis. Recently a reorganization into 168 huge agro-industrial complexes has been carried out. Nearly 40 per cent of the population are employed on the land, and wheat, maize, beet and barley are the chief crops. Farm produce is being marketed in more than 60 countries and 42 per cent of Bulgaria's exports are agricultural, including fruit, vegetables, tomatoes and tobacco. Industry is publicly owned and output has increased by more than 13 per cent annually from 1949 to 1974. It is now in the process of being reorganized into 69 massive combines, each controlling many related enterprises. The 1971-75 Five-Year Plan envisages a 55-60 per cent increase in industrial production. Engineering, in particular, has been greatly developed, as have the chemical fertilizer and metallurgical industries. Bulgaria's first nuclear power station, now under construction by Soviet engineers, is due for completion in 1974. Coal, iron ore, copper, lead and zinc are mined and some oil is extracted on the Black Sea coast. Foreign trade is a state monopoly and 80 per cent is with the other Comecon countries, mainly the Soviet Union. Considerable tourist development has played an important part in alleviating Bulgaria's shortage of foreign exchange; in 1972 more than 3 million tourists visited the country.

In 1970 and 1971 slowing of the growth rate caused some concern. In 1972, however, industrial output rose by 7.8 per cent while agricultural production increased by 5.7 per cent over the previous year. Real incomes rose by 4.6 per cent. Considerable industrial investment (3,500 million leva) was completed during 1972. In 1973 a Commission on the Standard of Living was set up, wage increases were announced for many industrial and professional workers, and a new emphasis was put on the production of consumer goods. These measures aimed at improving the conditions of Bulgarian workers.

Transport and Communications

Inland transport is by rail, road and waterway. There are 6,127 km. of railway track and 37,740 km. of roads; a

BULGARIA—(INTRODUCTORY SURVEY)

major motorway is under construction from Sofia to the coast. The Danube is the main waterway, the total tonnage of vessels sailing on it exceeding 227,000 tons. External services link Black Sea ports to Russia, the Mediterranean and West Europe. Balkan, the state airline, maintains services with East European capitals and other capitals in Europe and the Middle East.

Social Welfare

State social insurance is directed by the Department of Public Insurance and the Pensions Directorate under the Ministry of Labour and Social Welfare. State insurance contributions are compulsory for all workers irrespective of the nature of their work but contribution payments, rights and benefits are scaled according to the following three categories: workers and employees, labour co-operative farmers, private craftsmen and private farmers. Insurance contributions are determined by the Council of Ministers. Depending on the category of worker, contributions are either paid by the enterprises, employers, etc., who in turn levy the employees and workers, or they are paid by the workers individually.

Insured persons are paid money compensation during the time of sick leave, the amount of compensation depending on the duration of uninterrupted years of service. Every woman who is insured is entitled to full paid leave for so many days before and after childbirth—the amount of leave allowed depending on the number of children in the family already, and the number of years the woman has been insured. In 1967 the Bulgarian government increased the size of grants paid to mothers of large families. Disabled and old age pensions are paid to those who have contributed to the insurance scheme. The amount of pension will vary according to the nature of work the disabled or retired person was formerly engaged in, his length of service and his age. In 1973 increased pensions for certain old and disabled persons were introduced, and the period of paid leave for women after childbirth was greatly extended.

Since 1951 all medical services and treatment have been free for the whole population, and these are provided for by the state medical authorities. All medical treatment establishments and medical schools, training colleges and research institutes are controlled by the Ministry of Public Health. Departments of Public Health in the Regional People's Councils actually supervise medical work together with the Bulgarian Red Cross.

Education

The Bulgarian educational system follows the Soviet system more closely than the other Eastern European countries. Much importance has been attached to the development of education in Bulgaria, with the result that considerable progress has been made in recent years. A series of educational acts were passed between the years 1944 and 1950 and these provided for expansion in the educational field. In 1959 a law was passed for the "further development of education in the Bulgarian People's Republic".

In 1972, 383,000 children between the ages of one and seven years attended non-compulsory crèches (*yasli*) or kindergartens (*detski gradini*). Education is compulsory for children between the ages of seven and sixteen years, when

they attend the elementary eight-class school (*osnovno uchilishte*), and are taught both general and specialized subjects. The elementary eight-class school provides the first two stages of the "eleven-year school". More than 95 per cent of all Bulgarian children continue with their education after the age of sixteen years, when education is no longer compulsory. There are three types of school in Bulgaria to which a student may progress after he has completed the basic school. The *gimnazia* provides a general education and completes the third stage of the "eleven-year school", the *tekhnikum* is a vocational school offering a general curriculum together with a course leading to vocational qualifications in various branches of industry, agriculture, etc. The third type of secondary school is the *profesionalno tehnikeshko uchilishte* (vocational technical school), which gives theoretical knowledge on a certain vocation with practical work in the appropriate enterprises and plants and in agriculture. About 80 per cent of the students who have completed their education at the elementary school continue their studies at *tekhnikum* (technical schools) and the vocational technical schools. In 1972, 2,616 pupils were being trained at special schools for art, and 14,236 pupils attended schools where subjects are taught in foreign languages.

Higher education in Bulgaria can be divided into two main categories, *Poluvishshi instituti* and *Visshiucebni zavedeniya*. *Poluvishshi instituti* train teachers for elementary schools and some other specialists. The course lasts two to three years. There are over 14,000 students trained in them. *Visshiucebni zavedeniya* are establishments of higher education. Nearly 101,000 students study university courses in them.

Tourism

Black Sea resorts are very popular, visitors coming from Russia and East Europe. In 1962 the Government launched a campaign to attract tourists from the West and the number of visitors has since increased rapidly, reaching 3 million in 1972. The growth rate of 20 per cent a year is well above the average 8 per cent for Europe as a whole. Bulgaria has dispensed with visas since 1967 on a basis of reciprocity. A favourable exchange rate of 3.70 leva to £1 sterling exists for tourists.

Sport

Sport receives state encouragement, football being the most popular game.

Public Holidays

1974: May 1, 2 (Labour Days), May 24 (Education Day), September 9, 10 (National Days), November 7 (October Revolution).

1975: January 1 (New Year's Day).

THE CONSTITUTION

Bulgaria was formerly a monarchy, but on September 15th, 1946, King Simeon was deposed and Bulgaria was declared a Republic. The Constitution of 1947 was replaced by a new Constitution adopted by a referendum held on May 16th, 1971 and proclaimed by the Fifth National Assembly on May 18th. The following are its salient features:

The People's Republic of Bulgaria is a socialist state of the working people of towns and villages, headed by the working class. The Bulgarian Communist Party is the leading force in society and in the State. It guides the construction of a developed socialist society in the country in close fraternal co-operation with the Bulgarian Agrarian Union.

The State serves the people. It defends their interests and socialist acquisitions; directs the country's socio-economic development according to a plan; creates conditions for the constant improvement of the welfare, education and health services of the people, as well as for the all-round development of science and culture; ensures the free development of man, guarantees his rights and protects his dignity; organizes the defence of national independence, state sovereignty and the country's territorial integrity; develops and consolidates the friendship, co-operation and mutual assistance with the Union of the Soviet Socialist Republics and the other socialist countries; conducts a policy of peace and understanding with all countries and peoples.

In the People's Republic of Bulgaria all power comes from the people and belongs to the people. It is realized by the people through the freely elected representative organs—the National Assembly and the People's Councils—or directly. The representative organs are elected on the basis of a general, equal and direct right to vote by secret ballot.

All the citizens of the People's Republic of Bulgaria who are 18 years of age, irrespective of sex, nationality, race, religion, education, profession, official, public or property status, excluding those under restraint, are eligible to vote and to be elected.

The People's Republic of Bulgaria is governed strictly in accordance with the Constitution and the country's laws. It belongs to the world socialist community, which is one of the main conditions for its independence and all-round development.

SOCIAL-ECONOMIC ORGANIZATION

The economic system of the People's Republic of Bulgaria is socialist. It is based on public ownership of the means of production.

The forms of ownership are: state (all people's) ownership, co-operative ownership, ownership of public organizations, and personal ownership.

Plants and factories, banks, underground resources, the natural sources of power, nuclear energy, forests, pasture land, roads, railway, water and air transport, posts, telegraphs, telephones, the radio and television are state (all people's) property.

Co-operative property belongs to collective bodies of working people who have united of their own free will for the joint carrying out of economic activity, to co-operative unions and inter-co-operative organizations. The State fosters and aids the activity of co-operatives and of co-operative farms.

The property of public organizations serves for achieving their goals, including the realization of the activities entrusted to them by state organs, and for meeting public interests.

The citizens of the People's Republic of Bulgaria have the right of personal ownership on real and movable property to meet personal needs and those of the family. The State protects the personal property, including savings, acquired by work or in some other lawful manner. Citizens cannot exercise their rights of personal ownership and their other property rights to the detriment of the public interest. The right to inherit is recognized and guaranteed.

The State directs the national economy and the other spheres of public life on the basis of unified plans for social-economic development.

Foreign trade is the exclusive right of the State.

Labour is a fundamental social-economic factor. The socialist principle "From everyone according to his abilities, to everyone according to his work" is applied in the People's Republic of Bulgaria. The protection of labour is dealt with by the law.

THE NATIONAL ASSEMBLY

The National Assembly is the supreme representative organ which expresses the will of the people and their sovereignty. As a supreme organ of state power it combines the legislative and executive activities of the State and exercises supreme control. The term of its mandate is 5 years. It is composed of 400 people's representatives who are elected in constituencies with an equal number of inhabitants. The people's representatives are responsible and account to their electorate. They may be recalled before the expiry of the term for which they have been elected. Their recall is effected by decision of the electorate in a manner laid down by law. It is convened to sessions by the State Council at least three times a year.

The National Assembly is the only legislative organ of the People's Republic of Bulgaria and the supreme organizer of the planned management of social development. It realizes the supreme leadership of the home and foreign policy of the State; approves and amends the Constitution; determines which questions and in what manner should be decided by referendum; passes, amends and revokes laws; passes the unified plans for the social-economic development of the country and the reports for their fulfilment and the State budget and the report of the Government for its realization the preceding year; establishes taxes and fixes their rate; grants amnesty; decides the questions of declaring war and concluding peace; appoints and relieves of his duties the Commander-in-Chief of the Armed Forces; may set up state-public organs with the status of ministries; elects and relieves of their duties the State Council, the Council of Ministers, the Supreme Court and the Chief Prosecutor of the People's Republic; passes laws, decisions, declarations and appeals.

Legislative initiative belongs to the State Council, the Council of Ministers, the permanent commissions of the National Assembly, the people's representatives, the Supreme Court and the Chief Prosecutor. The right of legislative initiative belongs also to public organizations in the person of the National Council of the Fatherland Front, the Central Council of Bulgarian Trade Unions, the Central Committee of the Dimitrov Young Communist League and the Executive Council of the Central Co-operative Council on questions referring to their activity.

THE STATE COUNCIL

The State Council of the People's Republic of Bulgaria is a supreme permanent organ of state power which unites the taking of decisions with their realization. Being a supreme organ of the National Assembly, the State Council ensures the blending of legislative with executive activities. It is responsible for all its activities and reports on them to the National Assembly. At its first session the National Assembly elects a State Council from among the people's representatives by a majority of more than half the total number of deputies.

The powers of the State Council are in force until the newly elected National Assembly elects a State Council.

The State Council realizes the general leadership of the home and foreign policy of the State. It represents the People's Republic of Bulgaria in her international relations. The President of the State Council receives the credentials and letters of recall of foreign diplomatic representatives in the country.

The State Council appoints elections for a National Assembly and for people's councils; determines the date for holding a referendum when a decision has been passed by the National Assembly that a referendum should take place on a certain question and in a certain manner; convenes the National Assembly at sessions; issues decrees and other juridical acts on the basic questions arising from the laws and the decisions of the National Assembly; issues decrees also on questions of principle; in urgent cases by decree amends or amplifies individual provisions of the laws; carries out the general guidance of the country's defence and security; appoints and relieves of their duties the members of the State Defence Committee and of the supreme commanding staff of the Armed Forces; controls the activities of the Council of Ministers and of the heads of the Ministries and of the other Departments; at the proposal of the Chairman of the Council of Ministers relieves of their duties and appoints individual members of the Council of Ministers—it is the duty of the State Council to submit this decision to be approved at the next session of the National Assembly; issues decrees and passes decisions, appeals and declarations.

THE COUNCIL OF MINISTERS

The Council of Ministers (the Government) is a supreme executive and administrative organ of the State Power. The Council effects its activities under the leadership and control of the National Assembly, and when the latter is not in session—under the leadership and control of the State Council.

The Council of Ministers is responsible for the conducting of the internal and external policy of the State. It exercises the right of legislative initiative and secures conditions for carrying through the rights and freedoms of citizens. It also ensures public order and the country's security. It is responsible for the general leadership of the Armed Forces and concludes international agreements. It directly guides, co-ordinates and controls the activities of the ministries and other departments. The Council organizes both the implementation of the acts of the National Assembly, and of the State Council. It guides and controls the activities of the executive committees of the people's councils. It adopts decrees, instructions and decisions.

LOCAL GOVERNMENT

The territory of the Republic is divided for administrative purposes into Municipalities and Counties, which are governed by Municipal and County People's Councils, elected by the local population for a period of two and a half years. Their function is to implement all economic, social and cultural undertakings of local significance in conformity with the laws of the country. They prepare the economic plan and budget of the Municipality and the County within the framework of the State Economic Plan and the State Budget, and direct its execution. They are responsible for the correct administration of State property and economic enterprises in their areas, and for the maintenance of law and order. These councils report at least once a year to their electors on their activities.

JUSTICE

The judicial authorities apply the law. Justice is independent and subject only to the law. Lay judges (Assessors) also take part in the dispensation of justice. Judges of all ranks and assessors are elected except in special cases fixed by law. Supreme judicial control over every kind of court is exercised by the Supreme Court of the People's Republic, which is elected by the National Assembly for a term of five years.

Citizens whose rights have been violated by government organs may appeal against such violations before higher-ranking organs and courts, in accordance with the Law of Administrative Procedure, 1970.

The Chief Prosecutor, who is also elected by the National Assembly for five years, and is answerable to it alone, has supreme supervision over the correct observance of the law by Government organs, officials, and all citizens. It is his particular duty to attend to the prosecution and punishment of crimes which are detrimental to the national and economic interests of the Republic or affect its independence.

THE RIGHTS AND DUTIES OF CITIZENS

All citizens are equal before the law. No privileges or restrictions in rights based on nationality, origin, religion, sex, race, education or property are recognized. All preaching of racial, national or religious hatred is punishable by law.

Women have equal rights with men in all spheres, including equal pay for equal work. The State pays special attention to the needs of mothers and children. Marriage and the family are under State protection, although only civil marriage is legally valid. Children born out of wedlock have equal rights with legitimate offspring.

BULGARIA—(THE CONSTITUTION, THE GOVERNMENT)

All citizens have the right to free medical treatment in hospitals.

Labour is recognized as the basic factor of public and economic life. All citizens have the right to work, and it is their duty to engage in socially useful labour, according to their abilities. Holidays, limited working hours, pensions and medical treatment are guaranteed.

All citizens have the right to free education, which is secular and democratic. Elementary education is compulsory. National minorities have the right to be educated

in their own tongue, and to develop their national culture, although the study of Bulgarian is compulsory.

The Church is separate from the State. Citizens have freedom of religion and conscience. However, misuse of the Church and religion for political ends and the formation of religious organizations with a political basis is prohibited.

Citizens are guaranteed freedom of speech and of the Press, secrecy of correspondence, inviolability of persons and dwellings, and the right of meetings and rallies.

Military service is compulsory for all male citizens.

THE PRESS

As in most Communist countries, the press in Bulgaria is considered a powerful instrument of the Party and part of the educational system, and for that reason it is subject to strict control by the Government. Its structure closely resembles that of the Soviet press, being dominated by the Communist Party and by organizations attached to the Fatherland Front, and much of its news originates from TASS, the Soviet news agency. Censorship is not usually necessary, since editors are Party members and aware of their responsibility to the Government.

The style of the Bulgarian press is serious and articles continually defend the Communist system. However, advertising is on the increase with the realization of its usefulness in the economy, and newspapers are beginning to take on a western appearance. Most publications enjoy a steady increase in circulation.

A total of 710 newspapers of varying frequency is published in Bulgaria; there are 13 daily papers in Bulgaria, eight of which are published in Sofia, and their total circulation is 6,448,000 copies. Most of them are usually made up of four pages. The most important is *Rabotnichesko Delo* (circ. 666,000), the organ of the Communist Party. Other important newspapers are *Otechestven Front* (circ. 225,000), the Fatherland Front daily, and *Narodna Mladezh* (circ. 222,000), the youth newspaper. These dailies set the tone of the rest of the press.

There are 1,060 magazines and periodicals published in Bulgaria with a total circulation of 51,600,000 copies; they cater for almost every possible interest and are extremely popular. Several magazines are also published in foreign languages for export.

CYPRUS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Cyprus is an island in the eastern Mediterranean about 60 miles south of Turkey. It is the third largest Mediterranean island after Sicily and Sardinia. Climate is mild though snow falls in the mountainous south-west between December and March. About four-fifths of the people speak modern Greek and the remainder Turkish. The Greek-speaking community adhere to the Greek Orthodox Church while most of the Turks are Muslims. The national flag (proportions 3 by 2) is white with a gold map of Cyprus, garlanded by olive leaves, in the centre. The capital is Nicosia.

Recent History

A guerrilla war against British rule in Cyprus was begun in 1955 by Greek Cypriots seeking unification (*Enosis*) with Greece. Their movement, the National Organization of Cypriot Combatants (EOKA), was led politically by Archbishop Makarios and militarily by General George Grivas. After a compromise agreement between the Greek and Turkish communities, independence was achieved in 1960, and Archbishop Makarios became the first President of the Republic. Cyprus joined the United Nations in 1960 and the Commonwealth in 1961.

Since independence Cypriot affairs have been dominated by the question of relations between the Greek and Turkish communities and their mother countries. The Turks favoured the partition of the island, the Greeks *Enosis*. Serious fighting between Greeks and Turks broke out in December 1963, and in March 1964 a UN peace-keeping force was set up to keep the two sides apart. The situation has improved considerably since then, and it has been possible to reduce the size of the UN force from 6,900 men in 1964 to 2,557 in 1973. The UN mandate has been successively extended, most recently to June 1974. Inter-communal talks have been going on since 1968, with the participation of a UN Special Representative since 1972. Some progress towards agreement has been made, the principle of local autonomy having been accepted, despite "mutual suspicion and mistrust", and the main difference remaining is the question of the roles and powers of the national government and the communal authorities.

President Makarios has helped bring about this improvement in intercommunal relations by his apparent abandonment of *Enosis* as a practical possibility. He was re-elected unopposed, with Rauf Denktaş, a Turkish Cypriot, as Vice-President, in February 1973. A section of the Greek community still demands nothing less than *Enosis*, and General Grivas returned from Greece in 1971 to revive EOKA, this time with the objective of starting a guerrilla war against the Makarios Government. Despite renunciation by the Greek Government, Grivas's forces gained some support within the police and the National Guard, and embarked on a campaign of arms raids and bombings. The President survived assassination attempts and struck back at the Grivas supporters with a para-military force of loyal police, who brought the violence within the Greek community under control. He also gained the support of the Eastern Orthodox Church against three Cypriot

bishops who attempted to depose him, when they claimed that his clerical and secular roles were incompatible. General Grivas died in January 1974, and EOKA announced a ceasefire, while President Makarios offered an amnesty for any guerrilla fighters who surrendered. It remains to be seen whether EOKA and violent campaigns for *Enosis* will continue without Grivas.

Government

According to the Constitution, legislative authority is vested in a House of Representatives elected by adult universal suffrage for a five-year term and consisting of 35 members from the Greek community and 15 from the Turkish community. The House exercises authority on all matters save those reserved for the Communal Chambers. These bodies, elected by both communities, deal with communal affairs such as religion, teaching and culture. Executive authority is vested in the President who is Greek-speaking and is assisted by a Council of Ministers composed of seven Greek and three Turkish members.

Note: Turkish participation in government and legislation was withdrawn in January 1964, and a separate administrative and judicial system for the Turkish community was set up. In March 1965 the Greek Communal Chamber was abolished and its functions taken over by the Ministry of Education.

Defence

The National Guard was set up by the House of Representatives in 1964, after the withdrawal of the Turkish members. Men between the ages of 18 and 50 are liable to two years conscription. The 12,000-strong National Guard has officers from Greece. The Police Force has 3,000 men, is armed, and is employed both in crime prevention and in the maintenance of law and order. The presence of Grivas supporters in the Police caused the President to purge the force, and to establish a unit of 400 men as a para-military force loyal to himself.

The Turkish community has its own police force of more than 1,500 men and the Fighter's Army of between 8,000 and 10,000 men on which it relies for protection. These forces are supported by a battalion of the Turkish army.

Cyprus also contains 2,557 troops (December 1973) of the UN Peace-Keeping Force, and the British military bases at Akrotiri and Dhekelia.

Economic Affairs

The economy of Cyprus is based mainly on agriculture which employs over a third of the labour force and accounts for about 55 per cent of exports. Agricultural output has more than doubled over the past ten years and the principal crops are citrus fruits, vegetables, barley and wheat. Mining lacks good prospects for growth, though it still ranks second to agriculture in economic importance. The major minerals are copper, cupreous and iron pyrites, chromite, asbestos and gypsum. The only heavy industries are electricity generation and cement production. Manufacturing consists mainly of food processing, tobacco, clothing and footwear. In 1966 a refinery was opened near

CYPRUS—(INTRODUCTORY SURVEY)

Larnaca by a consortium of Shell, Mobil and B.P. There are plans to develop the local timber industry. The tourist industry has been rapidly expanding, and travel facilities are being improved and expanded.

The Greek community in Cyprus is responsible for 90 per cent of business, and despite the internal troubles the economy has remained remarkably strong. Since 1968, under the second Five Year Plan (1967-71), Cyprus has achieved exceptional economic growth, averaging over 8 per cent each year; in 1971 the Gross National Product per capita reached £395.6. The third Five-Year Plan (1972-76) continues the development effort. Although exports do not usually amount to more than half the total of imports, the balance of payments is maintained in credit by the inflow of foreign military expenditure from the British bases and of Turkish financial support for its community. An association agreement between Cyprus and the EEC, intended to safeguard exports of fruit and sherry, took effect on June 1st, 1973.

Transport and Communications

There are no railways in Cyprus. Towns and villages are linked by asphalted roads with frequent bus services. The three main ports are Famagusta, Limassol and Larnaca which provide cargo and passenger services to Greek and other Mediterranean ports. There is an international airport at Nicosia.

Social Welfare

Since the foundation of the Republic a comprehensive social insurance scheme covering every working male and female and their dependants has been established. It includes protection against arbitrary and unjustified dismissal, industrial welfare, and tripartite co-operation in the formulation and implementation of labour policies and objectives. Benefits and pensions from the social insurance scheme cover unemployment, sickness, maternity, widows, orphans, injury at work, old age and death.

Education

The educational system in Cyprus is centralized under the authority of the Ministry of Education. A six-year course of elementary education, starting usually at five years and three months, is compulsory for all children. There is a *Six Year Elementary School* in every community, supplemented in some areas by *Lower Mixed Schools* (infant) and *Eight Grade Schools*. About 88 per cent of all pupils progress after examination to the non-obligatory *Gymnasias* (secondary schools), which demand fees for the last three years of education. Three years at a *Lower Secondary School* gives a general practical education, and a further three years of *Senior Secondary School* allows for specialization in classical, scientific and commercial directions. There are also technical, vocational, and agricultural schools. A certain number of scholarships are granted by the Ministry of Education for secondary education.

Schools are divided into Greek and Turkish. In 1972 there were 555 Greek elementary schools, 83 secondary, 7 technical and vocational colleges, a forestry college, a school of nursing and midwifery and a teacher training

college. Figures for all establishments give an average ratio of about 1 teacher to every 24 pupils. The Turkish Education Office caters for the Turkish-speaking population and administers 10 kindergartens, 167 elementary schools, 18 junior secondary schools, 5 lycées, 6 technical schools and 1 teacher training college.

Tourism

Tourism is experiencing a considerable but carefully planned development in Cyprus. There are many beaches providing excellent sea bathing during the long, dry summer and skiing is possible in the mountains during winter. In Famagusta, particularly, there are many new hotels, although elsewhere building is controlled. In 1972, nearly 230,000 tourists visited Cyprus, and in the first eight months of 1973 there were 183,232.

Visas are not required for nationals of the following countries: Austria, Belgium, Denmark, Finland, France, Federal Republic of Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, The Netherlands, Norway, San Marino, Spain, Sweden, Switzerland, the United Kingdom and Commonwealth, the U.S.A., Yugoslavia.

Sport

Football, hockey, gymnastics and athletics are the most popular sports.

Public Holidays

1974: May 1 (Labour Day), August 15 (Assumption), October 28 ('Ochi' Day), December 25, 26 (Christmas).

1975: January 1 (New Year's Day), January 6 (Epiphany), January 19 (President's Name Day), March 17 (Lent Monday), March 25 (Greek Independence Day).

Turkish Cypriots also observe certain Muslim and Turkish holidays.

Weights and Measures

Although the standard British weights and measures (see under United Kingdom) and the Metric System are understood, Cyprus has a special internal system, as follows:

Weight:

400 drams = 1 oke = 2.8 lb.
44 okes = 1 Cyprus kantar.
180 okes = 1 Aleppo kantar.

Capacity:

1 liquid oke = 1.125 quarts.
1 Cyprus litre = 2.8 quarts.

Length:

1 pic = 2 feet.

Area:

1 donum = 14,400 sq. ft.

Currency and Exchange Rates

1,000 mils = 1 Cyprus pound.

Exchange rates (March 1974):

£1 sterling = 850.7 mils;
U.S. \$1 = 366.2 mils.

THE CONSTITUTION

SUMMARY

The Constitution entered into force on August 16th, 1960, on which date Cyprus became an independent republic. In March 1961 Cyprus was accepted as a member of the Commonwealth.

ARTICLE 1

The State of Cyprus is an independent and sovereign Republic with a presidential regime, the President being Greek and the Vice-President being Turkish, elected by the Greek and the Turkish Communities of Cyprus respectively as hereinafter in this Constitution provided.

ARTICLES 2-5

The Greek Community comprises all citizens of the Republic who are of Greek origin and whose mother tongue is Greek or who share the Greek cultural traditions or who are members of the Greek Orthodox Church.

The Turkish Community comprises all citizens of the Republic who are of Turkish origin and whose mother tongue is Turkish or who share the Turkish cultural traditions or who are Moslems.

Citizens of the Republic who do not come within the above provisions shall, within three months of the date of the coming into operation of this Constitution, opt to belong to either the Greek or the Turkish Community as individuals, but, if they belong to a religious group, shall opt as a religious group and upon such option they shall be deemed to be members of such Community.

The official languages of the Republic are Greek and Turkish.

The Republic shall have its own flag of neutral design and colour, chosen jointly by the President and the Vice-President of the Republic.

The Greek and the Turkish Communities shall have the right to celebrate respectively the Greek and the Turkish national holidays.

ARTICLES 6-35

Fundamental Rights and Liberties

ARTICLES 36-53

President and Vice-President

The President of the Republic as Head of the State represents the Republic in all its official functions; signs the credentials of diplomatic envoys and receives the credentials of foreign diplomatic envoys; signs the credentials of delegates for the negotiation of international treaties, conventions or other agreements; signs the letter relating to the transmission of the instruments of ratification of any international treaties, conventions or agreements; confers the honours of the Republic.

The Vice-President of the Republic as Vice-Head of the State has the right to be present at all official functions; at the presentation of the credentials of foreign diplomatic envoys; to recommend to the President the conferment of honours on members of the Turkish Community which recommendation the President shall accept unless there are grave reasons to the contrary. The honours so conferred will be presented to the recipient by the Vice-President if he so desires.

The election of the President and the Vice-President of the Republic shall be direct, by universal suffrage and

secret ballot, and shall, except in the case of a by-election, take place on the same day but separately.

The office of the President and of the Vice-President shall be incompatible with that of a Minister or of a Representative or of a member of a Communal Chamber or of a member of any municipal council including a Mayor or of a member of the armed or security forces of the Republic or with a public or municipal office.

The President and Vice-President of the Republic are invested by the House of Representatives.

The President and the Vice-President shall hold office for a period of five years.

The Executive power is ensured by the President and the Vice-President of the Republic.

The President and the Vice-President of the Republic in order to ensure the executive power shall have a Council of Ministers composed of seven Greek Ministers and three Turkish Ministers. The Ministers shall be designated respectively by the President and the Vice-President of the Republic who shall appoint them by an instrument signed by them both.

The decisions of the Council of Ministers shall be taken by an absolute majority and shall, unless the right of final veto or return is exercised by the President or the Vice-President of the Republic or both, be promulgated immediately by them.

The executive power exercised by the President and the Vice-President of the Republic conjointly consists of:

- Determining the design and colour of the flag.
- Creation or establishment of honours.
- Appointment of the members of the Council of Ministers.
- Promulgation by publication of the decisions of the Council of Ministers.
- Promulgation by publication of any law or decision passed by the House of Representatives.
- Appointments and termination of appointments as in Articles provided.
- Institution of compulsory military service.
- Reduction or increase of the security forces.
- Exercise of the prerogative of mercy in capital cases.
- Remission, suspension and commutation of sentences.
- Right of references to the Supreme Constitutional Court and publication of Court decisions.
- Address of messages to the House of Representatives.

The executive power exercised by the President consists of:

- Designation and termination of appointment of Greek Ministers.
- Convening and presiding of the meetings of the Council of Ministers.
- Right of final veto on Council decisions and on laws or decisions of the House of Representatives concerning foreign affairs, defence or security.
- Right of recourse to the Supreme Constitutional Court.
- Publication of the communal laws and decisions of the Greek Communal Chamber.
- Prerogative of mercy in capital cases.
- Addressing messages to the House of Representatives.

The executive power exercised by the Vice-President consists of:

- Designation and termination of appointment of Turkish Ministers.
- Asking the President for the convening of the Council of Ministers and being present and taking part in the discussions.
- Right of final veto on Council decisions and on laws or decisions of the House of Representatives concerning foreign affairs, defence or security.
- Right of recourse to the Supreme Constitutional Court.
- Publication of the communal laws and decisions of the Turkish Communal Chamber.
- Prerogative of mercy in capital cases.
- Addressing messages to the House of Representatives.

ARTICLES 54-60

Council of Ministers

The Council of Ministers shall exercise executive power in all matters, other than those which are within the competence of a Communal Chamber, including the following:

- General direction and control of the government of the Republic and the direction of general policy.
- Foreign affairs, defence and security.
- Co-ordination and supervision of all public services.
- Supervision and disposition of property belonging to the Republic.
- Consideration of Bills to be introduced to the House of Representatives by a Minister.
- Making of any order or regulation for the carrying into effect of any law as provided by such law.
- Consideration of the Budget of the Republic to be introduced to the House of Representatives.

ARTICLES 61-85

House of Representatives

The legislative power of the Republic shall be exercised by the House of Representatives in all matters except those expressly reserved to the Communal Chambers.

The number of Representatives shall be fifty:

Provided that such number may be altered by a resolution of the House of Representatives carried by a majority comprising two-thirds of the Representatives elected by the Greek Community and two-thirds of the Representatives elected by the Turkish Community.

Out of the number of Representatives 70 per cent shall be elected by the Greek Community and 30 per cent by the Turkish Community separately from amongst their members respectively, and, in the case of a contested election, by universal suffrage and by direct and secret ballot held on the same day.

The term of office of the House of Representatives shall be for a period of five years.

The President of the House of Representatives shall be a Greek, and shall be elected by the Representatives elected by the Greek Community, and the Vice-President shall be a Turk and shall be elected by the Representatives elected by the Turkish Community.

ARTICLES 86-111

Communal Chambers

The Greek and the Turkish Communities respectively shall elect from amongst their own members a Communal Chamber.

The Communal Chambers shall, in relation to their respective Community, have competence to exercise legislative power solely with regard to the following:

- All religious, educational, cultural and teaching matters.
- Personal status; composition and instances of courts dealing with civil disputes relating to personal status and to religious matters.
- Imposition of personal taxes and fees on members of their respective Community in order to provide for their respective needs.

ARTICLES 112-121, 126-128

Officers of the Republic

ARTICLES 122-125

The Public Service

The public service shall be composed as to 70 per cent of Greeks and as to 30 per cent of Turks.

ARTICLES 129-132

The Forces of the Republic

The Republic shall have an army of two thousand men of whom 60 per cent shall be Greeks and 40 per cent shall be Turks.

The security forces of the Republic shall consist of the police and gendarmerie and shall have a contingent of two thousand men. The forces shall be composed as to 70 per cent of Greeks and as to 30 per cent of Turks.

Supreme Court: Nicosia.

President: Hon. Mr. Justice M. A. TRIANTAFYLIDIS.

Judges: Hon. Mr. Justice A. S. STAVRINIDES, Hon. Mr. Justice L. N. LOIZOU, Hon. Mr. Justice T. HADJIANASTASSIOU, Hon. Mr. Justice A. N. LOIZOU, Hon. Mr. Justice Y. CH. MALACHITOS.

The Supreme Court is the final appellate court in the Republic and the final adjudicator in matters of consti-

tutional and administrative law, including recourses on conflict of competence between state organs on questions of the constitutionality of laws, etc. It deals with appeals from Assize Courts and District Courts as well as from the decisions of its own single judges when exercising original jurisdiction in certain matters such as prerogative orders of *habeas corpus*, *mandamus*, *certiorari*, etc., and in admiralty and certain matrimonial causes.

Assize Courts and District Courts:

As required by the Constitution a law was passed in 1960 providing for the establishment, jurisdiction and powers of courts of civil and criminal jurisdiction, i.e. of six District Courts and six Assize Courts.

Ecclesiastical Courts:

There are seven Orthodox Church tribunals having exclusive jurisdiction in matrimonial causes between members of the Greek Orthodox Church. Appeals go from these tribunals to the appellate tribunal of the Church.

Supreme Council of Judicature: Nicosia.

The Supreme Council of Judicature is composed of the Attorney-General, the President and the two senior Judges of the Supreme Court, the senior District Court President, the senior District Court Judge and a practising advocate of at least twelve years practice.

It is responsible for the appointment, promotion, transfer, etc., of the judges exercising civil and criminal jurisdiction in the District Courts and the Assize Courts.

TURKISH CYPRIOT JUDICIAL SYSTEM

The Turkish Cypriot Administration has set up a parallel system of courts in the areas it controls. The Turkish Supreme Court, Assize Courts and District Courts exercise the same functions as those of the Greek community, under the authority of the Turkish Legislative Assembly. The Turkish Supreme Court exercises the powers and duties of the Supreme Council of Judicature regarding transfers and discipline of judges of the District and Assize Courts. Judges are appointed and dismissed by the Vice-President of the Republic and President of the Turkish Cypriot Administration on the recommendation of the Supreme Court.

Supreme Court: Ataturk Square, Nicosia.

President: Hon. Mr. Justice M. NECATI MÜNİR.

Judges: Hon. Mr. Justice ULFET EMIN, Hon. Mr. Justice AHMED IZZET, Hon. Mr. Justice SHAKİR S. İLKAY.

Turkish Communal Courts:

Civil disputes relating to personal status of members of the Turkish Community are dealt with by two Communal Courts. There is also a communal appellate court to which appeals may be made from the decisions of the courts of first instance.

THE PRESS

The establishment and general running of newspapers and periodicals is defined in the Press Law, consisting of Chapter 79 of the pre-independence Code of Law, later amended by Law 69 in 1965. Article 19 of the Constitution declares in connection with the rights of the Press: "Every person has the right to freedom of speech and expression in any form. This right includes freedom to hold opinions and impart information and ideas without interference by any public authority and regardless of frontiers." This freedom is subject to legally specified conditions and restrictions in the interest of state security, public safety, order, public health and morals, the protection of the reputation and the rights of others and the preservation of the authority and impartiality of the Judiciary.

Cyprus has a small but vigorous Press, catering for all political viewpoints in the twofold community, and constituting the most influential of the communications media. Most newspapers are owned by private individuals but *Patris* is owned by a limited company.

Of the twelve dailies, nine are in Greek, two in Turkish and one in English. The *Cyprus Mail* appears each day but all the Greek and some of the Turkish dailies do not publish a Monday edition, when most of the weekly papers appear.

Philelephtheros and *Apogevmatini* tend to be pro-government, while *Haravghi* (associated with the weekly *Nei Keri*) reflects the views of the extreme left, and *Ethniki* and *Patris* those of the political right. The moderate-liberal *Eleftheria*, a paper of some prestige, is politically independent, like the *Cyprus Mail*, *Agon* and *Makhi*. *Bozkuvi* and *Halkin Sesi* are the main Turkish Cypriot dailies. Both are independent, nationalist right. The English language *Special News Bulletin* is the mouthpiece of the Turkish Community, reflecting the views of the Turkish Cypriot Administration. *Eleftheria*, *Philelephtheros* and the *Cyprus Mail* are the dailies most respected for their serious news coverage. *Makhi* and *Haravghi* are also very influential, being very widely read. Though low by West European standards, their readership is high in comparison with other Middle East circulation figures. Precise, reliable circulation figures are virtually unobtainable.

Among the most respected weekly newspapers are the moderate *Kypros* and *Alithia*, though *Tharros* and *Nei Keri* are very popular. There are also a number of trade union papers, headed by *Ergatiko Vima*, the organ of the Pancyprian Federation of Labour. The Turkish Cypriot

CYPRUS—(THE PRESS)

Trade Union movement and the Co-operative movement are represented by periodicals *Türk-Sen* and *Kooperatif* respectively.

Both Communities have their own *Official Gazette* in which laws, regulations and other official notifications are published in their own language.

TRADE FAIR

Cyprus International Trade Fair: P.O.B. 1094, Nicosia; annually in September.

TRANSPORT

RAILWAYS

There are no railways in Cyprus.

ROADS

There are 8,319 kilometres of roads, of which 623 kilometres are main roads. There is an extensive network of bus services between Nicosia and the major towns and most villages, and between district centres and villages in each area. There are also taxi services between the principal towns.

Cyprus Automobile Association: Flat 101, Pedhieos Building, Louki Akrita Ave., P.O.B. 2279, Nicosia; f. 1933; Chair. M. S. AGROTIS.

SHIPPING

Famagusta is the main cargo port of the island and has a natural harbour; vessels of an overall length of 120 metres and a maximum draught of 6.8 metres can be accommodated alongside the quay in the inner harbour; ships with a maximum draught of 9.15 metres can be accommodated in the outer harbour. In 1972 461,733 metric tons were loaded there and 711,991 metric tons unloaded. Breakwater ports at Larnaca and Limassol were completed in 1973; 168,563 metric tons were loaded and 324,649 unloaded in 1972. The harbour of Paphos offers good anchorage to small vessels and is used mainly for exports, 107,300 metric tons being loaded in 1972 and only 11,912 unloaded. Kyrenia's small harbour is now used chiefly by fishing boats and yachts. There is very little coastal shipping.

Most of the island's oil passes through Larnaca (705,423 metric tons in 1972), although large quantities are discharged at Dhekelia, Karavostassi, Moni and Akrotiri for use in power stations and cement factories. Minerals are exported mainly through Vassiliko, Latchi and Karavostassi, where a total of 565,000 metric tons was loaded in 1972.

CYPRUS—(TRANSPORT, TOURISM)

In recent years the number of merchant vessels registered in Cyprus has risen sharply from 314 (1,575,702 g.r.t.) in 1970 to 659 (2,838,811 g.r.t.) in 1972.

Limassol is the main passenger port in Cyprus with 17,335 arrivals and 19,515 departures in 1972. In the same year the figures for Famagusta were 11,080 and 10,498 and for all other ports 631 and 598 respectively.

There are over sixty lines running cargo and passenger services to Cyprus at approximately weekly, twice monthly and monthly intervals

FESTIVALS

There are numerous religious feasts, celebrated with processions, dancing, fairs and the display of icons. The orange, peach, fig and grape harvests are occasions for local festivals, parades and dancing. Carnivals, exhibitions and dances are organized by the larger towns. During June the ancient theatres of Curium and Salamis are used for open-air folk-dancing, concerts and performances of ancient and modern drama. The Pan-Cyprian Cultural Festival takes place in Larnaca in September.

CZECHOSLOVAKIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Czechoslovak Socialist Republic lies in Central Europe between 48°-51° N latitude and 12°-23° E longitude. Its neighbours are Poland to the north, the German Democratic Republic to the north-west, the German Federal Republic in the west, Austria to the south-west, Hungary to the south-east and the U.S.S.R. in the extreme east. The state is composed of two main population groups, the Czechs (65.0 per cent of the total population) and the Slovaks (29.2 per cent). The climate is continental with warm summers and cold winters, average mean temperature 9°C (49°F). The official languages, which are mutually understandable, are Czech and Slovak, members of the west Slavonic group. About 70 per cent of the people are Roman Catholics, 15 per cent Protestants and the remainder unstated. The national flag (proportions 3 by 2) has horizontal stripes of white and red, with a blue triangle (half the length) at the hoist. The capital is Prague.

Recent History

The 1946 post-war elections returned the Communists as the strongest single party, and their leader, Klement Gottwald, became Prime Minister. When, in 1948, they assumed full power, Gottwald replaced Edvard Beneš as President, a position he held until his death in 1953. The country aligned itself with the Soviet-led East European bloc, joining the Council for Mutual Economic Assistance (COMECON) and the Warsaw Pact.

Under Gottwald, government followed a rigid Stalinist pattern, and in the early 1950s there were many political trials. Although these died out under Gottwald's successors, Antonín Zápotocký and, from 1956, Antonín Novotný, de-Stalinization was late in coming to Czechoslovakia, and no relaxation was felt until 1963, when a new government under Jozef Lenárt was formed. Economic and political reforms came slowly until in January 1968 Alexander Dubček took over from Novotný as Party Secretary and in March Ludvík Svoboda succeeded him as President. The policies of the new government expressed a spirit of independence and liberalism, and envisaged widespread reforms. These were seen by other members of the East European bloc as endangering their unity, and on August 21st, 1968, Warsaw Pact forces occupied Prague and other major cities. The Soviet Government afterwards exerted heavy pressure on Czech leaders to suppress their reformist policies, and in April 1969 Dubček was replaced by Dr. Gustáv Husák as First Secretary of the Communist Party. Although Dr. Husák resisted some pressure for stricter control and political trials, there was a severe purge of Communist Party membership, and most of Dubček's supporters were removed from the Government. The first elections since 1964 were held in November 1971 and showed a 99.81 per cent vote in favour of National Front candidates. In 1973 attempts were made to normalize the political and diplomatic situation resulting from the events of 1968. An amnesty for exiles was announced, and relations with Austria, Romania and Yugoslavia were improved. In December a treaty was signed with Federal Germany establishing normal relations between the two countries for the first time.

Government

Czechoslovakia is a federal state of two nations of equal rights, the Czechs and the Slovaks, and composed of two republics each having its own government. The supreme organ of state power is the Federal Assembly, elected for a five-year term by all citizens over the age of 18, and having two chambers, the House of the People and the House of Nations. Membership of the former is proportional to the population of the Republic—there are 138 Czechs and 62 Slovaks; the House of Nations has 150 members, 75 from each of the republics. The Federal Assembly elects the President for a five-year term of office, and he, in turn, appoints the Federal Government, the supreme executive organ of state power. Each of the republics has its own government (responsible for all matters except external relations, defence, overseas trade, transport and communications) and its own National Council or parliament.

Defence

Czechoslovakia is a member of the Eastern European Mutual Assistance Treaty, the "Warsaw Pact". Military service is compulsory and lasts for two years in the Army and slightly longer in the Air Force. Service with the reserve lasts until the age of fifty years. The Army numbers 150,000 and the Air Force 40,000; border troops number 35,000. It is planned to increase the strength of the People's Militia, now at 120,000, to 250,000. Defence expenditure in 1973 totalled 16,700 million Kčs. As a result of the invasion of 1968, Soviet forces occupy permanent positions on the frontier with Federal Germany.

Economic Affairs

Although Czechoslovakia depends on the U.S.S.R. for many raw materials, it is a highly industrialized country. In 1972 the industrial sector employed 38 per cent of the working population and produced 61 per cent of Net Material Product. Industry is state-owned. Until 1961, heavy industry and engineering received precedence, but under the third Five-Year Plan (1961-65), greater stress was laid on light industry. The fourth Five-Year Plan (1966-70) aimed to develop the power and chemical industries, modernize machinery building and improve consumer services.

During this period, national income and industrial output rose by 39 per cent, and despite difficult circumstances and certain political unrest, the planned targets for industry were reported to have been exceeded. It was under this plan that the radical reforms of Dr. Ota Šik, then Deputy Prime Minister, were proposed, including the decentralization of industry, autonomy for individual state enterprises, and the acceptance of Western capital for joint ventures. These plans were shelved, and a return to strong central management of the economy came in 1969. Czechoslovakia is an important engineering nation with a considerable output of motor cars and cycles. Other important industries are glass, beer, ceramics and textiles.

Agriculture has been collectivized and about 90 per cent of the land is under agricultural co-operatives, state farms or communal enterprises. It has become an important

stabilizing factor in the economy. During the period 1966–70, its production increased by 19 per cent. Important crops are wheat, barley, potatoes and sugar beet.

The fifth Five-Year Plan (1971–75) envisages a growth rate in the national income of 5 per cent a year, calling for a considerable increase in productivity and the more efficient use of resources. With heavy industry still the mainstay of economic advance and priority given to the chemical and petrochemical industries, industrial output is planned to grow by about 35 per cent, while agriculture is expected to produce 14 per cent more.

Czechoslovakia is a member of the Council for Mutual Economic Assistance (COMECON), and a large proportion of its trade is with the countries of Eastern Europe, particularly the Soviet Union. However, there is considerable trade with West European countries, notably Federal Germany, Austria and the United Kingdom. Principal exports include machinery and equipment, chemicals and fuels, and glass and other manufactured goods.

Transport and Communications

About 60 per cent of all freight traffic is carried by the railways which have a total length of 13,299 km., 2,631 of which are electrified. Roads (totalling 73,363 km.) carry about 70 per cent of the passenger transport. The Elbe and Danube are navigable and Czechoslovakia's overseas trade passes through East German, Polish and Black Sea ports. Civil aviation is important and there are about 60 regular internal services.

Social Welfare

A single and universal system of social security was established in Czechoslovakia after the Second World War. In 1948 a law was passed by which all workers and employees, irrespective of the nature of their work, benefited equally from the new insurance scheme. In 1966 the general protection of health was provided for by law, with particular emphasis on the prevention of illness rather than treatment and cure. Medical care, treatment, medicines, etc. are free for the entire Czechoslovak population. The National Health Insurance Scheme is administered by the Revolutionary Trade Union Movement, which also supervises other aspects of social welfare such as protection of the individual at work, housing conditions and recreation schemes. Since 1956 sickness benefit has been paid to all those workers who are temporarily unable to work due to illness, injury, medical treatment, etc. Sickness benefit may be paid for a maximum period of two years after which time disablement pension applies. Social security is guaranteed for all through different schemes: for wage-earners, members of co-operative societies, members of agricultural co-operatives, pensioners and members of the armed forces. Benefits and rights are the same for all these groups. Great importance is attached today to maternity benefits and family allowances, which are paid according to the situation of the woman and family concerned. It is hoped that in the near future these allowances will be increased to help large families with low incomes. Plans are being made to help old people by increasing old-age pensions.

Education

Plans for the expansion of the Czechoslovak educational system were launched in 1960. Emphasis has since been laid on the lengthening of the basic school, expansion of

vocational and technical education, and extra educational facilities for adults. Children between the ages of three and six years attend kindergarten (*mateřská škola*). This form of primary education has proved very popular in recent years and it is hoped that in the near future all children may be assured a place at kindergarten. Education is compulsory between the ages of six and fifteen years, when children attend the basic school (*základní devítiletá škola*). There were 10,551 basic schools with 1,912,225 pupils in attendance in 1972/73. At first a general curriculum is provided, followed by more specialized subjects. Owing to lack of classroom space, the basic school suffers from overcrowding and many children in the larger towns and cities are forced to attend lessons in shifts.

The secondary school system in Czechoslovakia is similar to those of other countries in Eastern Europe. The vast majority of Czechoslovak children continue their education in some form or other after the compulsory basic school. The general secondary school (*střední všeobecně vzdělávací škola*), provides three-year courses in either mathematics and science, or languages and the social sciences. In 1959 a new type of school was set up, the *střední škola pro pracující* (secondary school for adult students). This school is attended by workers and adults and in most cases is actually run by industrial plants for their employees. 430 general secondary schools and secondary schools for adult students had 129,063 students in 1972/73. Vocational secondary schools (*střední odborná škola*), as their name suggests, provide a general education together with vocational training. There were 650 such schools with 272,909 students in 1972/73. The apprentice school (*učňovská škola*) trains the student to enter a trade in industry, agriculture, etc., straight from school. In 1972/73 they were attended by 355,774 students. At the same time, 37 institutions of higher learning, including 6 universities, had 104 departments and 127,957 students. 21,157 students were attending courses without interrupting their normal work.

Tourism

Czechoslovakia has magnificent scenery, with winter sports facilities. Prague is the best known of the historic cities and there are famous castles and cathedrals, numerous resorts and 29 spas with natural mineral springs, notably Mariánské Lázně (Marienbad) and Karlovy Vary (Carlsbad). A total of 11,498,968 tourists visited Czechoslovakia in 1972, including 895,000 from West European and overseas countries. There is a special tourist exchange rate of 23 Kčs. to £1 sterling.

Visas are required by nationals of all non-communist countries.

Sport

One voluntary organization, the Czechoslovak Union for Physical Training (ČSTV), embraces the various sporting, gymnastic, tourist and chess associations. It has two national bodies: Czech Physical Training Organization (ČTO) and Slovak Physical Training Organization (STO). Through its associations the ČSTV supervises international sporting events, plans the development of sport, conducts research and encourages physical training of all kinds. In 1972 ČSTV had 7,732 sections and more than 22,200 sporting clubs with a membership of 1,328,637. The largest sections are football, ice-hockey, volley-ball, skiing and track and field athletics, in order of popularity.

THE CONSTITUTION

(Proclaimed on July 11th, 1960; amended October 1968 and July 1971)

The Czechoslovak Socialist Republic is a Federal State of two fraternal nations possessing equal rights, the Czechs and the Slovaks.

According to the Constitution, work in the interests of the community is a primary duty and the right to work a primary right of every citizen. All citizens have equal rights and equal duties without regard to nationality and race. Remuneration for work done is based on its quantity, quality and social importance. Men and women have equal status. All citizens have the right to health protection, education and leisure after work including paid holidays. Other rights include: freedom of expression, assembly, inviolability of the person, the home, mails, etc. Everyone has the right to profess any religious faith or to be without religious conviction.

The economic foundation of the State is the Socialist economic system which excludes every form of exploitation of man by man. The means of production are socially owned and the entire national economy is directed by plan. Socialist ownership includes both national property such as mineral wealth, the means of industrial production, banks, etc., and co-operative property. The land of members of agricultural co-operatives remains the personal property of the individual members, but is jointly farmed by the co-operative. Small private enterprises based on the labour of the owner himself and excluding exploitation of another's labour power are permitted. Personal ownership of consumer goods, family houses and savings derived from labour is inviolable. Inheritance of such personal property is guaranteed.

By the Constitutional Law on Federalization, passed by the National Assembly on October 27th, 1968, the Czechoslovak Socialist Republic became, on January 1st, 1969, a federal state of two nations of equal rights—the Czechs and the Slovaks. It is composed of two republics: the Czech Socialist Republic and the Slovak Socialist Republic. Each of them has its own government.

The supreme organ of state power in the Czechoslovak Socialist Republic is the Federal Assembly (Parliament) which is elected for a five-year term and elects the President of the Republic. The Federal Assembly consists of two chambers of equal rights: the House of the People and the House of Nations. The composition of the House of the People corresponds to the composition of the population of the Czechoslovak Socialist Republic and of its 200 deputies, 137 are Czechs and 63 Slovaks. The House of Nations has 150 deputies on parity basis: 75 are elected in the Czech Socialist Republic and 75 in the Slovak Socialist Republic.

The President, elected by the Federal Assembly, appoints the Federal Government. The Government is the supreme executive organ of State power in Czechoslovakia; it consists of a Prime Minister, 10 Deputy Prime Ministers and 16 Ministers. The Ministries of Foreign Affairs, of National Defence, of Foreign Trade, of Transport and of Posts and Telecommunications, are within the exclusive competence of the Federation, i.e. there are no corresponding portfolios in the governments of the republics. The second group of Federal Government organs share authority with organs of the two republics, i.e. there are corresponding portfolios in the national governments.

Each of the republics has its own parliament: the Czech National Council and the Slovak National Council. The members are elected for a five-year term of office. The Czech National Council has 200 deputies, the Slovak

National Council 150 deputies. There are also separate Czech and Slovak Governments, each consisting of a Prime Minister, 3 Deputy Prime Ministers and 15 other Ministers.

National committees are the organs of popular self-government in the regions, districts and localities. They rely on the active participation of the working people of their area and co-operate with other organizations of the people. They direct local economic and cultural development, ensure the protection of socialist ownership and the maintenance of socialist order in society, see to the implementation and observance of laws, etc. They take part in drafting and carrying out the State plan for the development of the national economy and draw up their own budgets which form a part of the State budget. Commissions elected by the national committees are charged with various aspects of public work and carry out their tasks with the aid of a large number of citizens who need not be elected members of the national committees.

All representative bodies are elected, and the right to elect is universal, equal and by secret ballot. Every citizen has the right to vote on reaching the age of 18, and is eligible for election on reaching the age of 21. Deputies must maintain constant contacts with their constituents, heed their suggestions and be accountable to them for their activity. A member of any representative body may be recalled by his constituents at any time.

The execution of justice is vested in elected and independent courts. Benches are composed of professional judges and of judges who carry out their function in addition to their regular employment. Both categories are equal in making decisions. Judges are independent in the discharge of their office and bound solely by the legal order of the socialist State. The supervision of the observance of the laws and other legal regulations by public bodies and by individual citizens rests with the Office of the Procurator. The Procurator-General is appointed and recalled by the President of the Republic and is accountable to the Federal Assembly.

The Czechoslovak Constitution does not restrict itself to laying down a system of state organs but also sets forth the principles by which the life of society is to be guided. It is not just a Constitution of the State but a constitution for the whole of society. In economic, political and cultural life, in questions of social security and many other spheres it emphasizes the participation of citizens in the administration of public affairs and even transfers a number of functions that have hitherto pertained to state organs to the working people and their voluntary organizations.

The guiding force in society and in the State is the Communist Party of Czechoslovakia, a voluntary militant alliance of the most active and politically conscious citizens. It is associated with the other political parties, the Trade Union Movement and other people's organizations in the National Front of Czechs and Slovaks.

ELECTIONS TO THE FEDERAL ASSEMBLY

Elections of deputies to both Houses of the Czechoslovak Federal Assembly are regulated by the provisions of a law passed by the Federal Assembly in July 1971.

For election purposes, the country is divided into electoral districts; there are 200 electoral districts in the Czechoslovak Socialist Republic, each represented by one

CZECHOSLOVAKIA—(THE CONSTITUTION, THE GOVERNMENT)

deputy in the House of the People, and 75 electoral districts each in the Czech and Slovak Socialist Republics, which send one deputy each to the House of Nations.

All candidates are National Front candidates, put forward by the Communist Party of Czechoslovakia, and by the other political parties and social organizations associated in the National Front. One or more candidates can be nominated for one electoral district. Appropriate National Front organs select the candidates from the list of nominees, and submit their names for registration.

The principle of simple majority obtains in the elections: the candidate is elected when he obtains more than 50 per cent of the votes cast, provided that a majority of all voters in his electoral district exercises their right to vote. When either of the two conditions is not met, new elections are held in the electoral district concerned within two weeks. When a seat becomes vacant, the Presidium of the Federal Assembly calls a by-election in the constituency; this is not mandatory in the last year of the deputies' term of office.

JUDICIAL SYSTEM

Justice is executed through elected courts which consist of three ranks of law courts: the Supreme Court of the Czechoslovak Socialist Republic (together with Supreme Courts of the Czech and Slovak Socialist Republics), Regional and District Courts. There are also Military Courts which are subject to special regulations. Judges of the Czechoslovak Supreme Court are elected by the Federal Assembly; judges of the Czech and Slovak Supreme Courts and of the Regional and District Courts are elected by the National Councils of the respective republics. Judges are of two kinds, professional and lay judges, the

latter having other occupations, but both types have equal authority. Lay judges are elected by District National Committees.

Chairman of the Supreme Court: Dr. JOSEF ONDŘEJ.

Supervision of the observance of laws and legal regulations rests with the Procurator-General who is appointed by the President of the Republic and accountable to the Federal Assembly.

The last official census of members of various churches and sects was held in 1951.

THE PRESS

Although the Czechoslovak Press was considerably affected by the events of 1968, its basic purpose is still as defined in the October 1966 Press Law: "to give as far as possible complete information . . . to advance the interest of socialist society . . . to promote the people's socialist awareness of the policy of the Communist Party as the leading force in society and state".

This law, which codified previous legislation on the rights and duties of journalists and publishers states that "freedom of expression and of the Press is guaranteed by the fact that publishers and press organizations . . . have been placed at the disposal of the working people and their organizations". Hence, only political parties and such social institutions associated with the National Front as trade unions, youth unions, cultural associations and rural co-operatives may own newspapers and periodicals. Private ownership is forbidden. But even collective ownership rests upon official approval; papers must be registered with the Czech or Slovak Office for the Press and Information, and when the Editor fails to observe the conditions under which approval was given, the paper may be suspended.

During 1968 there was freedom of publication and Western books circulated in large editions. Censorship was abolished in June, but restored again in September. In 1969 censorship was again abolished, but the necessity for official approval has since prevented the publication of ideologically dissenting journals. The Editor of a paper or periodical bears full responsibility for its contents.

The Czechoslovak people far exceed other East European nations in their consumption per head of newspapers and magazines. There are twenty-nine daily papers, including nine in Prague and nine (one in Hungarian and the rest in Slovak) in Bratislava. About 500 weekly papers and magazines and an even greater number of less frequent periodicals are also published. In addition, farms and factories produce their own daily or weekly news-sheets, dealing mainly with local issues. All registered periodicals receive an allocation of newsprint.

Political speeches and articles on social and economic development are given special prominence. In contrast with much of the East European Press, which is often characterized as dull and lacking in popular appeal, the Czechoslovak Press is relatively lively and colourful and allows a qualified scope for criticism. There is no tabloid press as the policy is to play down such items as constitute the sort of sensationalism familiar to the West. Advertising is now more common than formerly, and although mainly concerned with state enterprises, it includes some material from abroad. Sales are mainly by subscription.

The most widely read and influential papers are the Prague dailies headed by *Rudé právo*. This paper is the chief organ of the Czechoslovak Communist Party. It is eight pages long and has a nation-wide circulation of 900,000 copies. Its sister paper, the Slovak C.P.'s *Pravda* (270,000), is the leading provincial daily. The Czech and the Slovak Trade Union organs are *Práce* and *Práca* in their respective cities. Three other important metropolitan dailies are *Lidová demokracie* and *Svobodné slovo*, produced respectively by the People's Party and the Socialist Party, and *Mladá fronta*, published by the Central Committee of the Socialist Union of Youth.

There are also many small circulation periodicals—often of very high quality—dealing with specialized subjects. One should also note several very popular and colourful women's magazines, such as *Vlasta* (640,000), and the satirical *Dikobraz*, famous for its political cartoons.

The Times and *Le Monde* are the only non-Communist Western newspapers allowed.

The national news agency, Československá tisková kancelář (ČTK), receives a state subsidy and is controlled by the Federal Government through its Presidium.

PUBLISHERS

In May 1949 legislation was passed making the publication, printing, illustration, and distribution of all books and music the prerogative of the State. These activities are now restricted to the Government, political parties, trade unions, and national and communal bodies. However, churches and religious bodies are permitted to publish if the State will accept their work for printing. In 1972, 6,635 titles were published.

DENMARK

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Denmark consists of the peninsula of Jutland, the islands of Zealand, Funen and Bornholm and 480 smaller islands between the North Sea and the Baltic. Outlying possessions are Greenland and the Faeroe Islands in the North Atlantic. Denmark is low-lying and the climate is temperate with cold winters. The language is Danish. The Danish Lutheran Church is the established Church, to which 94 per cent of the population belong, and there are small communities of Roman Catholics, Baptists and Jews. The national flag (proportions 37 by 28) carries a white cross on a red background. The capital is Copenhagen.

Recent History

On the ending of German occupation in 1945 Denmark immediately recognized the independence of Iceland, which had been declared the previous year. Later in the year she joined the United Nations. Home rule was granted to the Faeroe Islands in 1948. Denmark was a founder member of NATO in 1949 and of the Nordic Council in 1952. In January 1972 King Frederik IX died and his eldest daughter, Margrethe, became the first queen to rule Denmark for nearly 600 years.

The system of proportional representation embodied in the 1953 Constitution makes it difficult for a single party to gain a majority in the Folketing, and the tendency of Danish parties to fragment has produced a series of coalition and minority governments in recent years. The Social Democrats, led by Jens Otto Krag, held power until they lost support from the Socialist People's Party in December 1967. Hilmar Baunsgård's non-socialist coalition lasted from February 1968 to October 1971 when the Social Democrats returned to power. Having obtained popular approval for Denmark's entry into the European Economic Community (EEC) in a referendum held in October 1972, Mr. Krag resigned and was replaced by Anker Jørgensen. Denmark duly entered the EEC on January 1st, 1973. When a right-wing member of the Social Democrats resigned to form the Centre Democrats, Mr. Jørgensen could no longer obtain a majority and an election was called. The result was indecisive; the major parties all lost support, and a new Poujadist movement, the Progress Party, became the second largest party in the Folketing. After two weeks of negotiations the Liberals formed a minority cabinet, which was sworn in on December 19th, 1973. Poul Hartling, the Prime Minister, was faced with the problems of galloping inflation, a large trade deficit and popular discontent with the heavy taxation needed to pay for extensive social services. With only 22 seats in the Folketing the Liberals are dependent on the support of other parties, but have gained approval for their measures to combat inflation.

Government

Denmark is a constitutional monarchy, legislative power being vested in the Queen in conjunction with the Folketing (Parliament). Executive power is exercised by the Queen through her ministers. The Folketing is unicameral, elected by and from Danish subjects of 21 and over. The Faeroe

Islands and Greenland are each represented by two members.

Defence

Denmark maintains an Army of 24,000 men, a Navy of 6,300 men and an Air Force of 9,500 men. The Army has some 80,000 reserves, and there is a Volunteer Home Guard of 51,500 men. The Navy has destroyers, frigates, escort vessels, submarines, minelayers, minesweepers and fast patrol craft. The Air Force has fighters and fighter-bombers of American and British types. National Service was reduced to 9 months from October 1973. Denmark abandoned its neutrality after the Second World War and has been a member of NATO since 1949. Defence policy is largely geared to NATO co-operation. The defence budget for 1973-74 was 3,196 million kroner.

Economic Affairs

Danish agriculture is internationally competitive and is organized on a co-operative basis. Farmers and small-holders are grouped in co-operative societies which market the produce and conduct scientific research. The co-operatives are united in national federations. Butter, eggs and bacon are the main agricultural exports. Two-thirds of the land surface is used for agriculture and though this percentage has been declining recently the intensive nature of the farming has to a large extent maintained the level of production. However, Denmark has industrialized considerably in the last fifteen years and industry now contributes four times as much to the Gross National Product as does agriculture and accounts for nearly two-thirds of the country's exports. In spite of a great shortage of raw materials the iron and metal industry is now the most important producing group. The other major industries are food-processing and beverages, fishing, shipbuilding, engineering and chemicals. Recently Danish-designed furniture, electronics, porcelain, textiles and metal goods have been finding larger markets abroad. Most industrial concerns are small and privately owned, only the public services such as the post, railways, etc. being nationalized.

Over the last few years Denmark has experienced one of the highest rates of inflation in Europe. In 1973 consumer prices rose 10 per cent, with wage costs some 20 per cent above those of 1972. A strike in March and April, affecting two-thirds of the labour force in industry, was settled with a wage increase, a reduction of working hours and equal pay for women as part of an agreement which put up employers' costs. In October the Government announced a freeze of public expenditure and restraints on housing investment. Further anti-inflationary measures have been introduced by the new Liberal Government. The bank rate has been increased from 8 to 10 per cent, prices and profits frozen for two months and a state subsidy given to employers to keep costs down.

Denmark's balance of payments deficit is a problem as serious as inflation. The last surplus on merchandise trade was in 1956 and in the first half of 1973, while agricultural exports boomed following entry into the EEC, earnings

DENMARK—(INTRODUCTORY SURVEY)

from industrial exports rose by only 9.5 per cent while the cost of imports increased by 30 per cent. Denmark obtains 90 per cent of its energy needs from imported oil, and is thus severely affected by the rise in oil prices. Membership of the EEC has opened up new markets for Danish agriculture, but it has also contributed to inflationary demand pressures and helped to induce the rapid growth in imports.

Transport and Communications

There are about 2,500 kilometres of railways, most of which are operated by the State. There are over 64,000 kilometres of road, 93 per cent of which are hard surface. Ferry services connect the principal islands and Jutland and there are services to Sweden, Norway and Germany. Denmark maintains a large merchant navy with a displacement of nearly 4 million gross tons. The present international airport at Kastrup may be replaced in the 1980s by a new airport on the island of Saltholm. This, and the construction of a bridge across the Great Belt to link Zealand and Funen, are Denmark's contribution to a joint Danish-Swedish plan to improve communications. Sweden will build a road bridge and tunnel across the Sound separating the two countries, between Malmö and Copenhagen. It should be completed by 1985, thus linking Scandinavia to the Continent.

Social Welfare

Denmark was one of the first countries to introduce State social welfare schemes. Principal services cover unemployment, sickness, old age and disability and are financed largely by State subventions. Health insurance is compulsory for all citizens over 21.

Education

The Danish education system is at present undergoing numerous developments aimed at making it more flexible and comprehensive. Education is now compulsory and free for nine years between the ages of 7 and 16 years, though more and more children are attending kindergarten classes for a year before starting primary education and many more are staying for at least one year's further education. There are already plans to introduce a minimum of 12 years' compulsory schooling and vocational training.

For a long time the system has been based on grading according to examination results but is now beginning to provide the pupil with a greater freedom of choice. For the 14 to 16 age group the stream leading to the school-leaving examination (*realeksamen*) is gradually being combined with the non-academic stream. At the age of 16 or 17, pupils may transfer to a grammar school (*Gymnasium*) to take the university entrance examination (*studentereksamen*) after three years or they may take a new two-year

course leading to the higher preparatory examination certificate.

There are four universities and three technical universities in Denmark, with a university centre under construction at Aalborg. There are also several new junior colleges, and the traditional folk high schools which offer a wide range of further education opportunities.

Tourism

Tourists visit Denmark for the peaceful charm of its countryside and old towns, or for the sophistication of Copenhagen. Tourism accounts for about 8 per cent of foreign exchange earnings.

Visitors from Finland, Iceland, Norway and Sweden do not require a passport to enter Denmark.

Visas are not required for nationals of the following countries: Algeria, Australia, Austria, Belgium, Canada, Cyprus, France, Federal Republic of Germany, Greece, Ireland, Italy, Jamaica, Japan, Kenya, Liechtenstein, Luxembourg, Malaysia, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Pakistan, Portugal, San Marino, Sierra Leone, Singapore, South Africa, Spain, Switzerland, Tanzania, Thailand, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom and Dependencies, U.S.A., Yugoslavia, and all countries of South and Central America.

Sport

Fifteen per cent of the population take an active part in sports. Practically all sport is amateur. The national game is football, and rowing, swimming and sailing are popular. Other sports include tennis, the Danish game of hand-ball, shooting and fishing.

Public Holidays

1974: May 23 (Ascension Day), June 5 (Constitution Day), June 3 (Whit Monday), December 24, 25, 26 (Christmas), December 31 (New Year's Eve).

1975: January 1 (New Year's Day), March 27 (Maundy Thursday), March 28 (Good Friday), March 31 (Easter Monday), April 28 (Store Bededag).

THE CONSTITUTION

The main features of the 1953 Constitution are:

- (1) Changes in the succession law allowing a daughter to succeed to the throne in the absence of sons;
- (2) Abolition of the Upper House and the introduction of single-chamber Parliament;
- (3) The enfranchisement of Greenland, which will in future send two members to Parliament; and
- (4) Clause 20, which enables Parliament to assign some of its rights to an international body in the interest of international co-operation.

The form of government is a limited (constitutional) monarchy. The legislative authority rests jointly with the Crown and Parliament. Executive power is vested in the Crown, and the administration of justice is exercised by the courts. The Monarch can constitutionally "do no wrong". He exercises his authority through the Ministers appointed by him. The Ministers are responsible for the government of the country. The Constitution establishes the principle of Parliamentarism under which individual Ministers of the whole Cabinet must retire when defeated in Parliament by a vote of no confidence.

The Monarch acts on behalf of the State in international affairs. Except with the consent of the Parliament, he

cannot, however, take any action which increases or reduces the area of the Realm or undertake any obligation, the fulfilment of which requires the co-operation of the Parliament or which is of major importance. Nor can the Monarch, without the consent of the Parliament, terminate any international agreement which has been concluded with the consent of the Parliament.

Apart from defence against armed attack on the Realm or on Danish forces, the Monarch cannot, without the consent of the Parliament, employ military force against any foreign power.

The Parliament is an assembly consisting of not more than 179 members, two of whom are elected in the Faeroe Islands and two in Greenland. It is called the Folketing. Danish nationals, having attained 21 years of age, with permanent residence in Denmark, have the franchise and are eligible. The members of the Folketing are elected for four years. Election is by a system of proportional representation, with direct and secret ballot on lists in large constituencies. A bill adopted by the Folketing may be submitted to referendum, when such referendum is claimed by not less than one-third of the members of the Folketing and not later than three days after the adoption. The bill is void if rejected by a majority of the votes cast, representing not less than 30 per cent of all electors.

POLITICAL PARTIES

Socialdemokratiet (*The Social-Democratic Party*): Nyrops-gade 26, 1602 Copenhagen V; founded in 1871, finds its chief adherents among the industrial and farm workers. The Party's policy is based on democratic socialism. Number of members 170,000. Chair. ANKER JØRGENSEN; Gen. Sec. EYNER CHRISTIANSEN. Party organs: *Vor Politik* (quarterly) and *Ny Politik* (monthly).

Venstre (*The Liberal Party*): Hammerichsgade 14, Copenhagen V; founded in 1870. Its main adherents have been farmers but recently its votes have been distributed almost equally between the rural districts, the towns and built-up areas, so that it may claim to have adherents in all classes of the community. The main planks in the Party platform are free trade, a minimum of State interference, and the adoption, in matters of social expenditure, of a modern general social security system. Chair. POUL HARTLING; Sec.-Gen. KURT SORENSEN. Chief party organs: *Fyns Tidende*, *Vestkysten*, *Frederiksborg Amts Avis*, *Venstres Maanedssblad* (monthly), *Dansk Politik* (monthly).

Konservative Folkeparti (*Conservative Party*): Nyrops-gade 19, 1602 Copenhagen; founded in 1916, replacing the former Højreparti (the Right-Wing or old Conservative Party). The Party advocates free initiative and the maintenance of private property, but recognizes the right of the State to take action to keep the economic and social balance. Chair. HAUNSTRUP CLEMMESSEN; Gen. Sec. KAI AAGE ØRNSKOV; Political Spokesman POUL SCHLÜTER. Chief party organ: *Vor Tid*.

Socialistisk Folkeparti (*Socialist People's Party*): Folke-tinget, Christiansborg, Copenhagen; f. 1959, with Socialist aims, by AKSEL LARSEN; Chair. SIGURD ØMANN; Sec. LILLIAN UBBESEN. Chief party organ: *Minavisen* (daily).

Det Radikale Venstre (*The Radical Liberal Party*): Det radikale Venstres kontor, Christiansborg Slot, Copen-

hagen K; founded in 1905. The main points in its programme are reduction of armaments, supporting peace, international co-operation and the United Nations, arbitration in conflict between workers and employers, the establishment of smallholdings, social reform, and State control of trusts and monopolies. Advocates strengthening of private enterprise. Chair. HILMAR BAUNSGÅRD; Sec. S. BJØRN HANSEN. Chief party organs: *Politiken*, *Skive Folkeblad*, *Holbaek Amts Venstreblad*, *Roskilde Tidende*.

De Uafhaengige (*Independent Party*): Engkrogen, Mygdal 9800 Hjørring; f. 1953; Chair. JØRGEN ANDREASEN.

Danmarks Retsforbund (*Single Tax Party*): Kroghsgade 1, 2100 Copenhagen Ø; made its appearance in active politics about 1920. Its programme is closely allied to Henry George's teachings (single tax, free trade). Chair. IB CHRISTENSEN. Party organ: *Ret og Frihed* (monthly).

Danmarks Kommunistiske Parti (*Danish Communist Party*): Copenhagen K, Dr. Tvaergade 3; f. 1919. Leader KNUD JESPERSEN. Chief party organ: *Land og Folk*.

Venstresocialisterne (*Left Socialist Party*): f. 1967 as a result of a split from the Socialist People's Party. Collective leadership.

Centrums Demokraterne (*Centre Democrats*): f. 1973 by ERHARD JACOBSEN; opposes left-wing tendencies of Social Democrats and high taxation.

Kristeligt Folkeparti (*Christian People's Party*): f. 1970; inter-denominational grouping opposed to pornography and abortion.

Fremskridtspartiet (*Progress Party*): f. 1973 by MOGENS GLISTRUP; Poujadist movement whose policies include gradual abolition of income tax, disbandment of over 90 per cent of the civil service and abolition of diplomatic service and defence forces.

JUDICIAL SYSTEM

In Denmark the judiciary is independent of the Government. Judges are appointed by the Crown on the recommendation of the Minister of Justice and cannot be dismissed except by judicial sentence.

The ordinary courts are divided into three instances, namely the Lower Courts, the High Courts and the Supreme Court. There is one Lower Court for each of the eighty-four judicial districts in the country. These courts must have at least one legally trained judge and they hear the majority of minor cases. The two High Courts serve Jutland and the islands respectively. They serve as appeal courts for cases from the lower courts, but are also used to give first hearing to the more important cases. Each case must be heard by at least three judges. The Supreme Court, at which at least five judges must sit, is the court of appeal for cases from the Higher Courts. Usually only one appeal is allowed from either court, but in special instances the Minister of Justice may give leave for a second appeal, to the Supreme Court, from a case which started in a lower court.

There is a special Maritime and Commercial Court in Copenhagen, consisting of a President and Vice-President with legal training and a number of commercial and nautical assessors; and also a Labour Court, which deals with labour disputes.

An Ombudsman is appointed by Parliament, after each general election, and is concerned with defects in the laws or administrative provisions. He must render to Parliament an annual report.

The United Methodist Church: Northern Europe Area includes Denmark, Finland, Norway, Sweden; Bishop Dr. OLE E. BORGES, Sibyllegatan 18, 11442 Stockholm, Sweden.

There is also a Reformist community.

THE PRESS

Denmark's long press history dates from the first newspaper published in 1666, but it was not until press freedom was introduced by law in 1849 that newspapers began to assume their present importance. At four copies published daily for every ten inhabitants, the per capita circulation of Danish newspapers is one of the highest in the world. There are over 220 separate newspapers, and over 50 main dailies.

The freedom of the press is embodied in paragraph 77 of the 1953 Constitution and all censorship laws have been abolished. The legal limits to press comment are wide, legislation on defamation being chiefly concerned to protect the reputation of the individual. The Law of 1938 included provision for a Board of Denials and Corrections to be established to guard the individual's right to require a newspaper to correct factual errors. This Press Law makes editors legally responsible for the contents of a paper with the exception of signed articles for which the author is responsible.

Most newspapers and magazines are privately owned and published by joint concerns, co-operatives or limited liability companies. Ownership is usually restricted in number or confined to residents of the area in which the paper circulates.

The main concentration of papers is held by the *Berlingske Tidende* Group which owns *Berlingske Tidende*, *Berlingske Aftenavis*, *B.T.*, and the provincial *Jydske Tidende*, also three weekly magazines and a large printing works. In all this family organization controls some 25 per cent of the total daily newspaper circulation.

Another company, *Politiken A/S*, owns several dailies, including *Politiken* and *Ekstra Bladet*, one weekly and a large publishing house. *De Bergske Blade* owns a group of six Liberal papers.

Copenhagen accounts for 16 per cent of the national dailies and about half the total circulation. The provincial press has declined since the last war, but still tends to be more politically orientated than the majority of Copenhagen dailies. The Communist Party's *Land og Folk* is the only paper to be directly owned by a political party, although all papers show a fairly pronounced political leaning. The eight Social Democrat papers, headed by Copenhagen's *Aktuelt*, are owned and subsidized by the trade unions.

Daily newspapers have a far more influential place in

Danish life than weeklies. As the largest papers have only a small circulation outside the city and suburbs of Copenhagen, e.g. 14 per cent in the case of *Berlingske Tidende*, they can barely claim to be national. The most popular papers give a broad and serious news coverage; there is no really sensational press. The major Copenhagen dailies in order of circulation are *Ekstra Bladet*, *Politiken*, *B.T.*, *Berlingske Tidende* and *Aktuelt*. The serious evening paper *Information* and the weekly *Berlingske Aftenavis* are also influential. *Jyllands-Posten*, published at Aarhus, is the largest provincial paper.

FINANCE

(cap.=capital; p.u.=paid up; dep.=deposits; m.=million)

The National Bank of Denmark is the country's central bank. It is a self-governing institution under government supervision and has an independent initiative in monetary and credit policy. Under the National Bank Act of 1936 the Bank has the sole right to issue notes. The principal instruments of the Bank are now the discount rate, open market operations, credit ceilings on the lending of commercial and savings banks, and lending terms to the banks. The Bank fixes the rates of foreign exchange and administers the foreign exchange regulations.

The first Danish commercial bank was founded in 1846. Now there are some 75 banks with approximately 2,200 branches. Recent years have seen an increasing tendency towards mergers and technical co-operation between the banks. There are also some 220 savings banks. They are subject to certain restrictions on their commercial banking activities under the Savings Bank Act, but there is a considerable and growing overlap in the activities of the commercial banks and the savings banks. Both groups are under government supervision.

The Faeroes are a group of islands in the Atlantic between Scotland and Iceland with a total area of 1,399 square kilometres. The climate is mild in winter and cool in summer with a mean temperature of 7°C. The vegetation is mostly grass, moss and mountain bog, the only trees being found in plantations. Of these islands seventeen are inhabited and in 1970 the total population was 38,612. Some 10,000 of these live in Thorshavn, the capital. Most Faeroese are Lutherans belonging to the Danish National Church. The principal language is Faeroese but Danish must be taught in all schools. The flag (proportions 22 by 16) carries a red cross with a blue edge on a white field.

The Faeroe Islands have been under Danish administration since Queen Margrete of Denmark inherited Norway in 1380. The islands were taken over by the United Kingdom while Denmark was under German occupation but were restored immediately after the war. The Home Rule Act of 1948 gave them control over all their internal affairs but the Danish Folketing, to which the Faeroese send two members, looks after matters of mutual concern such as defence and foreign policy. Following Faeroese pressure, an agreement was reached limiting the annual

cod and haddock catch of foreign trawlers, from January 1st, 1974.

Economic Affairs

Only a small portion of the land surface is cultivated and as the summers are too cool for grain, the main crops are potatoes and vegetables and grass for the large number of sheep raised on the islands. Coal is mined at Suderoy and about one fifth of the working population is engaged in handicrafts. The most important sector of the Faeroese economy is fishing, which employs about a quarter of the labour force, contributed 29.7 per cent of a total G.D.P. of 590.7 million kroner in 1970, and accounts for nearly all the islands' exports. In January 1974, the *Lagtinget* decided not to join the EEC, but to negotiate a special trade agreement which would protect the fishing industry. Meanwhile their trade balance remains very unstable and they are dependent on Denmark to make good any deficit. Danish subsidies account for about 15 per cent of the Faeroese G.N.P.

In 1940 the Faeroese krona was introduced. It must, however, always be freely interchangeable with the Danish krone at the rate of 1:1. For exchange rate see under Denmark.

DENMARK—(THE FAEROE ISLANDS)

GOVERNMENT

The legislative body is the *Lagtinget* of up to thirty members elected on a basis of proportional representation. All Faeroese over the age of twenty have the right to vote. Based on the strength of the parties in the *Lagtinget* a small Government, the *Landsstyret*, is formed and this holds the executive power for all internal affairs. The *Lagmand* or Chairman has to ratify all *Lagtinget* laws. A commissioner known as the *Rigsombudsmand* represents the Kingdom and is in charge of the administration on the islands.

Rigsombudsmand: LEIF GROTH.

TRANSPORT

The main harbour is at Thorshavn; the other ports are at Fugelfjord, Klaksvig, Trangisvaag, Vaag and Vestermahavn. There are regular services to Denmark, Iceland and the Shetlands.

There is an airport on Vágur. Danair operates services to Kirkwall and Copenhagen, and Icelandair operates a service to Reykjavik.

EDUCATION

The school educational system is the same as that for Denmark. Further education on the islands is provided by an academy, founded in 1965, a teacher training college, 2 technical schools, a commercial school, 2 nautical schools, a school for marine engineering, a folk high school and a nursing school.

DENMARK—(GREENLAND)

GREENLAND

INTRODUCTORY SURVEY

Greenland is the world's largest island with a total area of two million square kilometres. Most of it is permanently covered by ice but 341,700 square kilometres of coastland is inhabitable. In 1971 the total population was 47,935 of which some 8,000 live in Godthåb, the largest town. Both Danish and Eskimo languages are used.

Greenland first came under Danish rule in 1380 although contact was lost between the sixteenth and eighteenth centuries. During the Second World War the U.S.A. took over control of Greenland but handed it back when Denmark was liberated from German rule. As part of the revision of the Danish constitution in 1953 Greenland became part of the kingdom and Denmark now takes care of all its external affairs, including defence. The Greenlanders are not subject to compulsory national service.

In October 1972 the Greenlanders voted by 9,894 to 4,062 against joining the EEC but, as part of Denmark, were bound by the Danish decision. Though arrangements have been made to safeguard Greenland's fishing interests, these are considered inadequate by many and some resentment of Danish domination of the economy, education and the professions has been expressed by Greenlanders.

Economic Affairs

Seal-hunting has traditionally been the main occupation in Greenland and it is still very important in the northern district. In the South sheep-rearing is on the increase and in the central coastal areas fishing is of prime importance though some industrial establishments are being set up. The world's only commercially exploitable deposits of cryolite are mined there, but output amounting to 67,000 tons in 1968 fell to 43,400 tons in 1971. Coal is mined at Qutdligssat, though production has fallen from 27,000 tons in 1968 to 16,000 tons in 1971. Apart from the minerals and fish and fish produce the main exports are sealskin and foxskin. It is expected that drilling for oil and gas may begin off the west coast in the summer of 1974. Recently there has been much prospecting for uranium and other minerals both in Greenland and on its continental shelf but the economy is still dependent on large subsidies of some 700 million kr. per year from Denmark.

Until 1950 Denmark had a monopoly of trade and industry in Greenland. Though this has now been abolished, the Royal Greenland Trade Department still controls about two thirds of the total turnover in export production. Denmark provided about 91 per cent of Greenland's imports in 1971, and took some 75 per cent of total exports.

GOVERNMENT

Denmark is represented in Greenland by the *Landshovding* or Governor. Until 1967 he presided over meetings of the *Landsrådd*, the provincial council, but since then they have elected their own chairman. This council, consisting of seventeen members, is elected by all Danish subjects over the age of 20 living in Greenland. All bills which relate to Greenland must be presented to the council before they go to the Folketing in Copenhagen. The Greenlanders are also able to vote for two members of the Folketing.

Landshovding: HANS LASSEN.

Chairman of Landsråd: LARS CHEMINITZ.

JUDICIAL SYSTEM

The island is divided into sixteen court districts and these courts all use lay assessors. For most cases these lower courts are for the first instance and appeal is to the *Landsret*, the higher court in Godthåb, which is the only one with a professional judge. This court hears the more serious cases and appeal is to the High Court in Copenhagen.

RELIGION

The Greenlandic Church comes under the Bishop of Copenhagen and the Ministry for Ecclesiastical Affairs. Responsibility for the inspection of vicarages in Greenland lies with a rural dean resident on the island.

TRANSPORT

Inland traffic is mainly by motorboat, sled, light aircraft and helicopter. Godthåb is the main port and there are also all-year ports at Faeringehavn, Frederikshåb and Sukkertoppen. There is an airport at Søndre Strømfjord for flights to Denmark, operated by SAS. In summer Icelandair run tourist flights from Reykjavik to Kulusuk Island in Angmagssalik fjord, and from Keflavik to Narssarssuaq on the west coast.

Grønlandsfly A/S: Godthåb; helicopter services between Godthåb, Søndre Strømfjord and 12 centres along the west coast, also flights between Søndre Strømfjord and Kulusuk on the east coast and Narssarssuaq in the south; fleet of six S-61N, three S-58T, one Bell Jet Ranger and two DC-6B; Pres. JØRGEN HØY; Chair. E. HESSELBJERG.

EDUCATION AND SOCIAL WELFARE

The educational system is the same as that for the main part of Denmark, except that the main language of instruction is Greenlandic. Danish is however quite widely used, as many teachers come from Denmark for a short term to relieve the shortage of local teachers. There is a school in every settlement and a teacher training college in Godthåb. In 1971/72 there were 96 schools of which a third had 20 or less pupils and another quarter 50 or less. There were 753 teachers, of whom 84 had teacher training in Greenland and 520 in Denmark.

There is a free health service for all residents, administered by the Danish Government.

FINLAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Finland is a republic in Northern Europe bordered in the far north by Norway and in the north-west by Sweden. The U.S.S.R. runs along the whole of the eastern frontier. Its western and southern shores are washed by the Baltic. The climate varies sharply with warm summers and very cold winters. The mean annual temperature is 6°C (43°F) in Helsinki and -0.4°C (31°F) in the far north. There are two official languages; 93.1 per cent of the population speak Finnish and 6.9 per cent speak Swedish. Finnish is a member of the small Finno-Ugrian group of languages which includes Hungarian. There is a small Lapp population in the north. Ninety-two per cent of the people belong to the National Lutheran Church of Finland and there are small groups of Roman Catholics, Methodists, Jews and other religious groups. The national flag (proportions 18 by 11) is white with an azure blue cross (the upright to the left of centre). The state flag has, at the centre of the cross, the national coat of arms. The capital is Helsinki.

Recent History

Finland ceded 12 per cent of her territory and paid very large reparations to the Soviet Union, with which she had been in conflict, at the close of the Second World War. In 1948 President Paasikivi and Stalin signed the Finno-Soviet Pact of Friendship, which was extended for twenty years from 1955, when the U.S.S.R. relinquished its military post on the Porkkala promontory. The Treaty of Friendship, Co-operation and Mutual Assistance between Finland and the Soviet Union was renewed for a further twenty years in 1970, and although its terms, calling for Finland to defend its territory against any attack upon the U.S.S.R., are strategically outmoded, it remains the cornerstone of Finnish foreign policy. For instance, Finland's trade agreement with the European Economic Community (EEC) and the European Coal and Steel Community, initialled in July 1972, was not signed until October 1973. The delay is generally attributed to Soviet pressure exerted during President Kekkonen's talks with Soviet leaders, who demanded a prior agreement with the Council for Mutual Economic Assistance (COMECON) and a guarantee that there would be no change in Finnish foreign policy as a result of association with the EEC. This guarantee was provided by a special law, passed in January 1973, extending President Kekkonen's term of office from 1974 to 1978. Finland joined the United Nations and the Nordic Council in 1955, and became an associate member of EFTA in 1961.

In the fifty-seven years Finland has been independent there have been fifty-five cabinets. Usually seven or eight parties have been represented in the parliament but none has ever been able to obtain an overall majority. Negotiations for a coalition government have often been lengthy; it took four months to form a government in 1970, and in January 1972 a month of negotiations following an election produced nothing. A minority government from the Socialist Party, led by Rafael Paasio, took office in

February. On September 4th, 1972, after an open government crisis of nearly seven weeks, a four-party majority government, led by Prime Minister Kalevi Sorsa (Social Democrat), was appointed. The parties represented in this government are the Social Democrats, the Centre Party, the Swedish People's Party and the Liberal People's Party.

Government

Parliament is unicameral and elected for four years by the system of proportional representation. Suffrage is universal and equal, and the minimum voting age is twenty. The President of the Republic is chosen for a six-year term by an electoral college elected by the citizens. The Council of State is the executive organ responsible to Parliament and members are appointed by the President.

Defence

The armed forces of Finland are restricted by treaty to about 42,000, mostly conscripts serving up to 11 months. The defence budget for 1973 was 843.2 million markkaa, and the total strength of the armed forces in the same year was 39,500, comprising Army 34,000, Navy 2,500, and Airforce 3,000. There are also 685,000 reserves and about 4,000 frontier defence troops. The forces are armed with weapons manufactured in the Soviet Union and the West. Finland follows a policy of strict neutrality, but her neutral status has not been legally recognized by the Soviet Union.

Economic Affairs

Forests cover 68.4 per cent of Finland's land area. Cultivation has been intensified in recent years and the country is one of the world's leading exporters of pulp and paper. Amongst the manufacturing industries, the textile and chemical industries in particular have experienced a rapid growth, but the metal industry and engineering suffer from a lack of capacity and skilled labour. The manufacture of furniture and other consumer durables is also important. Cereal and dairy farming are highly mechanized.

Following the recession of 1971, there has been a return to economic growth in Finland, based mainly on domestic demand. Exports have failed to expand at the same rate, due partly to a lack of industrial capacity and the full use of the resources of the timber industry. The trade deficit is increasing, and seems likely to continue to increase. In 1973, consumer prices were some 12 per cent higher than in 1972, the main boost to inflation coming from wage costs, which rose more than 13 per cent. While there is a shortage of skilled labour in the south, extensive structural unemployment continues in the less developed north and east.

A trade agreement between Finland and the EEC was ratified in November 1973 and came into effect on January 1st, 1974. Under this agreement, tariffs will be reduced in stages, leading to their abolition on most goods by 1977. Finland remains economically linked with the U.S.S.R. In 1973 a pipeline was opened to supply Soviet natural gas to Finnish industry, and a co-operation agreement was signed with COMECON.

Transport and Communications

There are 5,936 kilometres (3,790 miles) of railways which provide connections with Sweden and the Soviet Union. The railways are almost all state operated, most of the trains being run on diesel engines. There are 72,920 kilometres (45,317 miles) of highway, but traffic is relatively light. Extensive use is made of the canals which connect Finland's innumerable lakes; inland waterways are navigable by ships for 6,646 kilometres (4,129 miles). The Water Bus is a characteristic feature. In winter, water communications are restricted by the severe frost, but ice-breakers are used to open up channels for commercial traffic.

Social Welfare

Social Security covers unemployment, social insurance (national pensions, accident insurance and sickness insurance), social assistance (maternity allowances, child allowances, care of the disabled) and social welfare (public aid). Sickness insurance compensates the patient for a considerable part of the costs of medical care outside hospital and the general hospitals charge moderate fees.

Education

Compulsory education for eight years was introduced in 1921 and now applies between the ages of 7 and 16 years. There are two forms of education; the pupil may either attend primary school for 6 years and then civic school for at least 2 years, or he may first attend primary school for 4 years and then go to the 5-year junior secondary school. After completed compulsory education the pupil may transfer to a technical or other vocational school or institute. A new comprehensive school system, which is now being introduced and will be implemented by 1977, consists of six years of basic general education to be followed by three years of more specialized education. There are 17 universities and colleges at university level in Finland.

Tourism

Vast forests, Europe's largest inland water system, magnificent unspoilt scenery and the possibility of holiday seclusion are the chief attractions for the visitor to Finland. In the towns there are mediaeval churches and castles, but also modern Finnish architecture in both town and

country. The winter sports season is long. Tourist receipts have increased at a rate of 30-40 per cent a year since 1968. Receipts in 1972 were 970 million markkaa, about 6.4 per cent of total exports. Some 3.6 million tourists visited Finland in 1971, nearly all of them from other Nordic countries.

Citizens of Denmark, Iceland, Norway and Sweden do not require a passport to enter Finland.

Visas are not required by nationals of the following countries: Algeria, Argentina, Australia, Austria, Barbados, Belgium, Botswana, Brazil, Bulgaria, Canada, Chile, Colombia, Costa Rica, Cyprus, Ecuador, El Salvador, France, The Gambia, Federal Republic of Germany, Greece, Hungary, India, Iran, Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Lesotho, Liechtenstein, Luxembourg, Malawi, Malaysia, Malta, Mauritius, Mexico, Monaco, Morocco, Netherlands, Niger, Pakistan, Peru, Philippines, Portugal, Romania, San Marino, Singapore, Spain, Swaziland, Switzerland, Tanzania, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom, U.S.A., Uruguay and Yugoslavia.

Sport

The national game is pesäpallo, a form of baseball. Football, skiing, skating, ice hockey, athletics and bandy, a form of ice hockey, are popular sports.

Public Holidays

1974: May 1 (May Day), May 18 (Ascension) June 1 (Whit Monday), June 22 (Midsummer Day), November 2 (All Saints' Day), December 6 (Independence Day), December 25, 26 (Christmas).

THE CONSTITUTION

On December 6th, 1917, the Finnish Parliament approved a manifesto proclaiming the independence of the country. Recognition of this independence was received in the same month from the Russian Government, in January 1918 from France, Sweden and Germany, and later from other countries.

During the interregnum that ensued, the Parliament, having decided to exercise temporarily the authority belonging to the ruler of the State, on May 18th, 1918, authorized the Chairman of the Senate to exercise sovereign power, and thereafter, on December 12th, 1918, elected a Regent. Opinions were divided as to whether Finland should be a kingdom or a republic. But at the election of representatives in March 1919 the parties voting for a republic received a substantial majority, and a republican form of government was approved and proclaimed on July 17th, 1919.

THE PRESIDENT OF THE REPUBLIC

The President is elected for a term of six years by 300 electors. The electors are chosen by public vote in the same manner as members of the Parliament.

The President of the Republic is entrusted with supreme executive power. Legislative power is exercised by the Parliament in conjunction with the President. Both the President and the Parliament have the right of initiative in legislation. Laws passed by the Parliament are submitted to the President, who has the right of veto. If the President has not within three months assented to a law, this is tantamount to a refusal of his assent. A law to which the President has not given his assent will nevertheless come into force, if the Parliament elected at the next general election adopts it without alteration.

The President has also the right to issue decrees in certain events, to convene extraordinary meetings of the Parliament, to dissolve the Parliament, to order new elections to the Parliament, to grant pardons and dispensations, and to grant Finnish citizenship to foreigners.

The President's approval is necessary in all matters concerning the relations of Finland with foreign countries, and he is Supreme Commander of the Defence Forces of the Republic.

Such decisions as are arrived at by the President are made by him in the Council of State, except in matters pertaining to military functions and appointments.

GOVERNMENT

For the general administration of the country there is a Council of State, appointed by the President, and composed of the Prime Minister and the Ministers of the various Ministries. The members of the Council, who must

enjoy the confidence of the Parliament, are collectively responsible to it for their conduct of affairs, and for the general policy of the administration; while each member is responsible for the administration of his own Ministry.

To this Council or Cabinet the President can appoint supernumerary Ministers, who serve either as assistant Ministers or as Ministers without portfolio. The President also appoints a Chancellor of Justice, who must see that the Council and its members act within the law. If in his opinion the Council of State or an individual Minister has acted in a manner contrary to the law, the Chancellor of Justice must report the matter to the President of the Republic or in certain cases to the Parliament. In this way Ministers are rendered legally as well as politically responsible for their official acts.

THE PARLIAMENT

The Parliament is an assembly of one chamber with 200 members elected for four years by universal suffrage on a system of proportional representation, every man and woman who is twenty or over being entitled to vote. It assembles yearly without special summons. The ordinary duration of a session is 120 days, but the Parliament can at its pleasure extend or shorten its session. The opposition of one-third of the members can cause ordinary legislative proposals to be deferred till after the next elections. Discussion of questions relating to the constitutional laws belongs also the Parliament, but for the settlement of such questions certain delaying conditions (fixed majorities) are prescribed. The Parliament, besides taking part in legislation, has the right to determine the estimates, which, though not technically a law, are published as a law.

Furthermore, the Parliament has the right, in a large measure to supervise the administration of the Government. For this purpose it receives special reports, the Government also submitting an account of its administration every year, and a special account of the administration of national finances. The Chancellor of Justice submits a yearly report on the administration of the Council of State. The Parliament elects five auditors, who submit to it annual reports of their work, to see that the estimates have been adhered to. The Parliament also appoints every four years a Parliamentary Ombudsman (*Judicial Delegate of Parliament*), who submits to it a report, to supervise the observance of the laws.

The Parliament has the right to interrogate the Government. It can impeach a member of the Council of State or the Chancellor of Justice for not having conformed to the law in the discharge of his duties. Trials are conducted at a special court, known as the Court of the Realm, of which one-half of the members, that is to say, six, are elected by the Parliament for a term of three years.

THE PRESS

The 1919 Constitution provided safeguards for press freedom in Finland. And in the same year the Freedom of the Press Act developed and qualified this principle by defining the rights and responsibilities of editors and the circumstances in which the Supreme Court may confiscate or suppress a publication. In practice there are few restrictions but the proximity of the Soviet Union casts its shadow in the form of legislation penalising defamation of foreign heads of state and anything which may endanger relations with neighbouring states. Consequently this aspect of political commentary is very restrained. Otherwise the most notable offences for newspapermen concern libel and copyright. Two notable features of the press scene are the public's legal right of access to all official documents (with important exceptions), and since 1966 the right of the journalist to conceal his source of news.

Almost all daily newspapers are independent companies, most of which are owned by large numbers of shareholders. Newspaper chains are virtually unknown. But the Finnish press is a party press. The small number of papers which are generally considered left-oriented are usually owned by the political parties concerned, by trade unions, or by other workers' associations (the Social Democratic Party's chief organ is *Suomen Sosialdemokraatti*; the Social Democratic Workers' Union publishes *Päivän Sanomat*, and the People's Democratic League (Communist) *Kansan Uutiset*). On the other hand most of the right-wing newspapers are owned by private shareholders. Some even belong to private endowments. Leading organs of the Conservative Party are *Uusi Suomi* in Helsinki and *Aamulehti* in Tampere. The left-wing papers are subject to considerably closer influence from the parties to which they are affiliated than their right-wing counterparts. Privately owned newspapers—including some of the largest such as *Helsingin Sanomat* and *Turun Sanomat*—are usually independent of political parties, and the number of votes cast by the political parties in the 1966 election bears little relation to the respective circulation totals of affiliated newspapers.

Helsinki is the only large press centre, with a large number of daily papers and complete monopoly of the periodical field. Several large dailies are produced in provincial towns, as are a number of weekly and twice-weekly papers which provide an important news service to outlying areas. An important feature of the daily press is the large amount of space devoted to foreign news and also to commentary.

In 1972 there were 88 daily newspapers in Finland with a total circulation of about 2,200,000. Twelve of these dailies are printed in Swedish. A further 121 small local non-daily papers were also registered in 1970.

In order of circulation the most popular daily papers are: *Helsingin Sanomat*, *Aamulehti*, *Turun Sanomat*, *Uusi Suomi*, *Ilta-Sanomat* and *Hufvudstadsbladet* in Swedish. Those most respected for their standard of news coverage and commentary are *Helsingin Sanomat*, an independent paper able to devote six of its twenty pages to advertising, and the smaller conservative *Uusi Suomi*.

Where periodicals and magazines are concerned there are signs of concentration. Two of the largest companies, under joint management (*Yhtyneet Kuvalehdet Oy* and *Valiolehdet Oy*), publish seventeen periodicals with a total circulation of 750,000 copies. Consumer co-operatives and other organizations are very important publishers and use their periodicals as information media for both their members and their customers. Thus two co-operative leagues produce the weeklies *Me Kuluttajat* and *Yhteishyvä*.

There are 1,330 periodicals of which some 300 are in the nation's second language, Swedish. Among the leading weekly periodicals are the general interest *Apu* (287,364) and the illustrated news magazines *Viikkosanomat* (79,004) and *Suomen Kuvalehti* (75,000). The publications of the consumer co-operatives enjoy large circulations (the largest *Pirkka* (803,182) is distributed free) as do the chief women's magazines *Me Naiset* (169,981) and *Kotoliisi* (131,728). The more popular serious magazines include the fortnightly *Pellervo* specializing in economic affairs and *Valitut Palat* (the Finnish Readers' Digest).

FINANCE

Finland has had its own monetary system since 1860. The Central Bank suspended the redemption of bank notes in gold in 1931, and at the end of 1962 this redemption was totally abolished. Finland has been a member of the International Monetary Fund since 1948.

The Bank of Finland is the Bank of Issue under the guarantee and supervision of Parliament. Its Board of Management is appointed by the President of the Republic and the nine Bank Supervisors are elected by Parliament.

The Bank of Finland has very close connections with the central banks of the other Nordic countries and in 1962 an agreement was signed on short-term credits between these countries.

At the end of 1972 there were two large and five small commercial banks with 837 offices in the country. At that time Finland also had 302 savings banks.

An important part is played in the financial activities of the country by Co-operative banks. In 1972 there were 406 Co-operative banks and six mortgage banks. The savings departments of all co-operative stores accept deposits from the public.

The Post Office Savings Bank is also extremely important in the life of the country. It collects the petty savings from the public through the 2,950 local post offices, the 17 offices of the Bank of Finland, as well as through its own head office and 15 branches. The National Pension Institute and 62 private insurance companies also granted credits in 1970.

STATE OWNED INDUSTRIES

There has never been any government policy in Finland to nationalize industries. Occasionally, however, it has been found necessary for various reasons to give substantial state aid in setting up a company and the state has retained a majority of shares in these companies. All are administered as limited companies, the state being represented on the

Board of Management and at the General Meeting of Shareholders by either the relevant Minister or an official of the relevant Ministry.

In 1970 these companies employed 59,124 persons, about 10 per cent of the country's total industrial labour force. Exports from the state owned companies were over 16 per cent of the country's total exports.

FRANCE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The French Republic is situated in Western Europe and bounded to the north by the English Channel, to the east by Belgium, Luxembourg, the Federal Republic of Germany, Switzerland and Italy, to the south by the Mediterranean and Spain and to the west by the Atlantic Ocean. Climate is temperate throughout most of the country but in the south it is of the Mediterranean type with warm summers and mild winters. The principal language is French, which has numerous regional dialects, and small minorities speak Breton or Basque. About 90 per cent of the population are Roman Catholics. There are also other Christian and Jewish communities. The national flag (proportions three by two) carries three vertical bands of blue, white and red. The capital is Paris.

Recent History

After the liberation in 1944 there was provisional unicameral government under General de Gaulle. In 1946, following a referendum, the Fourth Republic was set up with the legislature composed of the National Assembly and the Council of the Republic. General de Gaulle retired from public life. Twenty-six cabinets were formed during the life of the Fourth Republic which came to an end in 1958 with an insurrection in Algiers and the threat of civil war facing the country. Invited by President Coty to form a government, General de Gaulle was invested as Prime Minister to rule by decree for six months. In September 1958, by an overwhelming majority in a referendum, a new constitution introducing important changes was adopted and the Fifth Republic came into being with General de Gaulle as its President. De Gaulle remained in power until April 27th, 1969. Having survived student and industrial unrest in 1968, which forced economic and educational reforms from the Government, he resigned following the defeat of a referendum concerning Reform of the Senate and Regionalism. Under de Gaulle, France, as well as being a leading force in the European Economic Community (EEC), became a nuclear power and followed an independent policy with regard to the U.S.A. and the Soviet Union. The era of de Gaulle was to a large extent an assertion of France's Great Power status and national prestige. His death in 1970 was deeply mourned.

Following de Gaulle's resignation, Georges Pompidou was elected President in June 1969. A new Government was formed under Jacques Chaban-Delmas, subsequently replaced by Pierre Messmer in July 1972. The Government maintained a large Parliamentary majority with three other parties as coalition partners of the Gaullist UDR, and it gradually transferred the political allegiance of Gaullists from their former exceptional leader to the support of a more traditionally-based political party. In the March 1973 general elections the electoral alliance of the Socialist and Communist parties, who had drawn up a common programme of government, failed to defeat the government coalition who were, however, returned with a reduced majority. After the elections the Government announced a programme of reforms, but it met with some

difficulty in carrying them out. Most notably, the project to reduce the term of the Presidency from 7 to 5 years had to be withdrawn. President Pompidou died in April 1974. Elections to choose his successor are to be held in May, with François Mitterrand as candidate of the combined Left and Chaban-Delmas and Giscard d'Estaing as rival Gaullist candidates.

The issue of Regional Reform and redistribution of power between Paris and the Provinces has been taken up by de Gaulle's successors, though with more caution. Two reforms put forward in 1971 included a reduction of France's large number of small *communes* (District Councils) and the replacement of existing regional consultative assemblies by two differentiated assemblies for each of the 21 administrative regions, one having a degree of control over local economic planning, the other having a consultative role. These reforms became effective early in 1974.

Under the leadership of Pompidou France continued to follow the independent foreign policy that was launched by de Gaulle, while maintaining close economic relations with her allies and playing a leading rôle in European and international affairs. World-wide protests have been provoked, however, by France's continuing series of atmospheric nuclear tests.

Overseas, France granted independence to most of her former colonies after the Second World War. In Indo-China, after prolonged fighting, Laos, Cambodia and Viet-Nam became fully independent in 1954. In Africa most of the French colonies in the West and Equatorial regions attained independence in 1960. Algeria became independent after a war lasting seven years, from 1955 to 1962, when French forces were finally withdrawn from Algeria and nearly all the many French settlers were repatriated.

All the former colonies in Africa, excepting only Guinea, continue their close association with France, many remaining members of the Franc Zone. They receive considerable economic aid and technical assistance from France as well as a guaranteed market for their exports. Much aid is also channelled to these territories through the Overseas Development Fund of the EEC. Recently, many of the former colonies have adopted a more critical attitude to continuing French political, economic and cultural influence. Also the conditions of African and North African nationals working in France, and their relations with the native population, have become a source of tension both in internal and external politics.

Government

According to the Constitution of 1958 the executive is composed of the President of the Republic and of a Council of Ministers headed by the Prime Minister. Legislative power is exercised by Parliament composed of a National Assembly and a Senate. The National Assembly is elected by direct adult suffrage for a term of five years. Senators are elected for a nine-year term by an electoral college. One third of the Senate membership is renewable every

three years. By an amendment following a national referendum in 1962 the President is henceforth elected not by an electoral college as hitherto but by direct universal suffrage for seven years. The local government areas were reformed in March 1964, when Metropolitan France was divided into 21 administrative regions containing 95 departments.

Defence

French military policy is decided by the Supreme Defence Council. Under a decree of January 1964, the Head of State, as Chairman of the Council, has direct responsibility for command of the French nuclear forces in case of atomic warfare. Military service is compulsory and lasts for 12–15 months. In 1973 the strength of the armed forces stood at 503,600 comprising: Army 332,400, Navy 69,000, and Air Force 102,000. Nuclear tests have been carried out in the Sahara and Pacific and seem likely to be continued. France withdrew from the military side of NATO during 1967. The defence budget totalled 34,800 million francs for 1973.

Economic Affairs

France is still West Europe's leading agricultural country with more than three-quarters of its area under cultivation. In 1972 agriculture, forestry and fishing accounted for 6 per cent of the Gross Domestic Product, while the agricultural working population represented 12.3 per cent of the total working population. Cereals, fruit, vegetables, livestock, butter and cheese are abundantly produced, and national consumption of these commodities is very high. The share of animal products in total agricultural production is about 50 per cent. French wines are an important export. More than half of the land is worked by owner-occupiers, and a third by tenant-farmers.

Since the Second World War French industry has expanded extremely rapidly. In 1946 the Commissariat Général du Plan (General Planning Office) was set up, the rôle of which is to co-ordinate projects initiated by other departments. Subsidiary to the General Commissariat are the Modernisation Commissions which elaborate individual plans. Every major field of industry is affected by the Commissions and particular progress has been made in electronics, transport, the processing industries and housing. To encourage expansion the Government offers public loans, tax relief and development incentives in certain areas. A wide variety of services such as tourism, fashion and catering play an important part in the French economy.

France's principal trade partners are the other countries of the European Economic Community, mainly Western Germany, Belgium and Italy. The largest French industries are steel (24 million tons in 1972) motor vehicles (3.3 million were produced in 1972), aircraft, mechanical and electrical engineering, textiles and chemicals. Large quantities of coal and iron ore are mined. France possessed valuable oil interests in the Sahara (now a part of Algeria) which are now exploited according to Franco-Algerian agreement.

France has greatly increased its exports in recent years, becoming the world's third largest exporter in 1973. It provides considerable grants and loans to underdeveloped countries, along with much technical advice and expert

help for development projects; in 1970 France's aid to developing countries totalled 3,431 million francs.

The franc was devalued by 11.1 per cent in August 1969, following the heavy drain on the reserves caused by the General Strike in 1968, and was accompanied by a rigid budgetary programme and credit restrictions. As a result, it has been possible to combine since then a steady rate of growth with a balance of expenditure and revenue. Despite an increase in consumer prices of about 9 per cent in 1973, controlling the rate of inflation remains a secondary concern in relation to the maintenance of economic growth. Although the rate of growth is expected to drop from 6.6 per cent in 1973 to 5.5 per cent in 1974, France will in this decade probably outstrip all her principal trading partners in terms of Gross National Product.

Industrial expansion is being aided by a high level of public investment in services, amenities and regional development, and by reforms of working practices in many industrial concerns. A policy of paying labour by monthly salary instead of by hourly rates is being instituted nationally. Despite recurrent industrial relations problems in many sectors, the French economy is expected to be strong enough to benefit from the enlargement of the EEC. However, a favourable trade balance of 6,683 million francs for 1973 did not seem sufficient protection against the effects of the oil crisis and in January 1974 the French government allowed the franc to float. An effective devaluation of 3 to 5 per cent took place.

Transport

After the last war France had to reconstruct much of its railway system. Now there are 36,700 kilometres of lines and French trains hold world records for speed. In 1972 there were 789,172 kilometres of highway, including 2,172 kilometres of motorway and 39,000 kilometres of major roads. Air France, one of the world's largest airlines, maintains many internal and external services. The French merchant marine totalled 4,231 vessels of nearly 7 million tons in 1971. There is an important network of inland waterways.

Social Welfare

France has evolved a comprehensive system of social security which is compulsory for all wage-earners, and latterly for farmers. State insurance requires contributions from both employers and employees, and provides for sickness, unemployment, maternity, disability through industrial accident and substantial allowances for large families. War veterans receive pensions and certain privileges, and widows the equivalent of three months' salary and pension. 80 per cent of all medical practitioners adhere to the state scheme. The patient pays directly for medical treatment and prescribed medicines, and then obtains reimbursement for all or part of the cost. Sickness benefits and pensions are related to the insured person's income and the length of time he has been insured. About one-fifth of the net national product is spent in health and welfare services. Social security benefits were widely extended in 1972, particularly with regard to the self-employed and owners of small businesses. A national minimum hourly wage is in force, and is periodically adjusted to keep pace with inflation. It was raised to 5.43 francs in December 1973.

FRANCE—(INTRODUCTORY SURVEY)

Education

France is divided into 23 educational districts called Académies, each responsible for the administration of education from primary to higher in its area.

Education is compulsory and free from the age of 6-16. At 11 all pupils enter the first cycle of the *Enseignement Secondaire* with a four-year general course. At the age of 15 they may then proceed to the second cycle choosing between the *cycle long* leading to the *baccalauréat* after three years and the *cycle court* leading to the *brevet d'études professionnelles* after two years with commercial, administrative, or industrial options. French secondary education has been academically formal with nationally uniform syllabuses and little contact between teacher and pupil. Disturbances erupted in the *Lycées* during and since 1968, since when reforms have been effected in the governing and disciplinary machinery of schools. A more fundamental reform, begun in 1963, entailed the gradual abolition of junior classes in the *Lycées* and the institution in their place of new junior comprehensives, *Collèges d'Enseignement Secondaire*, designed to narrow the gap between the *Lycée* and the previous alternative, the *Collège d'Enseignement Général*. Those who fail the rigorous *Baccalauréat* may follow other professional or technical options lasting one or two years.

The minimum qualification for entry to University faculties is the *baccalauréat*. The first degree, the *licence*, is obtained after three years of study, and the master's degree (*maîtrise*) and doctorate after four and five years respectively. The prestigious *Grandes Ecoles* complement the universities; entry to them is by competitive examination, and they have traditionally supplied France's administrative élite. The university population increased nearly threefold between 1960 and 1968, and the universities, despite considerable growth, failed to keep abreast of the expansion of numbers. The 1968 reforms in higher education aimed to increase university autonomy and render teaching methods less formal. Overcrowding and the lack of career outlets remain among other problems, however, and it is estimated that something like 70 per cent of university entrants do not complete their courses. University grants are rare and average about 3,000 francs.

Primary school teachers are trained in *Ecoles Normales d'Instituteurs*. Secondary school teachers must have a *licence* or *maîtrise*. They may also sit competitive state examinations to obtain the *Certificat d'Aptitude au Professorat de l'Etude (CAPES)*, or *Agrégation*. The Government is planning to establish new institutions for the training of secondary school teachers undertaking degree courses.

Expenditure on national education was 36,000 million francs in 1973, representing 18.4 per cent of the national budget. It was the highest single budget for a Government Department.

Tourism

France draws tourists from all over the world. Paris is famous for its boulevards, historic buildings, theatres, art treasures, fashion houses and restaurants, and for its many

music halls and night clubs. The Mediterranean and Atlantic coasts and the French Alps are the most popular tourist resorts but holidaymakers are to be found during the summer nearly everywhere. There are many ancient towns, the châteaux of the Loire, the fishing villages of Brittany and Normandy, and spas and places of pilgrimage such as Vichy and Lourdes. Corsica also attracts many tourists. Gastronomy is a tourist attraction throughout France. Following the growth of Spanish tourism, extensive tourist development has taken place in the Languedoc-Roussillon region; six new coastal resorts have been created by State and private enterprise to provide facilities for the increasing number of French tourists (growing to an estimated 40 million by 1985). In 1971, 14.7 million foreign tourists visited France.

Visas are not required for nationals of the following countries: Algeria, Andorra, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Cameroon, Canada, Central African Republic, Chad, Chile, Colombia, Congo (Brazzaville), Costa Rica, Cuba, Cyprus, Dahomey, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, Gabon, Federal Republic of Germany, Greece, Haiti, Honduras, Iceland, Ireland, Italy, Ivory Coast, Jamaica, Japan, Republic of Korea, Laos, Liechtenstein, Luxembourg, Madagascar, Malaysia, Mali, Mauritania, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Niger, Norway, Pakistan, Panama, Paraguay, Peru, Portugal, San Marino, Senegal, Singapore, South Africa, Spain, Sri Lanka, Sweden, Switzerland, Togo, Trinidad and Tobago, Tunisia, Turkey, United Kingdom and Dependencies, U.S.A., Upper Volta, Uruguay, Vatican.

Sport

There is a National Sports Council to advise the Government on policy regarding sport. The State makes its contribution to the development of popular education and sport through the Secretariat of State for Youth and Sports. Football and rugby are the two most popular games.

Public Holidays

1974: May 1 (Labour Day), May 23 (Ascension Day), June 3 (Whit Monday), July 14 (Fall of the Bastille), August 15 (Assumption), November 1 (All Saints' Day), November 11 (Armistice Day), December 25 (Christmas Day).

1975: January 1 (New Year's Day), March 31 (Easter Monday).

THE CONSTITUTION OF THE FIFTH REPUBLIC

Adopted by referendum, September 28th, 1958.

Preamble

The French people hereby solemnly proclaims its attachment to the Rights of Man and to the principles of national sovereignty as defined by the Declaration of 1789, confirmed and complemented by the Preamble of the Constitution of 1946.

By virtue of these principles and that of the free determination of peoples, the Republic hereby offers to the Overseas Territories that express the desire to adhere to them, new institutions based on the common ideal of liberty, equality and fraternity and conceived with a view to their democratic evolution.

Article 1. The Republic and the peoples of the Overseas Territories who, by an act of free determination, adopt the present Constitution thereby institute a Community.

The Community shall be based on the equality and the solidarity of the peoples composing it.

Chapter I.—On Sovereignty

Article 2. France shall be a Republic, indivisible, secular, democratic and social. It shall ensure the equality of all citizens before the law, without distinction of origin, race or religion. It shall respect all beliefs.

The national emblem shall be the tricolour flag, blue, white and red.

The national anthem shall be the "Marseillaise".

The motto of the Republic shall be "Liberty, Equality, Fraternity".

Its principle shall be government of the people, by the people, and for the people.

Article 3. National sovereignty belongs to the people, which shall exercise this sovereignty through its representatives and through the referendum.

No section of the people, nor any individual, may attribute to themselves or himself the exercise thereof.

Suffrage may be direct or indirect under the conditions stipulated by the Constitution. It shall always be universal, equal and secret.

All French citizens of both sexes who have reached their majority and who enjoy civil and political rights may vote under the conditions to be determined by law.

Article 4. Political parties and groups may compete for votes. They may form and carry on their activities freely. They must respect the principles of national sovereignty and of democracy.

Chapter II.—The President of the Republic

Article 5. The President of the Republic shall see that the Constitution is respected. He shall ensure, by his arbitration, the regular functioning of the public powers, as well as the continuity of the State.

He shall be the guarantor of national independence, of the integrity of the territory, and of respect for Community agreements and for treaties.

Article 6. The President of the Republic shall be elected for seven years by direct universal suffrage. The method of implementation of the present article shall be determined by an organic law.

Article 7. The President of the Republic shall be elected by an absolute majority of the votes cast. If such a majority

is not obtained at the first ballot, a second ballot shall take place on the second following Sunday. Those who may stand for the second ballot shall be only the two candidates who, after the possible withdrawal of candidates with more votes, have gained the largest number of votes on the first ballot.

Voting shall begin at the summons of the Government. The election of the new President of the Republic shall take place not less than twenty days and not more than thirty-five days before the expiration of the powers of the President in office. In the event that the Presidency of the Republic has been vacated for any reason whatsoever, or impeded in its functioning as officially declared by the Constitutional Council, after the matter has been referred to it by the Government and which shall give its ruling by an absolute majority of its members, the functions of the President of the Republic, with the exception of those covered by Articles 11 and 12 hereunder, shall be temporarily exercised by the President of the Senate and, if the latter is in his turn unable to exercise his functions, by the Government.

In the case of vacancy or when the impediment is declared to be final by the Constitutional Council, the voting for the new President shall take place, except in case of force majeure officially noted by the Constitutional Council, not less than twenty days and not more than thirty-five days after the beginning of the vacancy or of the declaration of the final nature of the impediment.

Articles 49 and 50 and Article 89 of the Constitution may not be put into application during the vacancy of the Presidency of the Republic or during the period between the declaration of the final nature of the impediment of the President of the Republic and the election of his successor.

Article 8. The President of the Republic shall appoint the Premier. He shall terminate the functions of the Premier when the latter presents the resignation of the Government.

At the suggestion of the Premier, he shall appoint the other members of the Government and shall terminate their functions.

Article 9. The President of the Republic shall preside over the Council of Ministers.

Article 10. The President of the Republic shall promulgate the laws within fifteen days following the transmission to the Government of the finally adopted law.

He may, before the expiration of this time limit, ask Parliament for a reconsideration of the law or of certain of its articles. This reconsideration may not be refused.

Article 11. The President of the Republic, on the proposal of the Government during [Parliamentary] sessions, or on joint motion of the two Assemblies published in the *Journal Officiel*, may submit to a referendum any bill dealing with the organization of the public powers, entailing approval of a Community agreement, or providing for authorization to ratify a treaty that, without being contrary to the Constitution, might affect the functioning of the institutions.

When the referendum decides in favour of the bill, the President of the Republic shall promulgate it within the time limit stipulated in the preceding article.

Article 12. The President of the Republic may, after consultation with the Premier and the Presidents of the

Assemblies, declare the dissolution of the National Assembly.

General elections shall take place twenty days at the least and forty days at the most after the dissolution.

The National Assembly shall convene by right on the second Thursday following its election. If this meeting takes place between the periods provided for ordinary sessions, a session shall, by right, be opened for a fifteen-day period.

There may be no further dissolution within a year following these elections.

Article 13. The President of the Republic shall sign the ordinances and decrees decided upon in the Council of Ministers.

He shall make appointments to the civil and military posts of the State.

Councillors of State, the Grand Chancellor of the Legion of Honour, Ambassadors and Envoys Extraordinary, Master Councillors of the Audit Office, prefects, representatives of the Government in the Overseas Territories, general officers, rectors of academies [regional divisions of the public educational system] and directors of central administrations shall be appointed in meetings of the Council of Ministers.

An organic law shall determine the other posts to be filled in meetings of the Council of Ministers, as well as the conditions under which the power of the President of the Republic to make appointments to office may be delegated by him to be exercised in his name.

Article 14. The President of the Republic shall accredit Ambassadors and Envoys Extraordinary to foreign powers; foreign Ambassadors and Envoys Extraordinary shall be accredited to him.

Article 15. The President of the Republic shall be commander of the armed forces. He shall preside over the higher councils and committees of national defence.

Article 16. When the institutions of the Republic, the independence of the nation, the integrity of its territory or the fulfilment of its international commitments are threatened in a grave and immediate manner and the regular functioning of the constitutional public powers is interrupted, the President of the Republic shall take the measures required by these circumstances, after official consultation with the Premier and the Presidents of the Assemblies, as well as with the Constitutional Council.

He shall inform the nation of these measures in a message.

These measures must be prompted by the desire to ensure to the constitutional public powers, in the shortest possible time, the means of accomplishing their mission. The Constitutional Council shall be consulted with regard to such measures.

Parliament shall meet by right.

The National Assembly may not be dissolved during the exercise of exceptional powers.

Article 17. The President of the Republic shall have the right of pardon.

Article 18. The President of the Republic shall communicate with the two Assemblies of Parliament by means of messages, which he shall cause to be read, and which shall not be the occasion for any debate.

Between sessions, the Parliament shall be convened especially to this end.

Article 19. The acts of the President of the Republic, other than those provided for under Articles 8 (first paragraph), 11, 12, 16, 18, 54, 56 and 61, shall be countersigned by the Premier and, should circumstances so require, by the appropriate ministers.

Chapter III.—The Government

Article 20. The Government shall determine and conduct the policy of the nation.

It shall have at its disposal the administration and the armed forces.

It shall be responsible to the Parliament under the conditions and according to the procedures stipulated in Articles 49 and 50.

Article 21. The Premier shall direct the operation of the Government. He shall be responsible for national defence. He shall ensure the execution of the laws. Subject to the provisions of Article 13, he shall have regulatory powers and shall make appointments to civil and military posts.

He may delegate certain of his powers to the ministers.

He shall replace, should the occasion arise, the President of the Republic as the Chairman of the councils and committees provided for under Article 15.

He may, in exceptional instances, replace him as the chairman of a meeting of the Council of Ministers by virtue of an explicit delegation and for a specific agenda.

Article 22. The acts of the Premier shall be countersigned, when circumstances so require, by the ministers responsible for their execution.

Article 23. The functions of Member of the Government shall be incompatible with the exercise of any parliamentary mandate, with the holding of any office, at the national level, in business, professional or labour organizations, and with any public employment or professional activity.

An organic law shall determine the conditions under which the holders of such mandates, functions or employments shall be replaced.

The replacement of the members of Parliament shall take place in accordance with the provisions of Article 25.

Chapter IV.—The Parliament

Article 24. The Parliament shall comprise the National Assembly and the Senate.

The deputies to the National Assembly shall be elected by direct suffrage.

The Senate shall be elected by indirect suffrage. It shall ensure the representation of the territorial units of the Republic. Frenchmen living outside France shall be represented in the Senate.

Article 25. An organic law shall determine the term for which each Assembly is elected, the number of its members, their emoluments, the conditions of eligibility, and the system of ineligibilities and incompatibilities.

It shall likewise determine the conditions under which, in the case of a vacancy in either Assembly, persons shall be elected to replace the deputy or senator whose seat has been vacated until the holding of new complete or partial elections to the Assembly concerned.

Article 26. No Member of Parliament may be prosecuted, searched for, arrested, detained or tried as a result of the opinions or votes expressed by him in the exercise of his functions.

No Member of Parliament may, during parliamentary session, be prosecuted or arrested for criminal or minor offences without the authorisation of the Assembly of which he is a member except in the case of *flagrant delicto*.

When Parliament is not in session, no Member of Parliament may be arrested without the authorisation of the Secretariat of the Assembly of which he is a member except in the case of *flagrant delicto*, of authorised prosecution or of final conviction.

FRANCE—(THE CONSTITUTION)

The detention or prosecution of a Member of Parliament shall be suspended if the Assembly of which he is a member so demands.

Article 27. Any compulsory vote shall be null and void. The right to vote of the members of Parliament shall be personal.

The organic law may, under exceptional circumstances, authorize the delegation of a vote. In this case, no member may be delegated more than one vote.

Article 28. Parliament shall convene by right in two ordinary sessions a year.

The first session shall begin on the first Tuesday of October and shall end on the third Friday of December.

The second session shall open on the last Tuesday of April; it may not last longer than three months.

Article 29. Parliament shall convene in extraordinary session at the request of the Premier or of the majority of the members comprising the National Assembly, to consider a specific agenda.

When an extraordinary session is held at the request of the members of the National Assembly, the closure decree shall take effect as soon as the Parliament has exhausted the agenda for which it was called, and at the latest twelve days from the date of its meeting.

Only the Premier may ask for a new session before the end of the month following the closure decree.

Article 30. Apart from cases in which Parliament meets by right, extraordinary sessions shall be opened and closed by decree of the President of the Republic.

Article 31. The members of the Government shall have access to the two Assemblies. They shall be heard when they so request.

They may call for the assistance of Commissioners of the Government.

Article 32. The President of the National Assembly shall be elected for the duration of the legislature. The President of the Senate shall be elected after each partial re-election [of the Senate].

Article 33. The meetings of the two Assemblies shall be public. An *in extenso* report of the debates shall be published in the *Journal Officiel*.

Each Assembly may sit in secret committee at the request of the Premier or of one-tenth of its members.

Chapter V.—On Relations Between Parliament and the Government

Article 34. Laws shall be voted by Parliament.

They shall establish the regulations concerning:

Civil rights and the fundamental guarantees granted to the citizens for the exercise of their public liberties; the obligations imposed by the national defence upon the person and property of citizens;

Nationality, status and legal capacity of persons, marriage contracts, inheritance and gifts;

Determination of crimes and misdemeanours as well as the penalties imposed therefor; criminal procedure; amnesty; the creation of new juridical systems and the status of magistrates;

The basis, the rate and the methods of collecting taxes of all types; the issue of currency.

They likewise shall determine the regulations concerning:

The electoral system of the Parliamentary Assemblies and the local assemblies;

The establishment of categories of public institutions;

The fundamental guarantees granted to civil and military personnel employed by the State;

The nationalisation of enterprises and the transfers of the property of enterprises from the public to the private sector.

Laws shall determine the fundamental principles of:

The general organization of national defence;

The free administration of local communities, of their competencies and their resources;

Education;

Property rights, civil and commercial obligations;

Legislation pertaining to employment, unions and social security.

The financial laws shall determine the financial resources and obligations of the State under the conditions and with the reservations to be provided for by an organic law.

Laws pertaining to national planning shall determine the objectives of the economic and social action of the State.

The provisions of the present article may be detailed and supplemented by an organic law.

Article 35. Parliament shall authorise the declaration of war.

Article 36. Martial law shall be decreed in a meeting of the Council of Ministers.

Its prorogation beyond twelve days may be authorized only by Parliament.

Article 37. Matters other than those that fall within the domain of law shall be of a regulatory character.

Legislative texts concerning these matters may be modified by decrees issued after consultation with the Council of State. Those legislative texts which shall be passed after the entry into force of the present Constitution shall be modified by decree only if the Constitutional Council has stated that they have a regulatory character as defined in the preceding paragraph.

Article 38. The Government may, in order to carry out its programme, ask Parliament for authorisation to take through ordinances, during a limited period, measures that are normally within the domain of law.

The ordinances shall be enacted in meetings of Ministers after consultation with the Council of State. They shall come into force upon their publication but shall become null and void if the bill for their ratification is not submitted to Parliament before the date set by the enabling act.

At the expiration of the time limit referred to in the first paragraph of the present article, the ordinances may be modified only by the law in those matters which are within the legislative domain.

Article 39. The Premier and the Members of Parliament alike shall have the right to initiate legislation.

Government bills shall be discussed in the Council of Ministers after consultation with the Council of State and shall be filed with the secretariat of one of the two Assemblies. Finance bills shall be submitted first to the National Assembly.

Article 40. The bills and amendments introduced by the Members of Parliament shall be inadmissible when their adoption would have as a consequence either a diminution of public financial resources or an increase in public expenditure.

Article 41. If it shall appear in the course of the legislative procedure that a Parliamentary bill or an amendment is not within the domain of law or is contrary to a delegation granted by virtue of Article 38, the Government may declare its inadmissibility.

In case of disagreement between the Government and the President of the Assembly concerned, the Constitutional Council, upon the request of one or the other, shall rule within a time limit of eight days.

Article 42. The discussion of bills shall pertain, in the first Assembly to which they have been referred, to the text presented by the Government.

An Assembly given a text passed by the other Assembly shall deliberate on the text that is transmitted to it.

Article 43. Government and Parliamentary bills shall, at the request of the Government or of the Assembly concerned, be sent for study to committees especially designated for this purpose.

Government and Parliamentary bills for which such a request has not been made shall be sent to one of the permanent committees, the number of which is limited to six in each Assembly.

Article 44. Members of Parliament and of the Government have the right of amendment.

After the opening of the debate, the Government may oppose the examination of any amendment which has not previously been submitted to committee.

If the Government so requests, the Assembly concerned shall decide, by a single vote, on all or part of the text under discussion, retaining only the amendments proposed or accepted by the Government.

Article 45. Every Government or Parliamentary bill shall be examined successively in the two Assemblies of Parliament with a view to the adoption of an identical text.

When, as a result of disagreement between the two Assemblies, it has been impossible to adopt a Government or Parliamentary bill after two readings by each Assembly, or, if the Government has declared the matter urgent, after a single reading by each of them, the Premier shall have the right to bring about a meeting of a joint committee composed of an equal number from both Assemblies charged with the task of proposing a text on the matters still under discussion.

The text elaborated by the joint committee may be submitted by the Government for approval of the two Assemblies. No amendment shall be admissible except by agreement with the Government.

If the joint committee does not succeed in adopting a common text, or if this text is not adopted under the conditions set forth in the preceding paragraph, the Government may, after a new reading by the National Assembly and by the Senate, ask the National Assembly to rule definitively. In this case, the National Assembly may reconsider either the text elaborated by the joint committee, or the last text voted by it, modified when circumstances so require by one or several of the amendments adopted by the Senate.

Article 46. The laws that the Constitution characterises as organic shall be passed and amended under the following conditions:

A Government or Parliamentary bill shall be submitted to the deliberation and to the vote of the first Assembly notified only at the expiration of a period of fifteen days following its introduction;

The procedure of Article 45 shall be applicable. Nevertheless, lacking an agreement between the two Assemblies, the text may be adopted by the National Assembly on final reading only by an absolute majority of its members;

The organic laws relative to the Senate must be passed in the same manner by the two Assemblies;

The organic laws may be promulgated only after a declaration by the Constitutional Council on their constitutionality.

Article 47. The Parliament shall pass finance bills under the conditions to be stipulated by an organic law.

Should the National Assembly fail to reach a decision on first reading within a time limit of forty days after a bill has been filed, the Government shall refer it to the Senate, which must rule within a time limit of fifteen days. The procedure set forth in Article 45 shall then be followed.

Should Parliament fail to reach a decision within a time limit of seventy days, the provisions of the bill may be enforced by ordinance.

Should the finance bill establishing the resources and expenditures of a fiscal year not be filed in time for it to be promulgated before the beginning of that fiscal year, the Government shall urgently request Parliament for the authorization to collect the taxes and shall make available by decree the funds needed to meet the Government commitments already voted.

The time limits stipulated in the present article shall be suspended when the Parliament is not in session.

The Audit Office shall assist Parliament and the Government in supervising the implementation of the finance laws.

Article 48. The discussion of the bills filed or agreed upon by the Government shall have priority on the agenda of the Assemblies in the order determined by the Government.

One meeting a week shall be reserved, by priority, for questions asked by Members of Parliament and for answers by the Government.

Article 49. The Premier, after deliberation by the Council of Ministers, shall make the Government responsible, before the National Assembly, for its programme or, should the occasion arise, for a declaration of general policy.

When the National Assembly adopts a motion of censure, the responsibility of the Government shall thereby be questioned. Such a motion is admissible only if it is signed by at least one-tenth of the members of the National Assembly. The vote may not take place before forty-eight hours after the motion has been filed. Only the votes that are favourable to a motion of censure shall be counted; the motion of censure may be adopted only by a majority of the members comprising the Assembly. Should the motion of censure be rejected, its signatories may not introduce another motion of censure during the same session, except in the case provided for in the paragraph below.

The Premier may, after deliberation by the Council of Ministers, make the Government responsible before the National Assembly for the adoption of a vote of confidence. In this case, this vote of confidence shall be considered as adopted unless a motion of censure, filed during the twenty-four hours that follow, is carried under the conditions provided for in the preceding paragraph.

The Premier shall have the right to request the Senate for approval of a declaration of general policy.

Article 50. When the National Assembly adopts a motion of censure, or when it disapproves the programme or a declaration of general policy of the Government, the Premier must hand the resignation of the Government to the President of the Republic.

Article 51. The closure of ordinary or extraordinary sessions shall by right be delayed, should the occasion arise, in order to permit the application of the provisions of Article 49.

Chapter VI.—On Treaties and International Agreements

Article 52. The President of the Republic shall negotiate and ratify treaties.

He shall be informed of all negotiations leading to the conclusion of an international agreement not subject to ratification.

Article 53. Peace treaties, commercial treaties, treaties or agreements relative to international organization, those that commit the finances of the State, those that modify provisions of a legislative nature, those relative to the status of persons, those that call for the cession, exchange or addition of territory may be ratified or approved only by a law.

They shall go into effect only after having been ratified or approved.

No cession, no exchange, no addition of territory shall be valid without the consent of the populations concerned.

Article 54. If the Constitutional Council, the matter having been referred to it by the President of the Republic, by the Premier, or by the President of one or the other Assembly, shall declare that an international commitment contains a clause contrary to the Constitution, the authorisation to ratify or approve this commitment may be given only after amendment of the Constitution.

Article 55. Treaties or agreements duly ratified or approved shall, upon their publication, have an authority superior to that of laws, subject, for each agreement or treaty, to its application by the other party.

Chapter VII.—The Constitutional Council

Article 56. The Constitutional Council shall consist of nine members, whose mandates shall last nine years and shall not be renewable. One-third of the membership of the Constitutional Council shall be renewed every three years. Three of its members shall be appointed by the President of the Republic, three by the President of the National Assembly, three by the President of the Senate.

In addition to the nine members provided for above, former Presidents of the Republic shall be members *ex officio* for life of the Constitutional Council.

The President shall be appointed by the President of the Republic. He shall have the deciding vote in case of a tie.

Article 57. The office of member of the Constitutional Council shall be incompatible with that of minister or Member of Parliament. Other incompatibilities shall be determined by an organic law.

Article 58. The Constitutional Council shall ensure the regularity of the election of the President of the Republic.

It shall examine complaints and shall announce the results of the vote.

Article 59. The Constitutional Council shall rule, in the case of disagreement, on the regularity of the election of deputies and senators.

Article 60. The Constitutional Council shall ensure the regularity of the referendum procedure and shall announce the results thereof.

Article 61. Organic laws, before their promulgation, and regulations of the parliamentary Assemblies, before they come into application, must be submitted to the Constitutional Council, which shall rule on their constitutionality.

To the same end, laws may be submitted to the Constitutional Council, before their promulgation, by the President of the Republic, the Premier or the President of one or the other Assembly.

In the cases provided for by the two preceding paragraphs, the Constitutional Council must make its ruling

within a time limit of one month. Nevertheless, at the request of the Government, in case of urgency, this period shall be reduced to eight days.

In these same cases, referral to the Constitutional Council shall suspend the time limit for promulgation.

Article 62. A provision declared unconstitutional may not be promulgated or implemented.

The decisions of the Constitutional Council may not be appealed to any jurisdiction whatsoever. They must be recognised by the public powers and by all administrative and juridical authorities.

Article 63. An organic law shall determine the rules of organization and functioning of the Constitutional Council, the procedure to be followed before it, and in particular of the periods of time allowed for laying disputes before it.

Chapter VIII.—On Judicial Authority

Article 64. The President of the Republic shall be the guarantor of the independence of the judicial authority.

He shall be assisted by the High Council of the Judiciary.

An organic law shall determine the status of magistrates.

Magistrates may not be removed from office.

Article 65. The High Council of the Judiciary shall be presided over by the President of the Republic. The Minister of Justice shall be its Vice-President *ex officio*. He may preside in place of the President of the Republic.

The High Council shall, in addition, include nine members appointed by the President of the Republic in conformity with the conditions to be determined by an organic law.

The High Council of the Judiciary shall present nominations for judges of the Court of Cassation [Supreme Court of Appeal] and for First Presidents of courts of appeal. It shall give its opinion under the conditions to be determined by an organic law on proposals of the Minister of Justice relative to the nominations of the other judges. It shall be consulted on questions of pardon under conditions to be determined by an organic law.

The High Council of the Judiciary shall act as a disciplinary council for judges. In such cases, it shall be presided over by the First President of the Court of Cassation.

Article 66. No one may be arbitrarily detained.

The judicial authority, guardian of individual liberty, shall ensure the respect of this principle under the conditions stipulated by law.

Chapter IX.—The High Court of Justice

Article 67. A High Court of Justice shall be instituted.

It shall be composed, in equal number, of members elected, from among their membership, by the National Assembly and by the Senate after each general or partial election to these Assemblies. It shall elect its President from among its members.

An organic law shall determine the composition of the High Court, its rules, as well as the procedure to be applied before it.

Article 68. The President of the Republic shall not be held accountable for actions performed in the exercise of his office except in the case of high treason. He may be indicted only by the two Assemblies ruling by identical vote in open balloting and by an absolute majority of the members of said Assemblies. He shall be tried by the High Court of Justice.

The members of the Government shall be criminally liable for actions performed in the exercise of their office and rated as crimes or misdemeanours at the time they

were committed. The procedure defined above shall be applied to them, as well as to their accomplices, in case of a conspiracy against the security of the State. In the cases provided for by the present paragraph, the High Court shall be bound by the definition of crimes and misdemeanours, as well as by the determination of penalties, as they are established by the criminal laws in force when the acts are committed.

Chapter X.—The Economic and Social Council

Article 69. The Economic and Social Council, at the referral of the Government, shall give its opinion on the Government bills, ordinances and decrees, as well as on the Parliamentary bills submitted to it.

A member of the Economic and Social Council may be designated by the latter to present, before the Parliamentary Assemblies, the opinion of the Council on the Government or Parliamentary bills that have been submitted to it.

Article 70. The Economic and Social Council may likewise be consulted by the Government on any problem of an economic or social character of interest to the Republic or to the Community. Any plan, or any bill dealing with a plan, of an economic or social character shall be submitted to it for its advice.

Article 71. The composition of the Economic and Social Council and its rules of procedure shall be determined by an organic law.

Chapter XI.—On Territorial Units

Article 72. The territorial units of the Republic shall be the communes, the Departments, and the Overseas Territories. Any other territorial unit shall be created by law.

These units shall be free to govern themselves through elected councils and under the conditions stipulated by law.

In the Departments and the Territories, the Delegate of the Government shall be responsible for the national interests, for administrative supervision, and for seeing that the laws are respected.

Article 73. Measures of adjustment required by the particular situation of the Overseas Departments may be taken with regard to the legislative system and administrative organization of those Departments.

Article 74. The Overseas Territories of the Republic shall have a particular organization, taking account of their own interests within the general interests of the Republic. This organization shall be defined and modified by law after consultation with the Territorial Assembly concerned.

Article 75. Citizens of the Republic who do not have ordinary civil status, the only status referred to in Article 34, may keep their personal status as long as they have not renounced it.

Article 76. The Overseas Territories may retain their status within the Republic.

If they express the desire to do so by decision of their Territorial Assemblies taken within the time limit set in the first paragraph of Article 91, they shall become either Overseas Departments of the Republic or, organized into groups among themselves or singly, member States of the Community.

Chapter XII.—On the Community

Article 77. In the Community instituted by the present Constitution, the States shall enjoy autonomy; they shall administer themselves and, democratically and freely, manage their own affairs.

There shall be only one citizenship in the Community. All citizens shall be equal before the law, whatever their

origin, their race and their religion. They shall have the same duties.

Article 78. The Community shall have jurisdiction over foreign policy, defence, the monetary system, common economic and financial policy, as well as the policy on strategic raw materials.

In addition, except by special agreement, control of justice, higher education, the general organization of external and common transport, and telecommunications shall be within its jurisdiction.

Special agreements may establish other common jurisdictions or regulate the transfer of jurisdiction from the Community to one of its members.

Article 79. The member States shall benefit from the provisions of Article 77 as soon as they have exercised the choice provided for in Article 76.

Until the measures required for implementation of the present title go into force, matters within the common jurisdiction shall be regulated by the Republic.

Article 80. The President of the Republic shall preside over and represent the Community.

The Community shall have, as organs, an Executive Council, a Senate and a Court of Arbitration.

Article 81. The member States of the Community shall participate in the election of the President according to the conditions stipulated in Article 6.

The President of the Republic, in his capacity as President of the Community, shall be represented in each State of the Community.

Article 82. The Executive Council of the Community shall be presided over by the President of the Community. It shall consist of the Premier of the Republic, the heads of Government of each of the member States of the Community, and of the ministers responsible for the common affairs of the Community.

The Executive Council shall organize the co-operation of members of the Community at Government and administrative levels.

The organization and procedure of the Executive Council shall be determined by an organic law.

Article 83. The Senate of the Community shall be composed of delegates whom the Parliament of the Republic and the legislative assemblies of the other members of the Community shall choose from among their own membership. The number of delegates of each State shall be determined, taking into account its population and the responsibilities it assumes in the Community.

The Senate of the Community shall hold two sessions a year, which shall be opened and closed by the President of the Community and may not last more than one month each.

The Senate of the Community, upon referral by the President of the Community, shall deliberate on the common economic and financial policy, before laws in these matters are voted upon by the Parliament of the Republic, and, should circumstances so require, by the legislative assemblies of the other members of the Community.

The Senate of the Community shall examine the acts and treaties or international agreements, which are specified in Articles 35 and 53, and which commit the Community.

The Senate of the Community shall take enforceable decisions in the domains in which it has received delegation of power from the legislative assemblies of the members of the Community. These decisions shall be promulgated in the same form as the law in the territory of each of the States concerned.

An organic law shall determine the composition of the Senate and its rules of procedure.

Article 84. A Court of Arbitration of the Community shall rule on litigations occurring among members of the Community.

Its composition and its competence shall be determined by an organic law.

Article 85. By derogation from the procedure provided for in Article 89, the provisions of the present title that concern the functioning of the common institutions shall be amendable by identical laws passed by the Parliament of the Republic and by the Senate of the Community.

The provisions of the present title may also be revised by agreements concluded between all states of the Community: the new provisions are enforced in the conditions laid down by the Constitution of each state.

Article 86. A change of status of a member State of the Community may be requested, either by the Republic, or by a resolution of the legislative assembly of the State concerned confirmed by a local referendum, the organization and supervision of which shall be ensured by the institutions of the Community. The procedures governing this change shall be determined by an agreement approved by the Parliament of the Republic and the legislative assembly concerned.

Under the same conditions, a Member State of the Community may become independent. It shall thereby cease to belong to the Community.

A Member State of the Community may also, by means of agreement, become independent without thereby ceasing to belong to the Community.

An independent State which is not a member of the Community may, by means of agreements, adhere to the Community without ceasing to be independent.

The position of these States within the Community is determined by the agreements concluded for that purpose, in particular the agreements mentioned in the preceding paragraphs as well as, where applicable, the agreements provided for in the second paragraph of article 85.

Article 87 The particular agreements made for the implementation of the present title shall be approved by the Parliament of the Republic and the legislative assembly concerned.

Chapter XIII.—On Agreements of Association

Article 88. The Republic or the Community may make agreements with States that wish to associate themselves with the Community in order to develop their own civilisations.

Chapter XIV.—On Amendment

Article 89. The initiative for amending the Constitution shall belong both to the President of the Republic on the proposal of the Premier and to the Members of Parliament.

The Government or Parliamentary bill for amendment must be passed by the two Assemblies in identical terms. The amendment shall become definitive after approval by a referendum.

Nevertheless, the proposed amendment shall not be submitted to a referendum when the President of the Republic decides to submit it to Parliament convened in Congress; in this case, the proposed amendment shall be approved only if it is accepted by a three-fifths majority of the votes cast. The Secretariat of the Congress shall be that of the National Assembly.

No amendment procedure may be undertaken or followed if it is prejudicial to the integrity of the territory.

The republican form of government shall not be the object of an amendment.

Chapter XV.—Temporary Provisions

Article 90. The ordinary session of Parliament is suspended. The mandate of the members of the present National Assembly shall expire on the day that the Assembly elected under the present Constitution convenes.

Until this meeting, the Government alone shall have the authority to convene Parliament.

The mandate of the members of the Assembly of the French Union shall expire at the same time as the mandate of the members of the present National Assembly.

Article 91. The institutions of the Republic, provided for by the present Constitution, shall be established within four months counting from the time of its promulgation.

This period shall be extended to six months for the institutions of the Community.

The powers of the President of the Republic now in office shall expire only when the results of the election provided for in Articles 6 and 7 of the present Constitution are proclaimed.

The member States of the Community shall participate in this first election under the conditions derived from their status at the date of the promulgation of the Constitution.

The established authorities shall continue in the exercise of their functions in these States according to the laws and regulations applicable when the Constitution goes into force, until the establishment of the authorities provided for by their new regimes.

Until its definitive constitution, the Senate shall consist of the present members of the Council of the Republic. The organic laws that shall determine the definitive constitution of the Senate must be passed before July 31st, 1959.

The powers conferred on the Constitutional Council by Articles 58 and 59 of the Constitution shall be exercised, until the establishment of this Council, by a committee composed of the Vice-President of the Council of State, as Chairman, the First President of the Court of Cassation, and the First President of the Audit Office.

The peoples of the member States of the Community shall continue to be represented in Parliament until the entry into force of the measures necessary to the implementation of Chapter XII.

Article 92. The legislative measures necessary to the establishment of the institutions and, until they are established, to the functioning of the public powers, shall be taken in meetings of the Council of Ministers, after consultation with the Council of State, in the form of ordinances having the force of law.

During the time limit set in the first paragraph of Article 91, the Government shall be authorised to determine, by ordinances having the force of law and passed in the same way, the system of elections to the Assemblies provided for by the Constitution.

During the same period and under the same conditions, the Government may also adopt measures, in all domains, which it may deem necessary to the life of the nation, the protection of citizens or the safeguarding of liberties.

ELECTORAL LAW, 1958

The Deputies of the National Assembly for Metropolitan France are elected under a single-member constituency system, with two ballots where the first does not produce an absolute majority. A candidate requires a simple majority in the second ballot to be successful. There are 465 individual constituencies, each with approximately 93,000 electors. Any candidate polling less than 5 per cent of the votes loses his deposit.

The Overseas Territories elect their representatives under the old system of proportional representation.

The members of the Senate are elected for a nine-year term by an electoral college composed of the members of the National Assembly, delegates from the Councils of the Departments and delegates from the Municipal Councils. One-third of the Senate is renewable every three years. There are 264 Senators for Metropolitan France, 13 for the Overseas Departments and Territories and 6 senators representing the French living outside France.

* Including the 9 seats created in the Paris region by a law passed in July 1966.

POLITICAL PARTIES

Union des Démocrates pour la République: 123 rue de Lille, Paris 7e. Obtained 185 seats in the National Assembly in the election of 1973.

Policies: to continue General de Gaulle's policy. In foreign affairs, it aims at the development of a more independent rôle for France in the Western Alliance.

Leaders: ALEXANDRE SANGUINETTI (Sec.-Gen.), PIERRE MESSMER, MICHEL DEBRÉ, JACQUES CHABAN-DELMAS, MAURICE COUVE DE MURVILLE, CLAUDE LABBÉ (Pres. of U.D.R. Group in National Assembly).

Publs. *La Nation* (daily), *Démocrates* (monthly), *Les Cahiers* (fortnightly).

Fédération Nationale des Républicains Indépendants: 195 blvd. Saint-Germain, Paris 7e; f. 1966; liberal-conservative party allied to the U.D.R. Obtained 55 seats in the National Assembly in the election of March 1973.

Leaders: VALÉRY GISCARD D'ESTAING (Pres.), JEAN PIERRE SOISSON, ROGER CHINAUD, JACQUES DOMINATI, MICHEL PONTATOWSKI (Sec.-Gen.), MICHEL D'ORNANO (President National Assembly Group).

Publs. *France Moderne*, *L'Economie*.

Parti Socialiste (Socialist Party): 12 Cité Malesherbes, Paris 9e.

Policies: Belief in a planned economy, full employment and the eventual attainment of socialism through the nationalization of key industries. Obtained 89 seats in the National Assembly in the 1973 election.

Leaders: FRANÇOIS MITTERRAND (First Sec.), PIERRE MAUROY, PIERRE BEREGOVY, JEAN-PIERRE CHEVÈNEMENT, HENRI DELISLE, CLAUDE ESTIER, LIONEL JOSPIN, GÉRARD JACQUET, EMILE LOO, DIDIER MOTCHANE, ROBERT PONTILLON, GEORGE SARRE, DOMINIQUE TADDEI.

Publ. *l'Unité*.

Parti Radical (Radical Party): 1 place de Valois, Paris 1er.; great centre party of the Third Republic, subsequently much weakened by internal dissension. The party was given a new impetus by J.-J. Servan-Schreiber's election as the party's president in October 1971; a left-wing splinter group left the Party in 1972 under the leadership of Robert Faure and the previous President, Maurice Faure. It has recently joined with the *Centre Démocrate* to form the *Mouvement Réformateur*, which obtained 29 seats in the 1973 election.

Policies: The *Mouvement Réformateur*, formed in 1971, aims to create a framework to allow the development of a French Social Democracy.

JUDICIAL SYSTEM

The Judiciary is independent of the Government. Judges of the Court of Cassation and the First President of the Court of Appeal are appointed by the executive from nominations of the High Council of the Judiciary.

Justices of the Peace (*juges de paix*) were abolished by the reforms of December 1958. Subordinate cases are now heard by **Tribunals of Instance** (*tribunaux d'instance*), of which there are 454, and more serious cases by **Tribunals of Great Instance** (*tribunaux de grande instance*), of which there are 175. Parallel to these Great Tribunals are the **Tribunals of Commerce** (*tribunaux de commerce*), for commercial cases, composed of judges elected by tradesmen and manufacturers among themselves. These do not exist in every district. Where there is no Tribunal of Commerce, commercial disputes are judged by Tribunals of Great Instance.

The Boards of Arbitration (*Conseils de Prud'hommes*) consist of an equal number of workers or employees and employers ruling on the differences which arise over Contracts of Work.

The Correctional Courts (*Tribunaux correctionnels*) for criminal cases corresponded to the Tribunal of Great Instance for civil cases. They pronounce on all graver offences (*délits*), including those involving imprisonment.

Offences committed by juveniles of under 18 years go before specialized tribunals: **Tribunals for Children**.

From all these Tribunals appeal lies to the **Courts of Appeal** (*Cours d'Appel*).

The Courts of Assize (*Cours d'Assises*) have no regular sittings, but are called when necessary to try every important case, for example, murder. They are presided over by judges who are members of the Courts of Appeal and composed of elected judges (jury). Their decision is final, except where shown to be wrong in law, and then recourse is had to the **Court of Cassation** (*Cour de Cassation*).

The Court of State Security (*Cour de Sécurité de l'Etat*) was instituted by two laws on January 15th, 1963. It consists, generally, of three civil magistrates, the President and two members being general or superior officers: this court has jurisdiction over crimes and misdemeanours against the Security of the State in peace time: its decisions are then sent to the **Court of Cassation** (*Cour de Cassation*).

The Court of Cassation is not a supreme court of appeal but a higher authority for the proper application of the law. Its duty is to see that judgments are not contrary either to the letter or the spirit of the law; any judgment annulled by the Court of Cassation involves the trying of the case anew by a court of the same category as that which made the original decision.

ADMINISTRATIVE JURISDICTION

Certain cases arising between civil servants (when on duty) and the government, or between any citizen and the government are judged by special administrative courts. The **Administrative Tribunals** (*Tribunaux Administratifs*) of which there are 22, are situated in the capital of each area; the **Council of State** (*Conseil d'Etat*), see below, has its seat in Paris.

Tribunal of Disputes (*Tribunal des Conflits*): Decides whether cases shall be submitted to the ordinary or the administrative courts. It is composed of: Pres. THE MINISTER OF JUSTICE; Vice-Pres. M. HEUMANN; four Counsellors of the Court of Cassation and three Counsellors of State.

Cour des Comptes (*Court of Accounts*), 13 rue Cambon, Paris 1er: is an administrative tribunal charged with judging the correctness of public accounts. It is the judge of common law of all public accounts laid before it. The judgments of the Court of Accounts may be annulled by the Council of State.

First President: M. ARNAUD.

Presidents: MM. MERVEILLEUX DU VIGNAUX, LE VERT, DE CHILLAZ, FAVIER, MONS, LE CONTE.

Solicitors-General: MM. AUMAGE, VACQUIER.

COUNCIL OF STATE

Palais-Royal, Paris

Conseil d'Etat (*Council of State*): Has a double role: it is a council of the central power and an administrative tribunal. As the consultative organ of the government, it gives opinions in the legislative and administrative domain (interior, finance, public works and social section). In administrative jurisdiction it has three functions: to judge

in the first and last resort such cases as appeals against excess of power laid against official decrees or individuals; to judge appeals against judgments made by administrative tribunals and resolutions of courts of litigation; and to annul decisions made by various specialised administrative authorities which adjudicate without appeal, such as the Court of Accounts.

President of the Council: THE PRIME MINISTER.

Vice-President: M. CHENOT.

Presidents of Sections: MM. FOUAN, LAROQUE, MARTIN, ODENT, MASPETIOL.

General Secretary: M. DUCAMIN.

THE PRESS

The French Press, distinguished for its vitality and variety, has enjoyed (since the fundamental legislation of 1881) a continuous period of freedom interrupted only by the two world wars. This detailed and liberal law affirmed the right of individuals to produce newspapers and provided penalties for such abuses as defamation and the publication of false news or matter liable to provoke crime. Article 26, which has been frequently invoked in recent years, penalizes matter judged to be offensive to the Head of State. In March 1968 the author and publisher of a pamphlet designed to make public the workings of Article 26 were both found guilty of insulting the President and were fined.

A number of amendments have been introduced modifying this legislation. In 1944 it was decreed that the owner of a daily or weekly newspaper stood legally responsible for it; the director of a daily with circulation of over 50,000 or of a weekly with circulation over 10,000 may not derive his main source of income from industrial or commercial holdings, and may not be director of more than one daily paper. In 1945 an order was introduced penalizing the dissemination of inaccurate news in bad faith so as to disturb the peace. A law in 1946 authorized the confiscation of property in cases of newspapers guilty of collaboration during the Occupation. The Law concerning papers for Children and Young People in 1949 prohibited editors from presenting in an attractive light "banditry, theft, laziness, cowardice, hatred, debauchery, criminal acts or acts liable to demoralize the young or inspire racial prejudice". The status of journalists was officially defined in the law of March 1935 which gave them certain privileges in such matters as holidays, salaries and protection against dismissal.

In addition to these pieces of legislation there are a number of articles in the Penal Code affecting the Press, sometimes quite harshly. Article 75 penalizes the disclosure of defence secrets, and Article 76 penalizes any disclosure of military intelligence not officially authorized.

All periodicals appearing regularly at least four times a year and all daily papers are exempt by law from turnover tax. This privilege, which amounts to a virtual subsidy, gives papers a degree of protection from the dangers of commercial competition.

Government control of the state radio and television service before May 1968 was exercised through the Inter-ministerial Liaison Service for Information (S.L.I.I.), which decided the items the broadcasting services could not cover and the official news they should cover. Such control came to be seen as increasingly restrictive during the crisis of May and June 1968 and, after some attempts by journalists working for the O.R.T.F. (Office de Radio et Télévision Française) to produce better coverage of developments in the streets and factories, a partial strike of O.R.T.F. employees which had begun on May 17th became a full-scale stoppage a week later. The strike lasted until July 13th, well after most of the other workers had ended their stoppages. During the crisis *Le Monde's* ability to provide exhaustive coverage almost doubled

its circulation in a month, so that by the end of May its sales were up to 756,000. Although the figures later dropped, they still remain at 100,000 more than at the beginning of 1968. Other papers were less able to derive advantage from the O.R.T.F.'s lack of competition. Apart from the breakdown in the normal channels of distribution (which makes *Le Monde's* rise in circulation even more remarkable), papers like *Figaro* and *Le Parisien Libéré* also had to contend with stoppages in production when the printers considered editorials biased.

At the end of July 102 radio and television journalists who had taken part in the strike were dismissed "in the interests of greater efficiency". Other measures were taken to reorganize the O.R.T.F., such as the abolition of the S.L.I.I., and in 1972 a radical restructuring of the television service was effected, following disclosures of illicit advertising. Further difficulties arose in the course of 1973 over alleged left-wing bias in programme-content. The president of the O.R.T.F. was dismissed and government control reasserted. The press has remained relatively free of such interference.

However, the introduction in 1968 of branded-goods advertising on television accelerated the trend towards concentration in the press, since most newspapers received at least half of their income from advertising and some, like *Figaro*, as much as 80 per cent. A further blow to the newspapers was the large increase in the cost of newsprint in 1971; in the first half of 1972 the newspapers were given 15m. frs. "exceptional assistance" to offset these costs. Between 1892 and 1966 the number of French dailies was reduced from 414 to 84, and the decrease has been especially marked since 1945.

No really large press groups have emerged, as in Britain or West Germany, mainly because of the importance of the provincial press, which is related in turn to the strength of the republican tradition, dating from the early days of the Third Republic, and the circumstances of the German occupation, which cut Paris off from the rest of France. Hence there are no really "national" newspapers in France. Two-thirds of the population read only provincial papers; and of the Paris papers only *France-Soir* and *Le Parisien Libéré* have circulations approaching one million, with their two closest rivals in Paris, *Figaro* and *Le Monde*, each remaining well below the 500,000 mark, although nearly half of these sales are outside the metropolis. The increasing financial insecurity and heavy dependence on advertising has forced many papers into various schemes of rationalization. Among provincial papers the trend has been towards advertising pools, and six groups have now been formed, each centred on one or two papers, covering most of the country. The agreement between *Le Progrès de Lyon* group and the *Dauphiné Libéré* group of Grenoble covers not only a unified advertising administration but also common printing arrangements and the use of common copy. Other papers have sought stability by allowing staff participation in the controlling companies. Thus *Le Monde* in March 1968 widened the block of shares distributed among its em-

ployees under the 1951 scheme to give its journalists a controlling interest in the company's capital; and *Figaro's* journalists claimed ultimate control over editorial decisions and pressed their demands with a 24-hour strike in October 1968.

The weekly press has advanced strikingly in recent years, helped by the adoption of new formats and printing techniques and by the abandonment of specific political standpoints. The two best examples of this are *L'Express*, which remodelled itself on *Time* in 1964, and *France-Observateur* which became *Le Nouvel Observateur* at about the same time, improving its presentation considerably but still remaining committed to the Left.

In contrast to the situation before the war only three papers of the contemporary press are organs of political parties, *L'Humanité* (Communist), the tri-weekly *Le Populaire* (Socialist) and the Gaullist *La Nation*. All others are owned by individual publishers or by the powerful groups which have developed round either a company or a single personality. The major groups are as follows:

France Editions et Publications Group: 100 rue Réaumur, Paris 2e; *France-Soir*, *Paris-Presse*, *le Journal du Dimanche*, *France-Dimanche*, *Elle*, *Le Jardin des Modes*, *Arts Ménagers*, *Scoop*, *Photogavure Réaumur*. Imprimerie Réaumur have a 50 per cent holding in *Télé-7-Jours*.

Amaury Group (Dir.-Gen. CLAUDE BELLANGER): 124 rue Réaumur, 75080 Paris and 18 rue d'Enghien, 75010 Paris; owns *Le Parisien Libéré*, the provincial dailies *Le Courrier de l'Ouest*, *Le Maine Libre* and the sports daily *L'Equipe*, several weeklies, including *Points de Vue*, *Images du Monde*, and monthlies, including *Marie-France*. The group own three printing houses and two advertising agencies.

Prouvost Group (Pres. and Chief Editor JEAN PROUVOST): 51 rue Pierre Charron, Paris 8e; owns *Paris-Match*, *Marie-Claire*, *la Maison de Marie Claire*, *Les Parents*, a new magazine (1970) *Mademoiselle*, a half-interest in *Télé-7-Jours* and a major owner in the Société du Figaro, which publishes *Figaro*, *Figaro Littéraire*, etc.

Del Duca Group: owns several popular magazines, including *Nous Deux*, *Intimité*, and women's and children's journals, including *Modes de Paris*, and also *Télé-Poche*. The group also owns factories and has extensions in Italy.

Bayard Presse: important catholic press group; owns the national *La Croix*, *Le Pèlerin du XXe Siècle*, *Panorama Aujourd'hui*, important magazines for young people such as *Record*, *Okapi* and *Pomme d'Api*, and other publications including *Bible et Terre Sainte* and *Documentation Catholique*. The organization also owns two publishing houses, one advertising agency and three printing works.

Filipacchi Group: devoted to teen-age and jazz fan readership; owns seven magazines including *Salut les Copains*, *Mademoiselle Age Tendre*, *Lui*, and *Jazz Magazine*.

Among the metropolitan dailies, the outstanding papers are *Le Monde* (355,000), which carries no pictures, and *Le Figaro*. The most popular are; *France-Soir* (881,000), *Le Parisien Libéré* (755,000), *Le Figaro* (419,000), and *L'Aurore* (409,000). The English language *International Herald Tribune* (114,000) is also a prominent feature. The major provincial dailies are *Ouest-France* published at Rennes (725,000), *Le Progrès* at Lyons (445,000), *Le Dauphiné Libéré* at Grenoble (432,000) and *La Voix du Nord* at Lille (422,000), which cater for rural readership by producing local subsidiary editions.

Metropolitan weekly papers range from the popular press, such as *France Dimanche* (1,450,000) and *Ici Paris* (1,100,000), through the more serious current affairs magazines like *L'Express*, *Le Nouvel Observateur* and the satirical *Canard Enchaîné*, to the literary and cultural *Figaro Littéraire*. Among the popular periodicals must be

mentioned the weekly illustrated *Paris-Match* (recently fallen to 811,000) and the women's journals *Marie-Claire* (678,000), *Elle* (730,000) and *Marie-France* (796,000).

RADIO AND TELEVISION

Office de Radiodiffusion et Télévision Française (ORTF):

Maison de l'ORTF, 116 ave. du Président Kennedy, Paris 16e; f. 1944 as RDF and 1959 as RTF, present name 1964; governed by an administrative Council of 14 members; Pres. MARCEAU LONG; Dirs. (Television, First Channel) JACQUELINE BAUDRIER, (Television, Second Channel) PIERRE SABBAGH, (Television, Third Channel) JEAN-LOUIS GUILLAUD, (Radio) JACQUES SALLEBERT, (Broadcasting) CLAUDE MERCIER.

The RTF was granted, in February 1959, a statute providing it with financial and administrative autonomy as a State public service under the Ministry of Information. By the reform of July 1964, the ORTF ceased to be directly controlled by the Ministry of Information, though remaining under its tutelage. The ORTF holds a monopoly of all broadcasting in France and in the French Departments and Territories overseas. Commercial television was introduced in October 1968, allowing initially for only two minutes of advertisements per day on the first channel (since 1970 increased to eight).

In May 1972 the ORTF was extensively reorganized following disclosures of clandestine advertising in programmes. After Senatorial investigations, the Chairman and Director-General resigned and a new statute was adopted, providing for 8 separate administrations to cover, respectively, each of the three television channels, radio, production and three other technical services. The post of Director-General was abolished, and the newly-appointed Chairman given wider powers. In 1973 tensions arose between the Chairman, Arthur Conte, and the Information Minister, Philippe Maland, over alleged economic mismanagement and left-wing political bias in the ORTF. In October M. Conte was dismissed and replaced by Marceau Long. Subsequently the service has been affected by a series of strikes against government interference in broadcasting and proposed structural reforms.

Despite the ORTF's monopoly of broadcasting within France, a number of radio stations based in countries on France's perimeter have large regional French audiences. These include notably *R.T.L.* (Luxembourg), *Europe No. 1*, *Radio Monte Carlo* (Monaco), *Radio Andorre* and *Sud-Radio* (Andorra). The French Government has major shareholdings in *Europe No. 1* and *R.T.L.*

RADIO

HOME SERVICES

France-Inter: Entertains and informs. Broadcasts transmitted for 24 hours a day; they can be received by 98 per cent of the population and by listeners outside France.

There are two main programmes, *France-Inter* and *France-Inter Variétés*. Other specialized and regional items are also produced.

Main transmitters for the two programmes: Allouis 1,829 metres; Nice 1 193 metres.

France Culture: Serious programme on art, culture and thought; broadcasts can be received by 95 per cent of the population.

Seventeen medium-wave and forty-nine high fidelity transmitters.

France Musique: Transmission on frequency modulation transmitters. Nearly 95 per cent of the programme is devoted to music; there are regular stereophonic transmissions.

Forty-nine transmitters.

France-Inter is broadcast on long, medium and short waves and *France-Inter Variétés* is broadcast on medium wave and high fidelity (frequency modulated) transmitters.

Radio-Sorbonne: Low power transmission of educational programmes. Only available in the Paris region.

There are nine regional stations which relay Parisian programmes as well as regional broadcasts. Strasbourg radio includes daily broadcasts in German.

FOREIGN SERVICES

Broadcasts in French to French Polynesia, New Caledonia, New Hebrides, West and Equatorial Africa, Antarctica (Terre Adélie), Antilles, Guiana, St. Pierre-et-Miquelon, Indian Ocean and Africa.

Broadcasts to Europe in Bulgarian, English, French, Greek, Hungarian, Polish, Portuguese, Romanian, Russian, Serbo-Croat, Czech, Slovak, Slovenian, Spanish and Yiddish. Also to Canada (in French), Latin America (in French, Spanish and Portuguese). There are broadcasts in Arabic for Arabs not only in France, but also in North Africa and the Near East.

Number of licences (Oct. 1970): 5,357,712.

TELEVISION

There are three state-run channels.

On the first network transmission is on a 819-line system in black and white, and covers 98.5 per cent of the population.

There are 43 transmitting stations and about 1,040 low-powered relay stations.

The second network is on a 625-line system in colour and 96.5 per cent of the population can receive it.

There are 68 transmitting stations and about 286 low-powered relay stations.

The third network, introduced in 1973, is on a 625-line system in colour and 50 per cent of the population can receive it.

Number of sets (Dec. 1973): 13,000,000.

Colour television, which was introduced in October 1967, is relayed for 73 hours per week on the second and third networks. The first network will change to colour in 1975. The SECAM system is used.

OVERSEAS TELEVISION SERVICE

Programmes are produced in Martinique, Guadeloupe, Guiana, Réunion, New Caledonia, Saint-Pierre et Miquelon, French Polynesia and French Territory of Afars and Issas.

Commissariat à l'Energie Atomique (Atomic Energy Commissariat): 29-33 rue de la Fédération, Paris 15e; f. 1945; Admin.-Gen. (Government Delegate) M. GIRAUD; Sec. Gen. PIERRE PELLETIER.

The Commissariat is under the direct authority of the Ministry of Industrial and Scientific Development. It is a public corporation with administrative and financial autonomy, with responsibilities in scientific research, technical development and industry in the nuclear field.

Under the second five-year atomic energy plan (1957-61), it was arranged that the Commissariat should cease to have sole responsibility for atomic energy in France. This responsibility is now shared by other corporations (in-

cluding Electricité de France) which are entrusted with the realization and exploitation of the main productions of nuclear electricity.

Administration is in the hands of a fifteen-member *Comité de l'Energie Atomique* (Atomic Energy Committee), consisting of government officials and representatives of science and industry.

Advisory Agencies to the Commissariat

Scientific Council: Pres. JACQUES YVON.

Mines Committee: Pres. Prof. MARCEL ROUBAULT.

Advisory Commission for Nuclear Electricity Production: Pres. JEAN COUTURE.

FRANCE—(ATOMIC ENERGY, UNIVERSITIES)

Markets: Pres. EUGÈNE FALLER.

There also functions within the Commissariat the following departments:

Délégué à la mission Matières Nucléaires (Directorate of Nuclear Materials): Dir. M. TARANGER.

Délégué à la mission Applications Militaires (Directorate of Military Uses): Dir. M. CHEVALLIER.

Délégué à la mission Recherche Fondamentale (Directorate of Fundamental Research): Dir. M. HOROWITZ.

Délégué à la mission Protection et Sécurité Nucléaires (Directorate of Radiological protection and security): Dir. M. GAUVENET.

Délégué à la mission Applications Industrielles Nucléaires (Directorate of Nuclear Industrial Applications): Dir. M. PECQUEUR.

Délégué à la mission Coopération Industrielle non Nucléaire (Directorate of non-Nuclear Industrial Co-operation): Dir. M. NOLLET.

Délégué à la mission Programmes d'Intérêt Général (Directorate of General Programmes: Dir. M. BALLIGAND.

Centre d'Etudes Nucléaires de Fontenay-aux-Roses (*Fontenay-aux-Roses Nuclear Research Centre*): B.P. 6, Fontenay-aux-Roses 92260; f. 1945; Dir. C. CHAUVEZ.

Centre d'Etudes Nucléaires de Grenoble (CEN-G) (*Grenoble Nuclear Research Centre*): BP 85, Centre de Tri, 38041 Grenoble-Cédex; f. 1956; staff 2,400; basic and applied research; three swimming-pool open-core reactors (32 mW., 8 mW., 100 kW.); 40 laboratories; Dir. MAURICE PASCAL.

Centre d'Etudes Nucléaires de Saclay (CENS) (*Saclay Nuclear Research Centre*): B.P. 2, 91190 Gif-sur-Yvette; f. 1949; Dir. PAUL BONNET.

The four Research Centres are equipped with reactors, the Grenoble Centre having been established as a means of associating the universities with the advancement of nuclear science and avoiding the over-centralisation of research. The Centre of Nuclear Studies at Cadarache is devoted to industrial nuclear research, both for electric generation and for propulsion. Fundamental research is also carried out in the fields of radiological safety, radio ecology and radioagronomy.

Centre National de la Recherche Scientifique (CERN): There are several nuclear research centres attached to this institution, and the largest nuclear laboratory complex is situated at Strasbourg.

Groupe de Laboratoires de Strasbourg-Cronenburg: rue du Loess, B.P. 20CR, 67 Strasbourg 3; f. 1957; Dirs. P. CUER, S. GORODETZKY, G. MONSonego, Mlle M. PEREY, A. COCHE, J. H. VIVIEN.

GERMAN DEMOCRATIC REPUBLIC

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The German Democratic Republic is bounded to the north by the Baltic Sea, to the west, south-west and south by the Federal Republic of Germany, to the south-east by Czechoslovakia and to the east by Poland along the line of the rivers Oder and Neisse. The climate is warm in summer with cold winters. The language is German. About 50 per cent of the population are Protestant (mainly belonging to the Evangelical Church) and 10 per cent Roman Catholic. There are about 3,500 Jews. The national flag (proportions five by three) carries three horizontal bands of black, red and gold, bearing in the centre the coat of arms showing a hammer and compass on a wreath of grain. The capital is established in East Berlin.

Recent History

After Germany's unconditional surrender in 1945, the country was divided according to the Potsdam agreement into four Allied zones of occupation. The Potsdam Declaration stated that, pending a final peace treaty, those areas of the former German Reich east of the line defined by the course of the rivers Oder and Neisse (Oder/Neisse Line), including the city of Danzig, should become part of Poland. The northern section of East Prussia became part of the Soviet Union. These territories amounted to about 14 per cent of the population and 24 per cent of the area of the former Reich. During 1946, in the Soviet Zone, the Communist Party fused with the Social Democratic Party to form the Socialist Unity Party (S.E.D.) which, since that time (under the leadership of Walter Ulbricht and, from May 1971, Erich Honecker), continues to exert a leading influence upon the development of the State.

The immediate post-war period was marked by a process of denazification and nationalization. Many industrial enterprises became state-owned, and under the land-reform measures large areas of landed property were taken over by the state and converted to various types of collective farming.

In 1949, following the foundation of the Federal Republic of Germany, the Soviet Zone produced a constitution of its own, thus declaring itself to be the German Democratic Republic, with its capital in Berlin. The early years of the G.D.R. were severe for the population. Much war damage had been inflicted upon the industrial capacity of the territory, which had anyway been primarily an agricultural area of the Reich. Large sections of the industry which remained had been transported to the Soviet Union as part of the heavy reparations, and the G.D.R. contributed to the upkeep of Soviet forces permanently stationed within its borders.

With these economic burdens, and the Government's concerted drive to build heavy industry, the standard of living remained low and in 1953 popular discontent led to uprisings in East Berlin and other cities. These were suppressed by Soviet troops, and the Government modified its economic policy towards an improvement in living stan-

dards. With a continual outflow of refugees, the population declined—a situation particularly worrying to the Government since many of the refugees were from the skilled labour force and the professions. In 1961 the stream of refugees leaving the G.D.R. via West Berlin was halted by the construction of a wall between East and West Berlin, thus completing the G.D.R.'s control of its frontiers. In the ensuing years, and particularly since the introduction of the "New Economic System" in 1963, the G.D.R. has, like the Federal Republic, brought about its own economic miracle and has emerged as the most dynamic economy in Eastern Europe.

In 1955 a peace treaty was signed with the Soviet Union. The Republic has been a member of the Council for Mutual Economic Assistance (COMECON) since 1950, and in 1964 signed a 20-year treaty of Friendship, Mutual Assistance and Co-operation with the Soviet Union. Up to the late 1960s the G.D.R. was recognized only by the other countries in the Socialist Bloc, but since 1971 many other states have established diplomatic relations with the Republic. Because of unresolved problems concerning its status, in the context of former Allied agreements, no western country would recognize the G.D.R. until such questions had been determined with Federal Germany. However, trade representations had existed for some years in several western European capitals.

Herr Stoph, Chairman of the G.D.R. Council of Ministers, and Federal Chancellor Brandt met twice in 1970. These were the first such meetings in the history of divided Germany. In 1971, following the four-power agreement on Berlin signed in September, representatives of the two German states and of West Berlin held talks which clarified the details of access rights to West Berlin and also allowed West Berliners to visit the G.D.R. Though many differences remain, the two states agreed in 1972 on a basic treaty governing their relationship, which was signed on December 21st. This opened the way for many western countries to establish diplomatic relations with the G.D.R. and for the G.D.R. to join the United Nations.

Government

The government is that of a people's democracy on the Soviet pattern. All citizens of 18 years and over have the right to vote representatives to the *Volkshammer* (People's Chamber) who in turn elect the Presidium, the Council of State and its Chairman, the Head of State. The *Volkshammer* also elects the Chairman of the Council of Ministers (the executive organ) and approves his appointed ministers.

In April 1968 nearly 95 per cent of the electorate voted in favour of the new Constitution which came into force immediately.

Defence

A National People's Army, comprising land, sea and air forces, was created out of the People's Police in 1956. Total strength is 132,000 comprising Army 90,000, Navy 17,000, Air Force 25,000. Military service lasts eighteen

months. There are also about 45,000 border troops, 24,000 security troops and about 400,000 members of the Workers Fighting squads. Defence estimates for 1973 totalled 8,328 million DDR-Marks. The G.D.R. is a member of the Warsaw Pact.

Economic Affairs

The Republic has been a member of COMECON since 1950, and the economy of the country is therefore closely linked with that of the Soviet Union and other member countries. Since the introduction of the "New Economic System" in 1963 there has been a moderate tendency towards industrial de-centralization, giving some latitude for medium-level decision making within the general prescriptions of the State Economic Plan. An increasing stress has been laid upon quality products such as optics, electronics and precision machinery, all of which are finding a growing market outside Comecon. By 1972 99.9 per cent of German industrial production was state-owned, while only 0.1 per cent was in private hands.

In terms of production it has now become one of the greatest industrial nations in the world. Industrial production increased threefold between 1956 and 1972. The only major natural resource in the G.D.R. is lignite, which supplies almost 90 per cent of its basic energy. It has the only lignite coking plant in the world, and is now building a second nuclear power station. A developing source of power is oil which comes in from the Kuybyshev oil fields in Russia via a 3,000 kilometre pipeline. The machine, chemical, and heavy engineering industries are leading exporters. Amongst the newer industries, electronics and shipbuilding take a prominent place. The Leipzig trade fairs are important centres of international trade.

All farmers are now members of agricultural production co-operatives. The Democratic Republic is becoming more and more self-supporting in this field.

Transport and Communications

There is a comprehensive transport system by rail, road, waterway and air. In 1972 there were 14,384 kilometres of railway, about 9 per cent of which were electrified. In the same year there were 45,572 kilometres of classified roads, of which 1,465 kilometres were motorway (*Autobahn*). There were also 2,546 kilometres of navigable inland waterways. The principal port, Rostock, is being developed to carry more of East Europe's trade with the rest of the world. In 1972 the G.D.R.'s merchant fleet had 194 ships (excluding passenger vessels), with a displacement of over one million tons.

Social Welfare

State social insurance is compulsory for all employees. It also covers their dependants and special classes such as students. The scheme provides for medical and dental treatment, sick pay, maternity grants, old age, disability, and bereavement pensions. A five-day working week is now constitutionally enforced, and the paid thirteen-day annual holiday can be spent at one of the 1,245 vacation centres, which are administered by the Confederation of Free German Trade Unions. Youth services and sport receive large State subsidies.

Education

Education in the G.D.R. plans to cater for children from early childhood to the completion of a university course. Children between the ages of 1 to 3 can be accommodated in crèches if their mothers are working, and in nursery schools from 4 to 6. Since 1959 elementary and secondary schools have been abolished in favour of ten-year polytechnics, in which children from the age of six must receive at least ten years of education. There are opportunities for studying up to *Abitur* during vocational training courses. A variety of university entrance qualifications are also available via evening-classes, factory and village academies, and university extension courses. In 1970 15 per cent of pupils left school after 8 years of education, and nearly all of these entered an apprenticeship or vocational training scheme. The University Reforms of 1969, besides revising administration, state that the standard course of study will now be four years. The first two years will be dedicated to basic and general study, and the last two to specialization. There are seven universities and a number of technological institutes.

Tourism

Tourism is promoted by the State Travel Bureau. The island of Rügen off the Baltic coast has considerable tourist traffic. The mountains of Thuringia and the Erzgebirge on the Czech frontier are much visited both in summer and winter. During 1973 more than 8 million tourists from non-socialist states visited the G.D.R. A special exchange rate of about 6 Marks to £1 is available for tourists.

Sport

Sport in all forms is actively encouraged and there is a special State Committee for Physical Education and Sport. The German Gymnastics and Athletics Association incorporates all amateur sports in 36 specialized organizations. Outside the schools, sport is sponsored by factory sports organizations and clubs. Football, swimming and tennis are among the most popular sports.

Public Holidays

1974: April 12 (Good Friday), May 1 (May Day), June 3 (Whit Monday), October 7 (GDR National Day), December 25 and 26 (Christmas), December 31 (half-day New Year).
1975: January 1 (New Year's Day).

Weights and Measures

The Metric System is in force.

Currency and Exchange Rates

100 Pfennige = 1 Mark der Deutschen Demokratischen Republik (DDR-Mark or "Ostmark").

Exchange rates (March 1974):

£1 sterling = 4,322 DDR-Marks;

U.S. \$1 = 1.861 DDR-Marks.

The currency is not recognized by the International Monetary Fund. Currency of the German Democratic Republic is not ordinarily convertible with the £ sterling or the U.S. \$ abroad.

THE CONSTITUTION

The Constitution of the German Democratic Republic was promulgated on April 9th, 1968, replacing the original Constitution which came into force when the Republic was founded in 1949. A summary is given below.

I FOUNDATIONS OF THE SOCIALIST STATE

Political Foundations (Articles 1-8)

The German Democratic Republic is a socialist state of the German nation. It is the political organization of the working people in town and countryside who are jointly implementing socialism under the leadership of the working class and its Marxist-Leninist party. The capital is Berlin; the State flag is black, red, and gold, and bears the State coat of arms. All political power in the Republic is exercised by the working people and all power serves their welfare. The National Front of Democratic Germany unites all political parties and mass organizations working for the development of the socialist state. Citizens exercise their political power through democratically elected people's representatives. The Republic pursues a peaceful foreign policy and fosters friendship with the U.S.S.R. and other socialist states. It strives for the eventual reunification of the two German states on the basis of socialism.

Economic Foundations, Science, Education and Culture (Articles 9-17)

The national economy is based on the socialist ownership of the means of production and is a socialist planned economy. All foreign economic relations are the monopoly of the state. All large industrial enterprises, farms, banks and means of transport are nationally owned and private ownership of these facilities is not allowed. The personal property of citizens and the right of inheritance are guaranteed. The Republic promotes culture, the arts and science and assures all citizens a high standard of education.

II CITIZENS AND ORGANIZATIONS IN SOCIALIST SOCIETY

Basic Rights and Basic Duties of Citizens (Articles 18-39)

The Republic respects the dignity and freedom of personality and guarantees to all citizens the exercise of their rights. The conditions for acquiring and losing citizenship of the German Democratic Republic are stipulated by law. All citizens are equal before the law. Men and women have equal rights and the same legal status. All citizens over the age of 18 have the right to vote and may be elected to the local people's representative bodies. Persons over the age of 21 may be elected to the People's Chamber (*Volkshammer*). Every citizen is obligated to service in defence of his country. The Republic can grant political asylum to citizens of other states in certain circumstances.

Freedom of speech, the press, radio and television are guaranteed, as is also the right to peaceful demonstration and assembly. The person and the liberty of every citizen are inviolable and he has the right to move freely within the state territory within the framework of the law. Postal and telecommunication secrecy is assured and may be limited only for purposes of state security or criminal prosecution. Every citizen has the right to legal protection by the organs of the state when he is abroad.

The right to work is guaranteed and every citizen is free to select his own job. Everyone has the same right to education and attendance at secondary school is obligatory. All citizens are entitled to leisure time and annual paid holiday, to medical and other social welfare benefits. Social

care is provided for the elderly and disabled. Housing is under public control and there is legal protection against eviction. Every citizen has the right of the inviolability of his home. Marriage, motherhood and the family have the special protection of the state and provision is made for large families, fatherless families, etc. Religious freedom is assured. Citizens of the German Democratic Republic of Sorb nationality have the right to cultivate their mother tongue and culture.

Enterprises, Towns and Local Communities in Socialist Society (Articles 40-42)

Enterprises, towns, local communities and associations of local communities are communities with responsibilities of their own in which citizens work and shape their social relations. They safeguard the basic rights of citizens and are protected by the constitution. The local representative bodies are elected by the people and are responsible for local affairs. The working people also co-operate in the management of enterprises both directly and with the help of their elected organs.

The Trade Unions and their rights (Articles 43-44)

The free trade unions are united in the Confederation of Free German Trade Unions. They are independent bodies, are represented at all levels of the social system and play a decisive part in the solution of problems. They conclude agreements with government authorities and enterprise managements on all questions concerning the working and living conditions of the people. They take part in the shaping of the socialist legal system and administer the social insurance system of the workers.

Socialist Production Co-operatives and Their Rights (Article 45)

These are voluntary associations of farmers for the purpose of joint production and receive government assistance. They are represented in the state organs and take an active part in the state planning. Production co-operatives on the same lines also exist among fishermen, craftsmen and gardeners.

III STRUCTURE AND SYSTEM OF STATE MANAGEMENT

The People's Chamber (Volkshammer) (Articles 48-65)

The People's Chamber is the supreme organ of state power and guarantees the enforcement of its laws. It is composed of 500 deputies elected by the people in a free and secret ballot for a period of four years. It is convened not later than the 30th day after the election. It elects its Presidium to conduct the plenary sessions for the electoral term. The People's Chamber can be dissolved before the expiration of the electoral term only on its own decision.

Committees are formed from among the members of the People's Chamber to discuss bills and to co-operate in submitting them to the voters for popular discussion. They then submit their comments to the plenary session of the People's Chamber. Laws passed are proclaimed in the Law Gazette by the Chairman of the Council of State within one month and come into force on the fourteenth day after their proclamation.

The Council of State (Staatsrat) (Articles 66-77)

The Council of State is the organ of the People's Chamber operating between sessions of the latter, and fulfils all fundamental tasks resulting from its laws and decisions. It is elected by the People's Chamber at its first session and is responsible to it for its activities. It deals with bills to

GERMAN DEMOCRATIC REPUBLIC—(THE CONSTITUTION)

be submitted to the People's Chamber and deals with all basic tasks arising from its laws and decisions. It convenes the sessions of the People's Chamber, and issues the writ for elections to the People's Chamber and other representative bodies. It makes fundamental decisions on defence matters and exercises control over the constitutionality and legality of the activities of the Supreme Court and the Prosecutor General. It determines military and diplomatic ranks and other special titles and establishes state honours. It also exercises the right of amnesty and pardon.

The Council of Ministers (Ministerrat)

The People's Chamber passed a Bill in October 1972 which redefined the status and functions of the Council of Ministers. The Council, under the direction of the party of the working class (the Socialist Unity Party), draws up the principles of national domestic and foreign policy and is in charge of the uniform execution of the national policy of the G.D.R.; it organizes the accomplishment of the political, economic, cultural and social tasks of the G.D.R., as well as the defence responsibilities assigned to it.

Local People's Representative Bodies and their Organs (Articles 81-85)

The elected organs of state power in the districts, towns, regions, municipal boroughs and local communities are responsible for deciding on all local issues on the basis of law. The local people's representative bodies draw up and implement the economic plan and budget for their areas, and have their own income. Their decisions are binding and must be published. All such bodies elect their own councils and committees.

IV SOCIALIST ADMINISTRATION OF JUSTICE AND LEGALITY

(Articles 86-107)

The Constitution is direct and valid law and legal regulations may not contradict it. Details of all laws and binding regulations are published, and at no time may organs other than those provided by the Constitution be allowed to exercise state power. The citizens' participation in the administration of justice is guaranteed and it is

the joint concern of socialist society to combat all violations of the law. Laws on the punishment of crimes against peace, humanity and war crimes correspond to the generally recognized norms of international law.

The administration of justice in the Republic is exercised by the Supreme Court, the District Courts, the Regional Courts and the social courts. In military matters jurisdiction is exercised by the Supreme Court, military tribunals and military courts. The Supreme Court is the highest organ of the administration of justice and is responsible to the People's Chamber. All judges are democratically elected by the people's representative bodies or by the citizens themselves and must be men of knowledge and experience who are loyally devoted to the socialist state. The public prosecutors' office safeguards socialist legality and ensures that persons who have committed crimes are called to account before the court. The public prosecutors' office is directed by the Prosecutor General and the public prosecutors of the districts and regions are appointed by him and subordinate to him.

An act is punishable only if it was covered by penal law at the time of its commission, if the offender has acted in a culpable way and if his guilt is proved beyond doubt. Persons under arrest must be brought before a judge not later than one day after their arrest and only judges are authorized to judge the admissibility of detention on remand. Nobody may be withheld from his lawful judge and special courts are inadmissible. Every citizen has the right to be heard in court and the right to be defended by a counsel is guaranteed throughout the whole criminal procedure. Any citizen or organization has the right to submit suggestions or grievances to the state organs and may suffer no disadvantages as a result. Damages inflicted on a citizen or his personal property as a result of unlawful measures by employees of state organs are to be compensated by the state organ concerned.

V AMENDMENT OF THE CONSTITUTION

The Constitution can be amended only through a law of the People's Chamber of the German Democratic Republic which expressly amends or supplements the text of the Constitution.

JUDICIAL SYSTEM

The legal system of the German Democratic Republic was reorganized after 1945, at first under four-power direction; and the principles on which the judicial system is to function are embodied in the Constitution. Judges are elected by the people's representative bodies or by the citizens directly. State Prosecuting Counsels are nominated by the Prosecutor General. Jurisdiction is exercised by the Supreme Court, by the *Bezirke* Courts and by the *Kreis* Courts. All Courts decide on the appointment of one presiding and two assistant magistrates. The Assistant Magistrates in the first instance are jurors (lay magistrates from all classes of society); the Labour Law Tribunal of the Supreme Court appoints two official judges and three lay magistrates.

Judges are independent and subject only to the Constitution and the Legislature. A judge can be recalled only if he has committed a breach of the law, grossly neglected his duties or been convicted by a court.

Lay Magistrates are elected for a period of four years after nomination by the democratic parties and organizations. Magistrates of the *Kreis* Courts are directly elected by the people; Magistrates of the *Bezirke* Courts, by the *Bezirkstag*; Magistrates of the Labour Law Tribunal of the Supreme Court, by the *Volkshammer*. Ali are equally authorized Judges.

Attached to the *Volkshammer* is a Constitutional and Legislature Commission in which all parties are represented according to their numbers. In addition there are on the Commission three members of the Supreme Court as well as three State Law Teachers who may not be members of the *Volkshammer*. All members of the Constitutional and Legislature Commission are appointed by the *Volkshammer*.

The whole judicial and penal system was reformed on January 14th, 1968, the most important reform being the

introduction of a new Criminal Code to replace the German Criminal Code of 1871. Further details will be found in the Constitution section (*above*).

Oberstes Gericht der Deutschen Demokratischen Republik (*Supreme Court of the German Democratic Republic*): 104 Berlin, Scharnhorststr. 37; Pres. Dr. HEINRICH TOEPLITZ.

Generalstaatsanwalt der Deutschen Demokratischen Republik (*General State Prosecutor of the German Democratic Republic*): Dr. JOSEF STREIT; 104 Berlin, Scharnhorststr. 37.

THE ROMAN CATHOLIC CHURCH

It is estimated that about ten per cent of the population of the Democratic Republic are Roman Catholics, the majority of them in the South.

The German Bishops meet twice a year, one of the conferences being held in Fulda. (See also the section on the Roman Catholic Church in the chapter on the Federal Republic of Germany.) As the bishops are not able to attend the German Conference of Bishops, they meet regularly in a general conference of the G.D.R.

Bishop of Berlin: ALFRED Cardinal BENGSC (112 Berlin, Gürtelstr. 8).

Bishop of Meissen: GERHARD SCHAFFRAN.

Apostolic Administrator in Görlitz: Weihbischof BERNHARD HUHNS.

THE JEWISH COMMUNITY

It is estimated that the Jewish Community in the Democratic Republic numbers about 5,000.

Verband der Jüdischen Gemeinden in der D.D.R. (Union of Jewish Communities in the G.D.R.): 806 Dresden, Bautzner Strasse 20; Pres. HELMUT ARIS; publ. *Nachrichtenblatt* (quarterly).

THE PRESS

The advent to power of the National Socialist Party in 1933 interrupted the period of press freedom which Germany had enjoyed under the Weimar Republic. When the Allies introduced their press licensing system in 1946 as a means of closely controlling the press, licences were issued in the Soviet-occupied zone to approved parties and organizations only but not to individuals wishing to publish newspapers.

In 1947 the *Presseamt* (Press Administration Office) was founded, closely associated with the office of the Prime Minister. Its functions were: to issue licences to approved organizations belonging to the democratic bloc; to distribute newsprint; and to give a measure of editorial direction to non-political papers. By means of this Office the government acquired a considerable degree of control over the press, reinforced by the Press Section of the Socialist Unity Party's Central Committee whose function is to issue daily instructions to editors of political papers as to which news items require emphasis and comment. This elaborate system of directives is seen as ensuring that the press serves the interest of the whole community in furthering the socialist cause by precluding the possible self-interest and irresponsibility of private individuals.

The 1968 Constitution of the German Democratic Republic guarantees the freedom of the press, radio and television, and states that every citizen of the G.D.R. has the right, "in accordance with the spirit and aims of the Constitution, to express his opinion freely and publicly. This right is not limited by any service of employment relationship. No person may be placed at a disadvantage for exercising this right". From these statements it follows that there is no right to express an opinion which is not "in accordance with the spirit and aims of the Constitution", or, in other words, which can be interpreted as contrary to the interests and development of the Socialist state defined in the Constitution. Editors, who are personally responsible for the content of their papers, and citizens alike realize their obligations, responsibilities and dependence upon the state, society and political system in which they live. For these reasons, formal censorship is not practised.

All newspapers and periodicals are owned and managed by political or independent organizations such as party committees, trade unions, cultural associations, youth organizations, etc. Almost all dailies are controlled by or affiliated to a political party, such as *Neues Deutschland* (Socialist Unity Party), *Der Morgen* (Liberal Democratic Party), and *National Zeitung* (National Democratic Party). A notable exception is the officially independent *Berliner Zeitung*. *Tribüne* is the organ of the Trade Unions League. The Free German Youth publishes the daily *Junge Welt* and the weekly *Forum*. The official news agency, the *Allgemeiner Deutscher Nachrichtendienst*, became a state monopoly in 1946.

About 40 dailies appear in the G.D.R., with a total circulation of about 8 million. There are over 200 periodicals and illustrated magazines, covering a wide range of subjects. They embody considerably less variety in format and presentation than the corresponding Federal German press. There is no sensational popular press and though most papers' news coverage is quite serious, the breadth of coverage is restricted by the policy, enunciated by *Neues Deutschland*, of concentrating on news judged to be of interest and value to the public.

The most important and influential dailies are those published by the Socialist Unity Party, headed by *Neues Deutschland* in Berlin, and by the Berlin organs of the other parties mentioned above. Though circulation figures are often not disclosed, a very popular paper is *Berliner Zeitung am Abend*. Leading dailies outside Berlin are *Sächsisches Tageblatt* (Dresden), *Leipziger Volkszeitung* (Leipzig), *Freie Presse* (Karl-Marx-Stadt), and *Freiheit* (Halle).

The daily press is more influential, particularly in political matters, than the weekly press and periodicals. Outstanding amongst these latter categories are *Sonntag* and *Forum*, the popular *Neue Berliner Illustrierte* and the women's *Für Dich*.

THE FEDERAL REPUBLIC OF GERMANY AND WEST BERLIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Federal Republic of Germany lies in the heart of Europe between 47° and 55° north latitude and 6° and 23° east longitude. Its neighbours to the west are the Netherlands, Belgium, Luxembourg and France, to the south Switzerland and Austria, to the east Czechoslovakia and the German Democratic Republic, and to the north Denmark. Its climate is temperate, with an average annual temperature of 48°F, although there are considerable variations between the North German lowlands and the Bavarian Alps. The language is German. Approximately half the population belongs to the Evangelical (Protestant) Church, 45 per cent to the Roman Catholic Church, and the remainder to smaller religious groups. The national flag (proportions five by three) consists of three horizontal stripes of black, red and gold. The seat of Government is Bonn.

Recent History

After the defeat of the Third Reich in 1945, Germany was divided according to the Berlin Agreement into American, Soviet, British and French zones of occupation. In 1949 the zones occupied by the three Western Allies merged to become the Federal Republic of Germany, and the Soviet Zone shortly afterwards declared itself the German Democratic Republic. Following general elections, and the constitution of the Federal Republic, the military occupation was converted into a contractual defence relationship. The last of the limitations to the sovereignty of the Republic were removed in 1955, in which year it joined the Western European Union and NATO. The Saarland, which immediately after the war became economically tied to France as a semi-autonomous protectorate, once more became fully politically and economically integrated into the Federal Republic in 1959. Berlin was also, according to the Berlin agreement, divided into four zones of occupation. In 1949 Soviet occupied Berlin proclaimed itself capital of the German Democratic Republic, leaving the remainder, known as West Berlin, an island in G.D.R. territory. Consistent with the belief that the Government of the Federal Republic was the only organ legally entitled to speak for Germany as a whole, the *Bundesstag* confirmed Berlin's status as capital of Germany in 1957. The seat of the Federal Government continues to be Bonn.

From considerable destruction inflicted by allied bombing and the last stages of the land war the Federal Republic, containing most of the principal industrial areas of Germany, rebuilt itself rapidly as one of the most affluent and economically dynamic states in Europe. The *Wirtschaftswunder* (Economic Miracle), which received much of its stimulus from Marshall Aid and European co-operation, began under the Chancellorship of Dr. Konrad Adenauer (1949-63) and the direction of Economics Minister Dr. Ludwig Erhard, who subsequently became

Chancellor following the retirement of Adenauer. During these years much was done to reconcile Germany with the Western Allies. This policy culminated in the Federal Republic's becoming a founder member of the European Economic Community (EEC). No progress was made with eastern Europe due to the Government's insistence on its policy of re-unification, maintaining that the 1937 borders of the Reich remained legally valid until the signing of a peace treaty by the Government of a united Germany. The years of the Grand Coalition (C.D.U./C.S.U. and S.P.D.) under the Chancellorship of Dr. Kurt Kiesinger lasted from 1966 to 1969 and saw continuing prosperity with no change in the re-unification policy.

Although the C.D.U./C.S.U. gained more votes than any of the other parties in the general elections of October 1969, a coalition government of S.P.D. and F.D.P. was formed under the Chancellorship of Willy Brandt. However, in October 1970 three F.D.P. representatives withdrew their support for the Government and joined the Opposition, mainly in disapproval of foreign policy, and further defections cost the coalition its majority in April 1972 but the opposition failed to take over power by a "constructive vote of no confidence". Various measures were found to keep the Government going but it was eventually found necessary to call for an early general election. This was held in November and, by West German standards, was an overwhelming success for the coalition, the S.D.P. becoming for the first time the largest party in the *Bundesstag*. Herr Brandt reformed his Government and announced that the emphasis would be switched to domestic policies and to western Europe.

The coalition Government had adopted a fresh policy towards eastern Europe (*Ostpolitik*), and particularly towards the German Democratic Republic. During 1970 formal talks were conducted between the two countries for the first time and there was a marked increase in diplomatic contacts between the Federal Republic and the other Communist countries of Europe. An agreement over the supply of gas from the Soviet Union and trade agreements with Poland and Hungary preceded the signing of the Treaty on the Renunciation of Force with the Soviet Union in August, and the signing of a treaty with Poland in November 1970. The latter constitutes a reversal of the policy prior to Brandt's Chancellorship, in that it recognizes the Oder/Neisse Line as the border between Germany (actually the G.D.R.) and Poland, and renounces the former Federal German claims upon the Eastern territories of the old Reich. In 1971 there were lengthy talks between the four powers aimed at clarifying the position of West Berlin. An agreement was signed in September and was followed by negotiations between the two German governments and the authorities in West Berlin. These were concluded in December and provided for unimpeded access from the Federal Republic to West Berlin and for the citizens of West Berlin to be allowed to

visit the G.D.R. After much parliamentary debate the treaties with the Soviet Union and Poland were finally ratified in May 1972. The two German states then concluded a treaty governing their relationship and this was signed on December 21st. Following ratification, the treaty came into force on June 21st, 1973, and the two Germanies joined the United Nations on September 18th.

Government

The Federal Republic comprises ten states (Länder). The legislative organ is the Bundestag, which is elected for four years by universal suffrage on a mixed proportional representation system. A number of deputies are directly elected, the remainder being chosen from the party lists according to the proportion of "second votes" given to each party. The Länder are represented in the legislature by the Bundesrat, whose members are appointed and recalled by the Länder themselves. In addition to the ten Länder, West Berlin is represented in the Bundesrat, as in the Bundestag, in a consultative capacity.

The Federal Government, which is headed by a Chancellor elected by an absolute majority of the Bundestag, is responsible for the foreign affairs and defence of the Republic and for such matters as citizenship, migration, currency, customs, railways, posts and telecommunications.

Each of the Länder has its own parliament, which has the right to pass laws except in such matters as are the exclusive right of the Federation. Both education and police are in the control of the Länder.

Local responsibility for the execution of Federal and State Laws is undertaken by the Gemeinden (communes) and Landkreise (counties).

Defence

As a member of NATO and the Western European Union since 1955, Federal Germany undertook to supply twelve divisions, and formation of these was completed in 1964. After the United States, Germany is the second largest financial contributor towards NATO infrastructure. Conscription has been in force since 1956 and lasts for a period of fifteen months. In 1973 the strength of the Army stood at 334,000 and there were 510,000 reserves. The Navy is 37,000 strong with 35,000 reserves, and there were 104,000 in the Air Force with 80,000 reserves. Defence estimates for 1973 totalled 26,600 million DM. France and Great Britain co-operate with Federal Germany in combined training schemes and military exercises.

Economic Affairs

After the destruction caused by the Second World War the Federal German economy made a remarkable recovery which was sustained over a number of years, and has often been described as Germany's "economic miracle". The basis of this prosperity has been iron and steel, vehicles, engineering, shipbuilding, electrical goods and chemicals, and since the late 1950s Federal Germany has been the second largest trading nation in the world. During the past two years, however, the economy has been experiencing many of the difficulties common to other Western European countries—steep rises in prices of raw materials, inflation, monetary uncertainties and worsening industrial relations. In late 1973 the problems were accentuated by the world energy crisis.

The real rate of growth of GNP in 1973 was 5.3 per cent, but it has been officially estimated that the rate of growth for 1974 will be between nil and 2 per cent. Inflation has not been as severe as in many western European countries. The rate of inflation for 1973 was approximately 7 per cent, and the 1973 balance of payments surplus of DM 9,500 million (over £1,500 million) has placed Federal Germany in a stronger position than other western European countries to face the inevitable economic difficulties of increased oil prices.

Federal Germany's labour relations have recently been more turbulent than at any time since the Second World War, and after a series of strikes in February 1974 the Government reached a settlement with over 4 million workers in the public sector which gave them average pay increases of 12.5 per cent. In an effort to improve industrial relations the Federal German Government has drafted a Bill to extend co-partnership to all big companies. This scheme is expected to be approved by Parliament during 1974 and become effective at the beginning of 1975.

Transport and Communications

The Federal Republic has a highly developed system of transport by rail, inland waterways, road and air. Over £5,000 million pounds were invested in the field of transport and communications between 1949 and 1960. Under a ten-year road-building plan 9,865 kilometres of Federal roads were constructed by 1969, and by the end of 1971 there were 417,000 kilometres of classified roads, including 4,829 kilometres of modern motorway (*Autobahn*). The railways have been modernized and the shipping fleet redeveloped after the run-down of the war and the immediate post-war years. The canals linking the rivers Rhine, Main and Danube are being widened and deepened to form a trading route linking the North Sea with the Black Sea. There are international airports at West Berlin, Bremen, Cologne, Düsseldorf, Frankfurt, Hamburg, Hanover, Munich and Stuttgart.

Social Welfare

Social legislation in the Federal Republic, tracing its origins back to 1881, provides insurance for health, accident, old-age, disability and unemployment. The schemes for disability, old-age and unemployment insurance are compulsory for all employees, and over 80 per cent of the population is covered by national health insurance. More than 20 per cent of the expenditure of the Federal Budget goes to social security payments.

Education

The Basic Law gives the control of education entirely to the State governments. They do, however, co-operate quite closely to ensure a large degree of conformity in the system.

Education is compulsory from the end of the sixth to the eighteenth year, and nine years must be full-time. Primary education is free, and grants are made for secondary education wherever fees are payable. Attendance at the basic school (*Grundschule*) is obligatory for all children during the first four years of their school life, after which they may continue in the elementary school, as do 80 per cent of the pupils, or proceed to the intermediate school (*Realschule*) for six years or the high school (*Gymnasium*) for nine years. There are three types of High School,

specializing in Classics, Modern Languages, and Mathematics and Science. A *Gymnasium* school-leaving certificate is a necessary prerequisite for University education. Those who stay in the elementary school complete their education by part-time attendance at a vocational school.

There are in the Federal Republic thirty-five universities and nine technical universities, as well as a number of colleges specializing in individual subjects.

Tourism

Germany's tourist attractions include spas, summer and winter resorts, mountains, the Rhineland, mediaeval towns and villages. In 1970 nearly eight million people visited Germany but since then the total has declined slightly. There are more than one million beds available for tourists.

Receipts from tourism totalled 5,973 million DM in 1972.

Visas are not required for nationals of the following countries: Afghanistan, Andorra, Angola, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Burma, Burundi, Cameroon, Canada, Central African Republic, Chad, Chile, Colombia, Congo (Brazzaville), Costa Rica, Cyprus, Dahomey, Denmark, Dominican Republic, Ecuador, El Salvador, Ethiopia, Finland, France, Gabon, Ghana, Greece, Guadeloupe, Guam, Guinea, Honduras, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Kenya, Laos, Liberia, Libya, Liechtenstein, Luxembourg, Madagascar, Malawi, Malaysia, Martinique, Mexico, Monaco, Morocco, Mozambique, Nepal, The Netherlands, New Caledonia, New Zealand, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Portugal, Puerto Rico, Rwanda, San

Marino, Sierra Leone, Singapore, Somalia, South Africa, Spain, Sri Lanka, Sweden, Switzerland, Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom, U.S.A., Upper Volta, Uruguay, Venezuela and Zambia.

Sport

Sport in the Federal Republic is highly organized, football and gymnastic clubs being extremely numerous. Other popular sports are athletics, shooting, handball, swimming, table tennis and tennis.

Public Holidays

1974: May 1 (Labour Day), May 23 (Ascension Day), June 3 (Whit Monday), June 13 (Corpus Christi)*, June 17 (Day of German Unity), August 8 (Assumption), November 1 (All Saints' Day)*, November 20 (Repentance Day), December 25, 26 (Christmas).

1975: January 1 (New Year's Day), March 28 (Good Friday), March 31 (Easter Monday).

Other public holidays are celebrated in certain Länder only.

THE CONSTITUTION

THE Basic Law of 1949 was and is intended as a provisional Constitution to serve until a permanent one for Germany as a whole can be drawn up. The Parliamentary Council which framed it set out to continue the tradition of the Constitution read out in the Paulskirche, in Frankfurt/Main, during the revolution of 1848-49, and to preserve some continuity with subsequent German constitutions (with Bismarck's Constitution of 1871, and with the Weimar Constitution of 1919) while avoiding the mistakes of the past. It contains 146 articles, divided into 11 sections, and introduced by a short preamble.

I. Basic Rights

The opening articles of the Constitution guarantee the dignity of man, the free development of his personality, the equality of all men before the law, and freedom of faith and conscience. Men and women shall have equal rights, and no one may be prejudiced because of sex, descent, race, language, homeland and origin, faith, or religions or political opinion.

No one may be compelled against his conscience to perform war service as a combatant (*Art. 4*). All Germans have the right to assemble peacefully and unarmed and to form associations and societies. Everyone has the right freely to express and to disseminate his opinion through speech, writing or pictures. Freedom of the press and freedom of reporting by radio and motion pictures are guaranteed (*Art. 5*). Censorship is not permitted.

The State shall protect marriage and the family property and the right of inheritance. The care and upbringing of children is the natural right of parents. Illegitimate children shall be given the same conditions for their development and their position in society as legitimate children. Schools are under the supervision of the State. Religion forms part of the curriculum in the State schools, but parents have the right to decide whether the child shall receive religious instruction (*Art. 7*).

A man's dwelling is inviolable; house searches may be made only by Court Order. No German may be deprived of his citizenship if he would thereby become stateless. The politically persecuted enjoy the right of asylum (*Art. 16*).

II. The Federation and the Länder

Article 20 describes the Federal Republic (*Bundesrepublik Deutschland*) as a democratic and social federal

state. The colours of the Federal Republic are to be black-red-gold, the same as those of the Weimar Republic. Each *Land* within the Federal Republic has its own Constitution, which must, however, conform to the principles laid down in the basic law. All *Länder*, districts and parishes must have a representative assembly resulting from universal, direct, free, equal and secret elections (*Art. 28*). The exercise of the power of state is the concern of the *Länder*, in so far as the Basic Law does not otherwise prescribe. Where there is incompatibility, Federal Law supersedes *Land* Law (*Art. 31*). Every German has in each *Land* the same civil rights and duties.

Political parties may be freely formed in all the states of the Federal Republic, but their internal organization must conform to democratic principles, and they must publicly account for the sources of their funds. Parties which seek to impair or abolish the free and democratic basic order or to jeopardize the existence of the Federal Republic of Germany are unconstitutional (*Art. 21*). So are activities tending to disturb the peaceful relations between nations, and, especially, preparations for aggressive war, but the Federation may join a system of mutual collective security in order to preserve peace. The rules of International Law shall form part of Federal Law and take precedence over it and create rights and duties directly for the inhabitants of the Federal territory (*Art. 25*).

The territorial composition of the *Länder* shall be re-organized with due regard to regional unity, territorial and cultural connections, economic expediency and social structure.

III. The Bundestag

The deputies of the Lower House or *Bundestag* shall be elected by the people in universal, free, equal, direct and secret elections, for a term of four years.* Any person who has reached the age of 21 is eligible to vote and any person who has reached the age of 25 is eligible for election (*Art. 38*). A deputy may be arrested for a punishable offence

* The elections of 1949 were carried out on the basis of direct election. But in January 1953, the draft of a new electoral law was completed by the Federal Government and passed shortly before the dissolution. The new law represents a compromise between direct election and proportional representation, and is designed to discourage the rise of many small parties.

FEDERAL GERMANY—(THE CONSTITUTION)

only with the permission of the *Bundestag*, unless he be apprehended in the act or during the following day.

The *Bundestag* elects its President and draws up its Standing Orders. Most decisions of the House require a majority vote. Its meetings are public, but the public may be excluded by the decision of a two-thirds majority. Upon the motion of one-quarter of its members the *Bundestag* is obliged to set up an investigation committee.

IV. The Bundesrat

The Federal Council or *Bundesrat* is the Upper House through which the *Länder* participate in the legislation and the administration of the Federation. The *Bundesrat* consists of members of the *Land* governments, which can appoint and recall them (*Art.* 51). Each *Land* has at least three votes; *Länder* with more than two million inhabitants have four, and those with more than six million inhabitants have five. The votes of each *Land* may only be given as a block vote. The *Bundesrat* elects its President for one year. Its decisions are taken by simple majority vote. Meetings are in public, but the public may be excluded. The members of the Federal Government have the right, and, on demand, the obligation, to participate in the debates of the *Bundesrat*.

V. The Bundespräsident

The Federal President or *Bundespräsident* is elected by the Federal Convention (*Bundesversammlung*), consisting of the members of the *Bundestag* and an equal number of members elected by the *Länder* Parliaments (*Art.* 54). Every German eligible to vote in elections for the *Bundestag* and over 40 years of age is eligible for election. The candidate who obtains an absolute majority of votes is elected, but if such majority is not achieved by any candidate in two ballots, whoever receives most votes in a further ballot becomes President. The President's term of office is five years. Immediate re-election is admissible only once. The Federal President must not be a member of the Government or of any legislative body or hold any salaried office. Orders and instructions of the President require the counter-signature of the Federal Chancellor or competent Minister, except for the appointment or dismissal of the Chancellor or the dissolution of the *Bundestag*.

The President represents the Federation in International Law and accredits and receives envoys. The *Bundestag* or the *Bundesrat* may impeach the President before the Federal Constitutional Court on account of wilful violation of the Basic Law or of any other Federal Law (*Art.* 61).

VI. The Bundesregierung

The Federal Government (*Bundesregierung*) consists of the Federal Chancellor (*Bundeskanzler*) and the Federal Ministers (*Bundesminister*). The Chancellor is elected by an absolute majority of the *Bundestag* on the proposal of the Federal President (*Art.* 63). Ministers are appointed and dismissed by the President upon the proposal of the Chancellor. Neither he nor his Ministers may hold any other salaried office. The Chancellor determines general policy and assumes responsibility for it, but within these limits each Minister directs his department individually and on his own responsibility. The *Bundestag* may express its lack of confidence in the Chancellor only by electing a successor with the majority of its members; the President must then appoint the person elected (*Art.* 67). If a motion of the Chancellor for a vote of confidence does not obtain the support of the majority of the *Bundestag*, the President may, upon the proposal of the Chancellor, dissolve the House within twenty-one days, unless it elects another Chancellor within this time (*Art.* 68).

VII. The Legislation of the Federation

The right of legislation lies with the *Länder* in so far as the Basic Law does not specifically accord legislative powers to the Federation. Distinction is made between fields of exclusive legislation of the Federation and fields of concurrent legislation of *Bund* and *Länder*. In the field of concurrent legislation the *Länder* may legislate so long and so far as the Federation makes no use of its legislative right. The Federation has this right only in so far as a matter cannot be effectively regulated by *Land* legislation, or the regulation by *Land* Law would prejudice other *Länder*, or if the preservation of legal or economic unity demands regulation by Federal Law. Exclusive legislation of the Federation is strictly limited to such matters as foreign affairs, citizenship, migration, currency, copyrights, customs, railways, post and telecommunications. In most other fields, as enumerated (*Art.* 74), concurrent legislation exists.

The legislative organ of the Federation is the *Bundestag*, into which Bills are introduced by the Government, by members of the *Bundestag* or by the *Bundesrat* (*Art.* 76). After their adoption they must be submitted to the *Bundesrat*, which may demand, within two weeks, that a committee of members of both houses be convened to consider the Bill (*Art.* 77). In so far as its express approval is not needed, the *Bundesrat* may veto a law within one week.

An alteration of the Basic Law requires a majority of two-thirds in both houses, but an amendment by which the division of the Federation into *Länder* and the basic principles contained in *Articles* 1 and 20 would be affected, is inadmissible (*Art.* 79).

The Federal Government or the *Länder* Governments may be authorized by law to issue ordinances. A state of legislative emergency for a Bill can be declared by the President on the request of the Government with the approval of the *Bundesrat*. If then the *Bundestag* again rejects the Bill, it may be deemed adopted nevertheless in so far as the *Bundesrat* approves it. An emergency must not last longer than six months and may not be declared more than once during the term of office of any one Government (*Art.* 81).

VIII. The Execution of Federal Laws and the Federal Administration

The *Länder* execute the Federal Laws as their own concern in so far as the Basic Law does not otherwise determine. In doing so, they regulate the establishment of the authorities and the administrative procedure, but the Federal Government exercises supervision in order to ensure that the *Länder* execute the Federal Laws in an appropriate manner. For this purpose the Federal Government may send commissioners to the *Land* authorities (*Art.* 84). Direct Federal administration is foreseen for the Foreign Service, Federal finance, Federal railways, postal services, Federal waterways and shipping.

In order to avert imminent danger to the existence of the democratic order, a *Land* may call in the police forces of other *Länder*; and if the *Land* in which the danger is imminent is itself not willing or able to fight the danger, the Federal Government may place the police in the *Land*, or the police forces in other *Länder*, under its instructions (*Art.* 91).

IX. The Administration of Justice

Judicial authority is invested in independent judges, who are subject only to the law and who may not be dismissed or transferred against their will (*Art.* 97).

Justice is exercised by the Federal Constitutional Court, by the Supreme Federal Court, by the Federal Courts

and by the Courts of the *Länder*. The Federal Constitutional Court decides on the interpretation of the Basic Law in cases of doubt, on the compatibility of Federal Law or *Land* Law with the Basic Law, and on disputes between the Federation and the *Länder* or between different *Länder*. The Supreme Federal Court decides in cases where the decision is of importance for the uniformity of the administration of justice of the Higher Federal Courts. Higher Federal Courts are to be established for the spheres of ordinary, administrative, finance, labour and social jurisdiction. Extraordinary courts are inadmissible.

The freedom of the individual may be restricted only on the basis of a law. No one may be prevented from appearing before his lawful judge (*Art. 101*). Detained persons may be subjected neither to physical nor to mental ill-treatment. The police may hold no one in custody longer than the end of the day following the arrest without the decision of a court. Any person temporarily detained must be brought before a judge who shall inform him of the reasons of his arrest, at the latest on the following day. A person enjoying the confidence of the detainee must be notified forthwith of any continued duration of a deprivation of liberty. An act may be punished only if it was punishable by law before the act was committed, and no one may be punished more than once on account of the same criminal act. The death sentence shall be abolished.

X. Finance

The Federation has the right of exclusive legislation only on customs and financial monopolies; on most other taxes, especially on income, property and inheritance, it has concurrent legislation rights with the *Länder* (*see VII above*).

Customs, financial monopolies, excise taxes (with exception of the beer tax), the transportation tax, the turnover tax and property dues serving non-recurrent purposes, are administered by Federal finance authorities, and the revenues thereof accrue to the Federation. The remaining taxes are administered, as a rule, by the *Länder* and the *Gemeinden* to which they accrue. The Federation and the *Länder* shall be self-supporting and independent of each other in their budget economy (*Art. 109*). In order to ensure the working efficiency of the *Länder* with low revenues and to equalize the differing burden of expenditure of the *Länder*, the Federation may, however, make grants, and take the necessary funds from specific taxes accruing to the *Länder*. All revenues and expenditures of the Federation must be estimated for each fiscal year and included in the budget, which must be established by law before the beginning of the fiscal year. Decisions of the *Bundestag* or the *Bundesrat* which increase the budget expenditure proposed by the Federal Government require its approval (*Art. 113*).

XI. Transitional and Concluding Provisions

The *Articles 116–146* regulate a number of disconnected matters of detail, such as the relation between the old Reich and the Federation, the Federal Government and Allied High Commission, the expenses for occupation costs which have to be borne by the Federation, and the status of former German nationals who now may regain their citizenship. *Article 143* contains the threat of severe punishment to those who attempt to change by force the constitutional order of the Federation or of a *Land*, or to prevent the Federal President by force or the threat of danger from exercising his powers.

HISTORY OF MAJOR CONSTITUTIONAL AMENDMENTS

I. SOVEREIGNTY AND RESPONSIBILITY

Between July 1952, when legislation for the ratification of the E.D.C. Treaty was first put before the *Bundestag*, and March 1954, when the process of ratification was completed, the Federal Government had at intervals referred to the Constitutional Court to determine whether an amendment of the Constitution would be necessary.

On March 7th, 1953, in response to the Government's application, the Constitutional Court announced that it could give no ruling as to the constitutional legality or otherwise of the legislation until this had been passed by Parliament. Accordingly, the two Bills, one for the ratification of the E.D.C. and one for the ratification of the Bonn Conventions, were given their third reading in the *Bundestag* on March 9th, 1953, and both were ratified. On May 15th the ratification Bills were passed by the *Bundesrat*. The elections of September 1953 gave Dr. Adenauer's Government the majority necessary to make changes in the Federal Constitution, and an amending Bill was presented to the *Bundestag* in February 1954. This received its second and third readings on February 26th, 1954, and was passed by 334 votes to 144, the Government majority of 190 being 9 more than the two-thirds necessary to make constitutional changes.

This Bill:

- (1) Laid down under an amendment to *Article 73* of the Basic Law that the Federal Parliament had full powers to legislate in all matters relating to national defence "including obligatory national service for men over 18 years of age",
- (2) Introduced a new article (142A) which declared that "the treaties signed in Bonn and Paris on May 26th and 27th, 1952 (i.e. the Bonn Conventions

and E.D.C. Treaty) were not contrary to the Federal Constitution".

The effect of the amendment was to empower the Federal Government to raise forces for the E.D.C. or for any similar organization which might come into being, to avoid continual recourse to the Constitutional Court.

Since these Amendments to the Constitution were adopted, the treaties concerned (the Bonn Conventions and the E.D.C.) have themselves lapsed; but the Amendments apply equally to the new instruments drawn up as a result of the London Conference of September 1954.

Until September 1954 the operation of the Basic Law was conditioned by two further instruments: the first, the Occupation Statute of 1949 (with subsequent amendments) defining the rights and obligations of the United States, Great Britain and France with respect to Germany; and the second, the Bonn Conventions, designed to replace the Occupation Statute and to grant almost full sovereignty to the German people. There was unforeseen delay in putting the Bonn Conventions into force, simply because they were linked with the European Defence Community Treaty (that is to say the two were bound to come into force simultaneously), and this E.D.C. Treaty had not been ratified by France. The position from May 1952 until September 1954 was therefore that the Occupation Statute (with Amendments) was still the ultimate legal basis for Germany's relations with the western Allies, and for her position in international law; whereas the Bonn Conventions provided the psychological atmosphere in which these relations developed, and in which the Federal Republic gradually took its place as a positive factor in European politics. The Bonn Conventions are important, for this reason, and also because, pruned and revised and divorced

FEDERAL GERMANY—(THE CONSTITUTION)

from the E.D.C., they were used as the basis for the new instruments of sovereignty, drawn up after the London Conference of September 1954 (*see below*).

The Bonn Conventions

At the Brussels Conference in December 1950 the governments of the United States, Great Britain and France declared themselves ready and willing to enter into contractual negotiations with the Federal Republic of Germany, and thereby to complete agreements which would supersede the Occupation Statute of 1949 and restore to Germany the maximum degree of sovereignty possible in the light of the international situation. The Allied governments made it clear from the outset that they did not wish this move to abolish in their entirety the Four-Power agreements of 1945, which were the remaining link between East and West Germany and which could still be the basis for settlement of the German problem by negotiation; but that they considered that the powers of the Federal Government could not be curtailed indefinitely or pending such settlement. The resulting Conventions were a product of the unique political situation which had developed in Germany since 1945, and could not in themselves do away with the division of Germany, nor overcome the facts that foreign troops will undoubtedly remain on German soil until international tension has eased, and that the final Peace Treaty continues to be deferred; and as they were linked with the European Defence Community Treaty they could not without new decisions come into force without it.

The negotiations which led to the Bonn Conventions began in May 1951, and the Conventions were signed in Bonn by the Foreign Ministers of the United States, Great Britain and France on the one hand, and the Foreign Minister of the Federal Republic of Germany on the other, on May 26th, 1952. Under the Conventions:

(1) The Occupation Statute was abolished, and the Federal Government inherited full freedom in so far as the international situation permits.

(2) Allied forces in Germany were no longer occupation forces, but part of "the defence of the free world, of which the Federal Republic and West Berlin form a part".

(3) A number of problems which would normally be settled by a Peace Treaty were resolved; the Conventions were in effect a provisional treaty to end the war between the Federal Republic and the Three Powers, pending a final treaty between the whole of Germany and the Four. Under this heading the following provisions were made:

- (a) The Federal Republic would have full control over its internal and foreign affairs and relations with the Three Powers would be conducted through ambassadors.
- (b) Only because of the international situation would the Three Powers claim their rights regarding the stationing of armed forces on German soil, matters concerning Berlin, the re-unification of Germany and the final Peace Treaty.
- (c) The Federal Republic undertook to conduct its policy according to the principles of the United Nations.
- (d) In their negotiations with states with which the Federal Republic has no relations, the Three Powers would consult with the Federal Government.
- (e) The Federal Republic would participate in the European Defence Community.
- (f) The Three Powers and the Federal Republic agreed that a freely negotiated peace settlement for the whole of Germany was their common aim, and that determination of the final boundaries of Germany must await such a treaty.

The Conventions also included supplementary contractual agreements concerning the rights and obligations of foreign troops in Germany, taxation of the armed forces, a Finance Convention, and a Convention on the settlement of matters arising out of the war and the occupation.

The London and Paris Agreements

On August 30th, 1954, the E.D.C. Treaty was finally debated and defeated in the French National Assembly, and with it the corner stone of western policy over the previous two years was swept away. The need to fill the void was urgent; and it was generally realized that some means must be found to restore German sovereignty, and to allow for its corollary, a German contribution to western defence, in a manner which would be acceptable to France.

For this purpose a conference was held in London at the end of September, at which the Foreign Ministers of Belgium, Canada, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands, the United Kingdom and the United States took part. This conference opened on September 28th, and on October 3rd the Final Act was signed after intense negotiation. By this it was agreed that Germany and Italy should enter an expanded Brussels Treaty Organization; that German sovereignty should be restored and that she should, on agreed terms, enter N.A.T.O.; and that an Agency for the control of armaments on the continent of Europe should be set up. Instructions were then given for the drafting of the various instruments which would be necessary to give effect to these decisions, and it was agreed that a further meeting should be held at the earliest possible opportunity to endorse them in their detailed form.

On October 20th, 1954, a conference began in Paris to complete the work of the London Conference. It was again attended by the Foreign Ministers of Belgium, Canada, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands, the United Kingdom and the United States; and as in London the Governments of The United States, Great Britain and France, dealt with the aspects of German sovereignty for which they have special responsibilities.

It was announced on October 21st that full agreement had been reached on the outstanding issues concerning German sovereignty, and that details for the expansion of the Brussels Treaty Organization, both in scope and functions and in size, to include both Germany and Italy, had also been agreed; the expanded organization is known as Western European Union.

German Sovereignty and Western European Union

On May 5th, 1955, with the depositing of the instruments of ratification of the London and Paris Agreements, the German Federal Republic attained its sovereignty. The three-power status continues for the time being in West Berlin, but is modified by a declaration by the American, French and British Commandants. The ratification also brought into being the newly constituted Western European Union, and the Federal Republic simultaneously became a member of it and of the North Atlantic Treaty Organization.

II. OTHER AMENDMENTS

In June 1968 legislation was finally passed providing for emergency measures to be taken during a time of crisis. The Bill had received much opposition, mainly from the Left, since the introduction of the first draft by Dr. Schröder in 1960.

The main provisions of this, the 17th Amendment to the Constitution, were to allow the authorities to place certain restrictions on the secrecy of correspondence and tele-

FEDERAL GERMANY—(THE CONSTITUTION, THE GOVERNMENT, DIPLOMATIC REPRESENTATION)

communications, to conscript men into the armed forces and to use the armed forces to fight armed insurgents if the free democratic status of the Federal Republic or of any Land was threatened. A new Article 53a provided for the establishment of a committee of 33 members, two-thirds members of the Bundestag and one-third members of the Bundesrat, which must be informed by the Federal Government of any plans in the event of a defence

emergency. The life of parliamentary bodies and the terms of office of the Federal President and his deputy might be extended during a defence emergency.

In June 1969 a Bill amending Article 38 was passed by both houses. This reduced the voting age from 21 years to 18 years for Federal elections and the age of eligibility for election to the Federal Parliament from 25 years to 21 years.

RELIGION

THE PROTESTANT CHURCH

German Protestantism is mainly of Lutheran origin with strong Calvinistic elements in some areas, and three main confessional groups—the Evangelical-Lutheran, the Evangelical-Reformed, and the United Confessional—have emerged among the Protestant population. In spite of confessional differences, these Churches have similar constitutional structures: the smallest community is the parish, with its church council and pastor (*Pfarrer* or *Pastor*). Several parishes form a church district headed by a Dean (*Dekan*), a Provost (*Propst*), or a Superintendent; the districts are united in the Territorial Church (*Landeskirche*), whose governing organs are the Synod, the Bishop or Church President (*Kirchenpräsident*) and the Church Council (*Landeskirchenrat*) or the Church Office (*Landeskirchenamt*). The episcopal office is of primarily administrative importance and does not imply that the Bishop receives a higher form of ordination than the pastor.

Until 1969 the Protestant churches in both the Federal and Democratic Republics were united in the *Evangelische Kirche in Deutschland* (E.K.D.), a federation established at the Conference of Eisenach (Thuringia) in 1948. In 1969, however, the churches in the Democratic Republic declared themselves organizationally independent and established the *Bund der Evangelischen Kirchen in der D.D.R.* Consequently the E.K.D. is now restricted to the Federal Republic only, but maintains links with the churches in the Democratic Republic.

The *Vereinigte Evangelisch-Lutherische Kirche Deutschlands*, one of the federations within the E.K.D., also divided in 1968 and is paralleled in the Democratic Republic by the V.E.L.K.D.D.R. The *Evangelische Kirche der Union* is partly divided and spans both the Federal and the Democratic Republics.

About 49 per cent of the population of the Federal Republic (29.2 million) are members of the Protestant Church, the great majority belonging to churches forming the E.K.D. The total membership of the Lutheran churches is almost 13.6 million, of the United Churches about 15.1 million, and of the Reformed Churches about 466,000.

Outside the E.K.D. are numerous small Evangelical Free Churches, such as the Baptists, Methodists, Mennonites and the Lutheran Free Church, with a membership of approximately 400,000 in all.

EVANGELISCHE KIRCHE IN DEUTSCHLAND (The Evangelical Church in Germany)

The governing bodies of the E.K.D. are its Synod of Clergy and lay members which meets at regular intervals, and the Council, composed of fifteen elected members. The E.K.D. has an ecclesiastical secretariat of its own (the Evangelical Church Chancellery), and a special office for foreign relations.

Chairman of the Council: Landesbischof D. HELMUT CLASS; 7 Stuttgart 1, Gänscheidestr. 2-4.

Synod of the E.K.D.: 3 Hannover-Herrenhausen, Herrenhäuserstr. 2A; Pres. CORNELIUS A. VON HEYL.

Evangelical Church Chancellery: 3 Hannover-Herrenhausen, Herrenhäuserstr. 2A; Berlin Office: 1 Berlin 12, Goethestr. 87; Bonn Office: 53 Bonn, Löwenburgstr. 4; Pres. WALTER HAMMER.

Office for Foreign Relations: 6 Frankfurt a.M.1, Bockenheimer Landstr. 109; Pres. D. ADOLF WISCHMANN.

CHURCHES AND FEDERATIONS WITHIN THE E.K.D.

Vereinigte Evangelisch-Lutherische Kirche Deutschlands (V.E.L.K.D.) (*The United Evangelical-Lutheran Church of Germany*): (Office) 3 Hanover, Richard-Wagner-Str. 26; f. 1948; mems. 13.6 million; Pres. HUGO SCHNELL; a body uniting the Lutheran territorial Churches within the Evangelical Church in Germany.

Two Lutheran Churches do not 'belong to the V.E.L.K.D.

Presiding Bishop: Bischof D. HANS-OTTO WÖLBER (2 Hamburg 11, Neue Burg 1).

Evangelische Kirche der Union (E.K.U.) (*Evangelical Church of the Union*): is composed of Lutheran and Reformed elements. THE PRESS

The advent to power of the National Socialist Party in 1933 interrupted the press freedom which Germany had enjoyed under the Weimar Republic and which was not fully restored until 1949. In 1946 the Allies introduced a licensing system, considerably restricting press freedom by confining it to a limited number of approved publishers. Two years later six eminent German citizens, including Konrad Adenauer and Carlo Schmid, issued to the Allies their celebrated "Memorandum on Democracy and the Freedom of the Press"; in it they criticized the licensing system and the monopolies and curtailment of freedom that ensued, and appealed for German press freedom to be entrusted to German Law and German Courts.

This appeal became effective in 1949 when licences were abolished and the Federal Constitution was promulgated to constitute the Basic Law of the Republic. Article 5 stipulates: "Everyone has the right freely to express or to disseminate his opinion by speech, writing and pictures and freely to inform himself from generally accessible sources. Freedom of the press and freedom of reporting by radio and motion pictures are guaranteed. There shall be no censorship. These rights are limited by the provisions of the general laws, the provisions of the law for the protection of youth, and by the right to inviolability of personal honour." These last qualifications refer to the Federal law penalising the sale to young people of literature judged to endanger morality, and to articles in the Penal Code relating to defamation, in particular Article 187A concerning defamation of public figures.

There is no Federal Press Law, all legal action being normally referred back to the Constitution. But the press is subject to general items of legislation some of which may significantly limit press freedom. Article 353C of the Penal Code for example, dating from the Nazi period, prohibits the publication of official news supposed to be secret; under it a journalist may be required to reveal his sources. The Code of Criminal Procedure also constitutes a danger in that it authorizes the government to confiscate objects potentially important as evidence in a legal investigation, which may be construed to include papers, print, etc. An unsuccessful attempt was made in 1964 to pass a bill permitting prior censorship of the press and other stringent measures in times of emergency such as war.

Freedom of the press is stipulated in each of the Constitutions of the individual Länder. Many Länder have recently enacted laws defining the press's democratic role. For example the Hamburg Press Law of January, 1965, declares that "the press is free and serves free democratic

order" and defines its public function as the gathering and publicizing of news, criticism, the forming of public opinion and public education. Many Länder give the press access to sources of government information. Some Länder authorize the journalist to refuse to disclose his sources; others qualify, and even withhold this right. Some permit printed matter to be confiscated on suspicion of an indictable offence only if authorized by an independent judge; others allow a district attorney or even the police to give this authorization.

The German Press Council, modelled on the English pattern, is composed of publishers and journalists. It investigates complaints against the press and enjoys a considerable standing.

The Federal German press is quite free of government control. No daily is directly owned by a political party, and though some 10 per cent of papers support a party line, at least two-thirds of newspapers, including all the major dailies, are politically independent.

The political and economic conditions since 1949 have fostered the rapid development of a few large publishing groups. This situation, analogous to the U.K. press structure, has been criticized as "undemocratic".

The press situation has been under consideration by three government commissions, which have suggested various measures to halt the trend towards concentration. Such a measure was the tax rebate granted for one year in April 1968 to papers selling less than 160,000 copies. About 400 publications benefited by some DM 20,000 (£2,000).

The main press commission, the Günther commission, issued an interim report on May 22nd 1968. The commission laid down various limits on the proportions of circulation one group should be allowed to control: (1) 40 per cent of the total circulation of newspapers or 40 per cent of the total circulation of magazines; (2) 20 per cent of the total circulation of newspapers and magazines together; (3) 15 per cent of the circulation in one field if the proportion owned in the other field is 40 per cent. At that time Springer's estimated ownership was 39.2 per cent of newspaper circulation (65-70 per cent in Berlin) and 17.5 per cent of magazine circulation. In June Springer reduced his share of the periodical market to around 11 per cent by selling *Eltern*, *Twen*, *Jasmin* and *Bravo* (whose joint circulation is some 4,500,000), and *Das Neue Blatt*. *Eltern*, *Twen* and *Jasmin*, having changed hands again, now belong to another group in Hamburg. Jahr, while *Bravo* and *Das Neue Blatt* are part of Heinrich-Bauer-Verlag.

Before the report of the Günther commission the most active opponents of press concentration had been the students. Their long campaign against the Springer Group culminated in April (after Rudi Dutschke's shooting) in attacks on the offices of the Group and attempts in many parts of Germany to prevent distribution of its papers. The most powerful of these is *Bild Zeitung*, whose mass circulation (4,700,000) was easily attracted by a formula completely new to the German press of the 1950s: bold, simple reporting and editorials, coupled with striking pictures and banner headlines. The paper's success has also been helped by Springer's ability to print it in eight different provincial centres, a great advantage in a country where the regional press has always been strong.

Axel Springer Group (Prop. AXEL SPRINGER): Kochstrasse 50, 1 Berlin 61; the largest newspaper publishing group in continental Europe; includes five major dailies (*Die Welt*, *Hamburger Abendblatt*, *Bild Zeitung*, *Berliner Morgenpost*, *B.Z.*), two Sunday papers (*Welt am Sonntag*, *Bild am Sonntag*), two radio, television and family magazines (*HÖRZU*, *Funk Uhr*) and the Propyläen Verlag and Ullstein Verlag publishing firms.

The other principal groups are as follows:

Gruner und Jahr Group AG & Co. (Dirs. J. JAHR, G. BUCERUS): 221 Itzehoe, Klaus-Groth-Strasse 11; owns amongst others the following: *Brigitte*, *Capital*, *Eltern*, *Essen und Trinken*, *Gong*, *Jasmin*, *Schöner Wohnen*, *Schule*, *Sesamstrasse*, *Stern*, *Twen*.

Süddeutscher-Verlag (Pres. HANS DÜRRMEIER): owns *Süddeutsche Zeitung* and *München Abendzeitung*.

Jahreszeiten-Verlag (Pres. HELMUT GANSKE): owns amongst others the periodicals *Für Sie* and *Moderne Frau*.

Heinrich-Bauer-Verlag (Pres. HEINRICH BAUER): owns the popular illustrated magazines *Quick* (Munich), *Neue Revue* (Hamburg), *Praline*, *Neue Post*; and *Das Neue Blatt* and *Bravo*, formerly owned by the Springer Group.

Burda Druck und Verlag (Pres. Dr. FRANZ BURDA): 7600 Offenbach/Baden; owns *Bunte Illustrierte*, *Bild und Funk*, *Freundin* and *Das Haus*.

The most important and influential daily newspapers include *Frankfurter Allgemeine Zeitung*, *Süddeutsche Zeitung* (Munich) and *Die Welt* (Hamburg). The most popular dailies apart from *Bild Zeitung* are *Westdeutsche Allgemeine*, *Hamburger Morgenblatt*, *Hamburger Abendblatt* and *B.Z.*

The most influential weeklies include *Die Zeit* (Hamburg), the Sunday *Welt am Sonntag* and *Bild am Sonntag*, and the political periodical *Der Spiegel*. Numerous popular illustrated weekly periodicals have developed, led by *HÖRZU*, *Stern* and *Quick*.

Figures for 1973 show that 432 dailies and 63 Sunday and weekly papers were published in Germany, giving an average daily circulation of over 21 million—the highest on the Continent. In the same year 878 periodicals, with a total circulation of nearly 90 million were published. Of these 227 were of the popular variety.

FINANCE

(cap.=capital; p.u.=paid up; dep.=deposits; m.=million)

Until 1957 the issue of bank notes was the responsibility of the *Bank Deutscher Länder*; since that time the task has been carried out by the *Deutsche Bundesbank* (Federal Bank), with its central offices in the *Länder* acting as "main administrative organs of the Federal Bank". In exercising its legal powers, the Federal Bank is not subject to control from the Government. Apart from the Federal Bank there are central financial institutions with special tasks such as the Credit Institute for Reconstruction (Kreditanstalt für Wiederaufbau) which administers European Recovery Plan funds, the Equalization of Burdens Bank (Lastenausgleichsbank) which administers funds for the rehabilitation of refugees, and the clearing houses of the communal banks—the German Municipal Bank, the Industrial Credit Bank, and the Agricultural Annuity Bank.

There are over 1,600 institutions with 15,000 branches in the banking sector of the Federal Republic, and the three largest banks are the Deutsche Bank, the Commerzbank and the Dresdner Bank. All of these three carry on the German private bank tradition of *universal banking*, whereby banks offer advice and carry out all kinds of financial transaction on their customers' behalf. Although the Deutsche Bank has over 800 branches, and the Commerzbank over 700, 83 per cent of all bank-branches have less than ten employees, and there is considerable competition from the large number of small establishments. The Post Office runs a well established *giro system*, and there are over 850 *small savings banks* with 3,700 branches, mainly run by local, municipal, and rural authorities,

which hold about 60 per cent of the capital in the savings sector. During the last few years the savings banks have been encroaching upon the formerly commercial bank monopoly of industrial credit. Also important are the *Credit Co-operatives* such as the "Volksbanken" which grant industrial credit, and the "Raiffeisenkassen" which deal in agricultural credit. The "Bayerische Hypotheken und Wechsel Bank" is a typical *regional bank*, and an example of a *specialist bank* which has rapidly grown into one of Germany's major banks is the trade-union and consumer co-operatives owned "Bank für Gemeinwirtschaft" which originally specialized in the salvage of floundering business.

There are about 8,900 *insurance companies* and 31 *building societies* operating in the Federal Republic, of which 910 of the former and 17 of the latter are subject to supervision by Federal Board of Control for Insurance and Building Savings; the remainder being controlled by *Länder* authorities. Of the insurance companies 251 specialize in forms of life insurance, 220 in pensions, 100 in accident insurance, 172 in general insurance, 85 in agriculture, 38 in shipping, and 34 in re-insurance. 168 foreign companies operate in the Federal Republic, 143 of them from OECD countries.

There are stock-exchanges at West Berlin, Bremen, Düsseldorf, Frankfurt-am-Main (considered to be the financial capital of the Federal Republic), Hamburg, Hanover, Munich and Stuttgart.

Landeszentralbank in Schleswig-Holstein: 2300 Kiel, Fleetshörn 26; Pres. Board of Management OTTO KÄHLER.

By the Law of July 26th, 1957 the former Land Central Banks and the Berlin Central Bank were merged with the *Bank deutscher Länder* to form the *Deutsche Bundesbank*. The functions of the *Deutsche Bundesbank* are to issue bank notes, to regulate note and coin circulation and supply of credit, and to ensure due execution by banks of both internal and external payments.

The organs of the *Deutsche Bundesbank* are the Central Bank Council (*Zentralbankrat*), the Directorate (*Direktorium*) and the Boards of Management of the Land Central Banks. The Central Bank Council consists of the President and Vice-President of the *Deutsche Bundesbank*, the other members of the Directorate and the Presidents of the Land Central Banks. Its general function is to determine money and credit policies, to lay down business and administrative directives, and to state the responsibilities of the Directorate and Boards of Management. The Directorate consists of the President and the Vice-

FEDERAL GERMANY—(FINANCE)

President of the *Deutsche Bundesbank* and of not more than eight further members. It must implement decisions taken by the Central Bank Council and manage and administer the Bank, except in matters coming within the competence of the Land Central Banks' Boards of Management. The Directorate controls Federal, foreign exchange and open market transactions.

The *Deutsche Bundesbank* maintains Head Offices (*Hauptverwaltungen*) in each *Land*, known as *Landeszentralbanken*. The Boards of Management of each of these Land Central Banks, normally consisting of the President and Vice-President, are responsible for all transactions and administrative business within the *Land*.

The *Deutsche Bundesbank* is bound, as far as is consistent with its functions, to support Government economic policy, although it is independent of instructions from the Government. The Bank may advise on important monetary policy, and members of the Federal Government may take part in the deliberations of the Central Bank Council but may not vote.

2. THE COMMERCIAL BANKS

During the banking reform of 1946-47 the three large private banking houses of Germany, the *Deutsche Bank*, the *Dresdner Bank* and the *Commerzbank* (known as the D-Banks), were decentralized into thirty small successor institutions, none of which might have branches outside its own *Land*. This arrangement was superseded in 1952 by a further reorganization; at this stage the three D-Banks formally transferred their business to nine successor institutes, and the three Berlin successors to the D-Banks were brought into the scheme. The successors to the *Deutsche Bank* were the *Norddeutsche Bank* of Hamburg, the *Deutsche Bank Aktiengesellschaft West* of Düsseldorf, and the *Süddeutsche Bank* of Munich; those of the *Dresdner Bank* were the *Hamburg Kreditbank*, the *Rhein-Main Bank* of Frankfurt am Main, and the *Rhein-Ruhr Bank* of Düsseldorf, and those of the *Commerzbank*, the *Commerzbank Bankverein* of Düsseldorf, the *Commerz- und Kreditbank* of Frankfurt am Main, and the *Commerz- und Discontobank* of Hamburg. The three Berlin successors of

the D-Banks were the *Berliner Disconto Bank*, the *Bank für Handel und Industrie*, and the *Berliner Commerzbank*.

By a further agreement reached in April 1957 the process of decentralization was reversed to a large extent and both the *Deutsche Bank* and the *Dresdner Bank* reabsorbed their successor institutions, with the exception of their Berlin successors, the *Berliner Disconto Bank* and the *Bank für Handel und Industrie* which continue as separate subsidiary concerns of the *Deutsche Bank* and the *Dresdner Bank* respectively. This agreement did not affect the previous arrangement of 1952 with regard to the successor institutes of the *Commerzbank*, which still functioned as independent organizations.

A final reorganization took place in November 1958, by which the three successor institutions to the *Commerzbank* were merged into one organization, the *Commerzbank A.G.*; the Berlin successor institute, the *Berliner Commerzbank A.G.*, continues to exist as a separate institute.

ATOMIC ENERGY

Bundesministerium für Forschung und Technologie (*Federal Ministry for Research and Technology*): Bonn-Bad Godesberg, Stresemannstrasse 2, Postfach 120370; f. 1955; Minister Prof. Dr. HORST EHMKE.

The Ministry is divided into five departments, the first dealing with administration, planning, finance, co-ordination of research institutions, the second with principal political problems of research, general promotion of research and international co-operation, the third with energy, raw materials and maintenance of supplies, biology, ecology and medicine, the fourth with data-processing and information systems, and the fifth with space travel and transport systems.

The Ministry's responsibility in the nuclear energy field is to promote nuclear research and nuclear engineering as well as to plan and co-ordinate the activities of all of these bodies within the framework of the German Nuclear Programme. In 1973 some DM 1,300 million were placed at the Ministry's disposal for the fulfilment of its tasks in the nuclear energy field.

Nuclear research is carried out by the research centres of the following institutions in co-operation with universities and industry:

1. Deutsches Elektronen-Synchrotron, Hamburg.
2. Gesellschaft für Kernenergieverwertung in Schiffbau und Schifffahrt m.b.H., Hamburg.
3. Gesellschaft für Kernforschung m.b.H., Karlsruhe.
4. Gesellschaft für Schwerionenforschung m.b.H., Darmstadt.

5. Gesellschaft für Strahlen- und Umweltforschung m.b.H., München.
6. Hahn-Meitner-Institut für Kernforschung Berlin G.m.b.H.
7. Max-Planck-Institut für Plasmaphysik, Garching/München.
8. Kernforschungsanlage Jülich G.m.b.H., Jülich.

There are 11 nuclear power stations in operation, 11 are under construction and 2 have been commissioned.

One large nuclear power station with a capacity of 640 MW is operated at Würgassen (Weser). There are also 2 stations in Karlsruhe, 1 in Kahl (Main), Jülich, Grosswelzheim and Niederaichbach in operation. One large commercial plant of 630 MW is operated in Stade (Elbe). Three larger demonstration plants are each in operation in Grundremmingen (Danube), 237 MW, Lingen (Ems) 255 MW and Obrigheim (Neckar) 328 MW.

The following nuclear power stations are under construction and are due to come into commercial operation within the next few years: Brunsbüttelkoog 770 MW, Biblis (Rhine) 1,145 and 1,230 MW, Neckarwestheim (Neckar) 775 MW, Ohu (Isar) 900 MW, Esenshamm (Weser) 1,230 MW, Krümmel 1,260 MW, Uentrop 300 MW, Kalkar 280 MW and 2 at Philippsburg, both with a capacity of 864 MW.

Nuclear power stations at Mülheim-Karlrich (Ruhr) 1,154 MW and Wyhl 1,280 MW were contracted in 1973 and are due to come into operation in 1978 and 1979 respectively.

GIBRALTAR

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag

Gibraltar is a narrow peninsula running southwards from the south-west coast of Spain to which it is connected by a sandy isthmus about one mile long and a half-mile wide. The Rock, as it is often called, is situated in latitude 36° 7' N. and longitude 5° 21' W. and runs from north to south for a length of nearly three miles. It is three-quarters of a mile wide and has a total area of two and a quarter square miles. Five miles across the Bay to the west lies the Spanish port of Algeciras and 20 miles across the Straits, to the south, is Africa. The Mediterranean lies to the east. The climate is temperate, snow or frost being extremely rare. The mean minimum and maximum temperatures during the winter are 13°C. (54°F.) and 18°C. (65°F.) respectively and during the summer they are 13°C. (55°F.) and 29°C. (85°F.) respectively; the average annual rainfall is 35 inches. The official language is English though the population is bilingual in English and Spanish. Seventy-seven per cent of the population are Roman Catholic, 8 per cent are Muslim, 8 per cent Church of England, and 2½ per cent Jewish. There is also a small Hindu community. The flag (proportions two by one) bears the banner of the Gibraltar coat of arms (castle and key) on a background the upper two-thirds of which are white and the lower third red.

Recent History

The post-war years have been marked by considerable progress socially and economically through intensive development of the medical, educational, housing and social security services, and by the expansion of business and the encouragement of tourism. There has also been considerable constitutional development resulting in partial self-government since 1964 and control over most internal matters since 1969.

A Biennial Review of all wages and salaries in the public sector took place during 1972. Negotiations with industrial workers in official employment broke down in August of that year when a general strike, lasting just under a week, took place. A settlement was then reached and negotiations proceeded with the non-industrial employees. Corresponding increases in pay were made in the private sector, and it was finally agreed that the next Review should take place in 1974.

The Spanish Government lays claim to Gibraltar as an integral part of her territory, whilst Britain maintains that the Treaty of Utrecht (1713) granted to Britain sovereignty over Gibraltar in perpetuity. Since 1963 the Spanish Government has intensified its campaign through the United Nations, for the cession of Gibraltar to Spain and, when Britain failed to comply with the UN deadline for decolonization, imposed certain restrictions on Gibraltar. These include closing the land frontier, imposing an air space ban affecting aircraft landing at Gibraltar, removing the Algeciras Ferry (the only remaining means of direct access to Spain), withdrawing the Spanish labour force and cutting off telephone and telegraphic communications with Spain.

In pursuance of a UN resolution stating that the interests of the people of Gibraltar should be taken into account in the talks, Britain held a referendum in September 1967 in which the overwhelming majority (12,138 to 44) voted for retaining their link with the U.K. rather than passing under Spanish sovereignty. This was followed by the drafting of a new Constitution, promulgated in 1969, and in the Preamble to the Constitution Order 1969 the British Government has given an undertaking never to enter into arrangements whereby the people of Gibraltar would pass under the sovereignty of another state against their freely and democratically expressed wishes.

During 1970 the Spanish Minister for Foreign Affairs again repeated Spain's undying determination to re-establish sovereignty over Gibraltar. But Britain continues to stand by the assurances given in 1969.

Gibraltar joined the EEC with U.K. on January 1st, 1973, under the provisions of the Treaty of Rome relating to European territories for whose external relations a member state is responsible, but at her own request is excluded from the Common External Tariff and agricultural policy. There is no value added tax in Gibraltar.

In late 1973 Spain appealed to the UN in a fresh campaign to acquire sovereignty over Gibraltar and to put an end to its colonial status. While the likelihood of this venture succeeding is slight, a compromise solution is a possibility.

Government

Under the Gibraltar (Constitution) Order in Council, 1964, Gibraltar attained a large measure of internal self-government.

This Order has now been superseded by the Gibraltar Constitution Order 1969, which gives Ministers certain responsibilities in defined domestic matters. Executive authority is vested in the Governor, who is advised by the Gibraltar Council composed of five elected and four *ex-officio* members. The Council of Ministers is presided over by the Chief Minister.

Under the new Constitution the Legislative and City Councils have been merged to form the Gibraltar House of Assembly consisting of a Speaker appointed by the Governor, fifteen elected members, and two *ex-officio* members.

Elections take place every four years.

Defence

There is a local Defence Force—The Gibraltar Regiment—which, following the abolition of conscription, has been reorganized as a Volunteer Reserve Unit. Its complement is 18 officers and 211 soldiers. United Kingdom Naval, Army and Air Force Units are stationed at Gibraltar which is also a NATO Sub-Command. In August 1965, a Headquarters Unit of the Royal Naval Reserve was formed to assist in manning the Maritime Headquarters in Gibraltar.

GIBRALTAR—(INTRODUCTORY SURVEY)

Economic Affairs

Owing to the absence of natural resources, the chief factors in the economy are the thriving tourist industry, the operation of the Admiralty Dockyard, services supplied to shipping and the re-export of manufactured goods. In 1972 the Gross Domestic Product was estimated at £9 million, of which 65 per cent came from British military spending.

Since her isolation from Spain, Gibraltar has had to diversify her economy, and many Gibraltarians have adopted second jobs. The tourist industry has adapted to attract long-stay visitors, while the port facilities are being extended to accommodate deeper draughted vessels and attract more merchant shipping in addition to military vessels. Further light industry has been introduced and work has begun on a semi-industrialized housing project on reclaimed land. The building industry, in particular, benefits from Government training schemes introduced to compensate for the loss of Spanish skilled workers, and a £15 million building programme, partially financed by a British Government loan, is under way for the period 1971-76.

For the period 1973-76 a development programme is in train financed to a large extent by British aid and involving expenditure of approximately £6.5 million in the public sector. The most important item continues to be the provision of housing, and an estate comprising 650 new dwellings is being built on reclaimed land. Work has also started on a sports centre which will provide facilities for most indoor sports. In the private sector a new 200-bed hotel has recently been completed and another of 500 beds is nearing completion. British aid to Gibraltar during the financial year ended March 1973 amounted to approximately £1.5 million.

While trade and tourism have obviously been affected by the closure of the frontier by the Spanish Government, Sir Joshua Hassan's Government, elected in June 1972, intends to develop further the private sector of the economy, in order to offset the effects of the restrictions, and to increase the number of companies having their registered offices in Gibraltar.

Transport and Communications

The Port offers good anchorage for ships of all tonnages. Wharf space is ample for both landing passengers and handling cargo, and there are dry dock facilities and a commercial ship repair yard. Tax concessions are available to ship-owners who register their ships at Gibraltar. Since the closure of the Suez Canal sea communication with North European and Mediterranean ports is limited, and there are now no regular passenger services, though P. and O. and British India lines make occasional calls. However some 90 cruise ships per annum call at Gibraltar and will on occasion take passengers, and a passenger and car-ferry service operates between Gibraltar and Tangier on week-days. Air services are frequent to the United Kingdom and Tangier, and weekly to Madrid. There are bus services and taxis but no railway.

Social Welfare

The Social Security system consists of two contributory schemes covering employment injuries insurance and social

insurance and three non-contributory schemes financed from the general revenue and covering unemployment benefits and retirement pensions, family allowances and supplementary benefits. There are special arrangements to cater for blind persons, the aged and discharged prisoners.

Education

Education is compulsory between the ages of 5 and 15 and provided free in government schools. There are several nursery schools, eleven government primary schools, two Services schools administered by the Ministry of Defence for the children of military personnel, two private schools and two comprehensive schools—one for boys and one for girls. Scholarships for university students are provided by the Government and from private sources.

Tourism

The airport and sea facilities have made Gibraltar a centre of communications for the West Mediterranean countries and North Africa. The restriction of land communications with Spain has stimulated the development of Gibraltar as a tourist centre in its own right, where the transient visitor is being replaced by the long-stay tourist and package holidays are increasing. The expansion of hotels and the casino, the improvement of beaches and the provision of amenities have all contributed to this change. Conference facilities are being provided including a conference hall with 160 seats already in use in one of the large hotels. Cruise traffic is growing, and the virtually duty-free shopping facilities in Gibraltar have led to an increase in the number of cruise passengers taking excursions ashore.

Visas are not required except for: (a) stateless persons, (b) nationals of Albania, Bulgaria, People's Republic of China, Cuba, Czechoslovakia, German Democratic Republic, Hungary, Mongolia, Democratic People's Republic of Korea, Poland, Romania, U.S.S.R. and Democratic Republic of Viet-Nam, who will not, however, require visas when travelling in direct transit by air.

Sport

There is a great variety of sport including fishing, swimming, water-skiing, football, hockey, tennis, athletics, rowing and cricket.

Public Holidays

THE CONSTITUTION

Gibraltar is a Crown Colony, and the supreme authority is vested in the Governor and Commander-in-Chief, who is the representative of the Queen. Relations with the British Government are maintained through the Foreign and Commonwealth Office.

In 1830 the first Charter of Justice was given to the City and a Magistracy established; thus the advantage of civil liberty was accorded to the inhabitants.

On December 1st, 1921, the creation of the City Council gave the inhabitants of Gibraltar a certain representation in the management of municipal affairs. In addition a Legislative Council, defined by an Order-in-Council, was inaugurated by H.R.H. The Duke of Edinburgh on November 23rd, 1950, and included elected members. Its composition was modified several times, notably by the Gibraltar (Constitution) Order, 1964 and the Gibraltar Royal Instructions, which gave it greater control of internal affairs.

Since 1969 Gibraltar has had full control over most of her own internal affairs, while Britain continues to be responsible for matters of external affairs, defence and internal security. Following the Referendum of September, 1967, in which the people of Gibraltar showed their overwhelming support for remaining under British sovereignty, discussions on appropriate constitutional changes took place between the British Government and representatives of Gibraltar during 1968. The resultant new Constitution was introduced in August, 1969, as an Annex to the Gibraltar Constitution Order 1969 and in conjunction with the Gibraltar Royal Instructions 1969. The Constitution contains a code of human rights and provides for its enforcement by the Supreme Court of Gibraltar. The other main provisions are described below.

BRITISH SOVEREIGNTY

The Preamble to the Gibraltar Constitution Order contains assurances that Gibraltar will remain part of Her Majesty's dominions unless and until an Act of Parliament otherwise provides and that Her Majesty's Government will never enter into arrangements under which the people of Gibraltar would pass under the sovereignty of another

State against their freely and democratically expressed wishes.

THE GOVERNOR AND COMMANDER-IN-CHIEF

As representative of the Queen, the Governor and Commander-in-Chief is responsible for matters which directly relate to external affairs, defence and internal security and certain other matters not specifically defined as domestic matters. He is also head of the executive and administers Gibraltar in accordance with the Gibraltar Constitution Order 1969 and the Gibraltar Royal Instructions 1969, acting generally on the advice of the Gibraltar Council. In exceptional circumstances he has special powers to refuse any advice from the Gibraltar Council which may not be in the interests of maintaining financial and economic stability. His formal assent on behalf of the Crown is required for all legislation and in some cases the prior concurrence of the Crown conveyed through the Secretary of State.

THE GIBRALTAR COUNCIL

Consists of the Deputy Governor, the Deputy Fortress Commander, the Attorney-General, the Financial and Development Secretary, *ex-officio*, the Chief Minister, who is appointed by the Governor as the Elected Member of the House of Assembly most likely to command the confidence of the other Elected Members, and four other Ministers designated by the Governor after consultation with the Chief Minister. Advises the Governor, who usually acts on its advice.

COUNCIL OF MINISTERS

Consists of the Chief Minister and not less than four nor more than eight other Ministers appointed from the Elected Members of the Assembly by the Governor in consultation with the Chief Minister. It is presided over by the Chief Minister and deals with domestic matters which have been defined as such by the Constitution. Individual Ministers may be given responsibility for specific business. Heads of Departments and other government officials appear before it when required.

GIBRALTAR—(THE CONSTITUTION, THE GOVERNMENT, POLITICAL PARTIES)

HOUSE OF ASSEMBLY

With the coming into force of the Gibraltar Constitution Order 1969 and Royal Instructions 1969 on August 11th, 1969, the Legislative and City Councils were merged to form the Gibraltar House of Assembly.

The Legislative Council consisted of the Speaker, eleven elected members and two *ex-officio* members (the Attorney-General and the Financial Secretary); the City Council consisted of seven elected members and four appointed by the Governor. The House of Assembly is composed of a Speaker, 15 elected members and two *ex-officio* members (the Attorney-General and the Financial and Development Secretary). The Speaker is appointed by the Governor after consultation with the Chief Minister and the Leader of the Opposition.

The normal life of the House of Assembly is four years. Elections are open to all adult British subjects and citizens of the Republic of Ireland who have been ordinarily resident in Gibraltar for a continuous period of six months up to the date for registration as an elector. The voting age is 18. The system of proportional representation formerly used for Legislative Council elections has been abandoned in favour of a new system where each elector may vote for a maximum of eight candidates.

The Elected Members of the House of Assembly elect the Mayor from amongst themselves, and he carries out ceremonial and representational functions on behalf of the City of Gibraltar.

GREECE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Hellenic Republic is a mountainous peninsula between the Mediterranean and Aegean, bounded to the north by Albania, Yugoslavia and Bulgaria and to the east by Turkey. Numerous Greek islands lie to the south, east and west, of which the largest is Crete. The climate is Mediterranean with mild winters and hot summers. The language is modern Greek, of which there are two forms—*katharevousa*, the formal language, and *demotiki*, the language commonly spoken. The Greek Orthodox Church is the established religion. The Greek national flag (proportions 12 by 7) consists of nine horizontal stripes (five blue and four white, alternating), with a white cross dividing a blue square into four equal parts in the top left-hand corner. The capital is Athens.

Recent History

The liberation of Greece from the German occupation was followed by a civil war which lasted until 1949. The Communist forces were defeated, and the constitutional monarchy re-established. In the 1963 elections the Centre Union, led by Georgios Papandreou, obtained an overall majority but the Papandreou Government resigned in 1965 when King Constantine opposed some of the Prime Minister's proposals. A series of short-lived minority governments followed and fresh elections were planned for May 1967. These were forestalled by a military *coup d'état* on April 21st, 1967. The King's attempted counter-*coup* failed, and he fled to Rome. Colonel Georgios Papadopoulos emerged as the dominant figure in the new régime, becoming Prime Minister in December 1967 and also Regent in March 1972. A new constitution was produced in 1968, but Greece continued to be ruled by the strict and sometimes brutal methods of the military junta. A Legislative Advisory Committee was elected in 1970, but in the absence of Parliament their deliberations were of little significance. The cabinet continued to rule by decree and maintain order by martial law. Following an abortive naval mutiny, said to be supported by the exiled King, Greece was declared a republic on June 1st, 1973. The republic, a presidential form of government and the appointment of Papadopoulos as President were approved by a referendum on July 29th, 1973.

Some moves were made towards a return to parliamentary rule; an amnesty for political prisoners, the restoration of civil and human rights, the ending of martial law and the appointment of a civilian cabinet led by Spyros Markezinis were announced as preparations for elections, to be held by the end of 1973. The elections were never held; a violent student uprising, the rapidly deteriorating economic situation and fears of a too rapid progress towards elections led to another military *coup* on November 25th, 1973. Lieutenant-General Phaidon Ghizikis took the presidency, and a mainly civilian cabinet, with Adamantios Androussopoulos as Prime Minister, was appointed.

Once again, Greece experienced rule by decree and martial law. A new Constitutional Act was announced, giving considerable powers to the President, including the appointment of ministers, until such time as a Parliament is elected.

Government

On June 1st, 1973, Georgios Papadopoulos, Prime Minister and Regent of Greece, declared the establishment of the Hellenic Republic. The 1968 Constitution was amended to remove those sections concerning the monarchy, and twelve principles establishing a presidential form of government were adopted, with provisions for an eventual return to parliamentary rule. The Government established by the *coup* of November 1973 produced a Constitutional Act on December 17th, 1973. The powers of the President were reduced, but until a Parliament is elected the President and Council of Ministers will continue to rule by decree.

Defence

Greece is a member of NATO. Military service is compulsory and lasts two years. The armed forces number 159,000, consisting of an Army of 118,000, a Navy of 18,000 and an Air Force of 23,000; there is a Gendarmerie of 23,500 and also a National Guard of 68,000. Defence estimates for 1973 totalled 17,366 million drachmae.

Economic Affairs

Greece has traditionally been an agricultural nation, producing most of its own needs and exporting a considerable amount of produce. Although only about a quarter of the land is cultivable, the rest being mountain and marshland, Greece produces large quantities of wheat, barley, maize, tobacco, sugar beet, tomatoes and other fruit.

In 1970 manufactures contributed more to the gross domestic product than agriculture for the first time, as a result of a government policy of rapid industrialization. The marked growth in both investment and production following the army *coup* in 1967 was particularly effective in the fields of metallurgy, chemicals, textiles, rubber, plastics and electrical machinery and appliances. Mineral resources are intensively exploited, and a major development in the progress of the Greek economy has been the processing of an expanding proportion of the ores in Greece, rather than exporting raw materials. Electricity output nearly doubled between 1966 and 1971, new power stations having been built to use lignite deposits and reduce dependence on imported fuel oil, and hydro-electric power resources are being developed. Exports of manufactures accounted for 35 per cent of all exports in 1972; in 1962 the figure was only 6.1 per cent.

Industrialization and the expansion of exports, which quadrupled in ten years from 1962-3 to 1972-3, have not saved Greece from a large balance of payments deficit. On the other hand, invisible earnings from the merchant fleet

GREECE—(INTRODUCTORY SURVEY)

and tourism have risen rapidly in recent years. About one-fifth of Greek exports go to Federal Germany, and 43 per cent to the enlarged EEC. Over 53 per cent of imports came from the EEC in 1972. The association agreement between Greece and the EEC, which came into force in 1962, protects Greek industry from EEC imports but allows Greek industrial products to enter the EEC duty-free. Progress towards full membership of the EEC has been "frozen" since the 1967 *coup*.

The economic growth of the 1960s helped to reduce unemployment and emigration, and for some years the drachma was exceptionally stable, but in 1973 the cost of living rose by some 40 per cent. In October the drachma was temporarily revalued by 10 per cent, and cuts in public expenditure were announced. Shortly before the November 1973 *coup* all wages were increased by 20 per cent.

Transport and Communications

Although Greece's railways were almost completely destroyed during the Second World War, there is now 2,572 km. of track. A network of over 39,000 km. of roads now covers the country, but many of these are unclassified; there are 8,042 km. of main roads and 27,248 km. of secondary roads. The three-mile Corinth Canal shortens the sea journey from the Adriatic to Piraeus (port of Athens) by 202 miles. Greece has a large mercantile marine of over 21 million tons. Important towns and islands are connected by air transport.

Social Welfare

There is a state social insurance scheme for wage-earners. Salaried staff are provided for by voluntary or staff insurances. Everyone is entitled to an old-age pension and sickness benefit.

Education

Education is free at all levels, and compulsory for all children between the ages of 6 and 12. Just under one million children receive primary education and some 438,000 secondary. The illiteracy rate has been reduced from 72 per cent to less than 10 per cent in the last thirty years. There are five universities attended by 60,000 students.

Tourism

The sunny climate, the natural beauty of the country and its great history and traditions have made Greece a magnet for tourists. There are numerous islands of archaeo-

logical interest. The industry is expanding rapidly with the improvement of transport and accommodation facilities. Under the Five-Year Plan (1973-77) it is expected to increase its hotel capacity to 300,000 beds compared with 135,377 beds in 1971, to earn \$1,000 million in foreign exchange, and to have some six million foreign visitors by 1977. In 1972 2,731,587 people visited Greece, and the total was expected to reach three million in 1973.

Receipts from tourism reached \$305 million in 1971, reflecting a growth of more than 57.7 per cent over 1970 and accounting for 24.3 per cent of the country's total "invisible" earnings. In the first ten months of 1973 earnings from tourism rose still further, to U.S. \$393 million.

Visas are not required for nationals of the following countries: Argentina, Australia, Austria, Bahrain, Belgium, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, France, Federal Republic of Germany, Ghana, Guatemala, Haiti, Honduras, Iceland, Iran, Ireland, Italy, Japan, Kenya, Liechtenstein, Luxembourg, Malawi, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Nicaragua, Norway, Oman, Pakistan, Panama, Paraguay, Peru, Portugal, Qatar, San Marino, South Africa, Spain, Sweden, Switzerland, Tanzania, Tunisia, Turkey, United Arab Emirates, United Kingdom, U.S.A., Uruguay, Venezuela and Zambia.

Sport

Football is the most popular game.

Public Holidays

1974: May 1 (May Day), June 3 (Holy Spirit Day), August 15 (Assumption), October 28 ("Ochi" Day), December 25, 26 (Christmas).

1975: January 1 (New Year's Day), January 6 (Epiphany), March 17 (First Day of Lent), March 25 (National Day).

Weights and Measures

The Metric System is in force.

Currency and Exchange Rates

100 lepta = 1 drachma.

Exchange rates (March 1974):

£1 sterling = 69.505 drachmae;

THE CONSTITUTION

CONSTITUTIONAL monarchy was instituted in Greece when the first Constitution was granted by King Otho on September 3rd, 1843. Formerly known as Prince Otto of Bavaria, he ascended the throne at the age of 18 in 1833, three years after Greece achieved her full independence from Turkey. Revolution, reaction, and foreign embroilment shook the country repeatedly. In 1862 Otho was expelled and his place was taken in 1863 by Prince William, the younger son of the King of Denmark, who assumed the title of George I. The dynasty was shaken by the ascent to the throne of his son Constantine in 1913. King George II, who came to the throne when his father, Constantine, abdicated in 1922, was compelled to leave the country on December 19th, 1923. The dethronement of the dynasty was proclaimed by the Papanastasiou Government in 1924, as a result of the crisis brought on by the disastrous termination of the Asia Minor expedition in 1922. A plebiscite held on April 13th, 1924, confirmed the republican régime, and the republican Constitution was formally promulgated in 1927.

On the restoration of the monarchy in the person of King George II in 1935, after a plebiscite, the 1863 Constitution, as amended in 1911, was again adopted, with certain changes, of which the most important was the institution of the Council of State. This supreme administrative tribunal, formed on the French model, examined the validity of decrees and tried cases between the State and private individuals, thus forming an important bulwark against arbitrary State action on the part of Government officials or departments.

Parliamentary government in accordance with the Constitution continued until August 4th, 1936, when certain basic provisions of the Constitution were suspended by the Prime Minister, General Ioannis Metaxas, with the consent of the King. This action had been preceded by a period of political deadlock and internal unrest. The Metaxas Government assumed dictatorial powers, dissolved Parliament, and suspended the main provisions of the Constitution which had hitherto protected the liberties of the Greek people, such as the freedom of the Press, freedom of assembly, parliamentary and municipal elections, habeas corpus, etc.

The dictatorship of General Metaxas lasted until the occupation of Greece by the Axis Powers in 1941. The parliamentary system was restored after the liberation of

Greece in 1944. The Constitution was re-established, and the first elections held since January 1936 took place on March 31st, 1946. A revised Constitution was promulgated on January 1st, 1952. This Constitution left the fundamental provisions of the 1911 Constitution intact. The military junta headed by Col. George Papadopoulos which seized power in April 1967 suspended the constitution, but promised a quick return to democratic government.

The military junta produced a new Constitution in 1968, but its provisions relating to the election of a parliament and the exercise of civil and human rights remained in abeyance. After the proclamation of the Hellenic Republic on June 1st, 1973, a referendum was held which approved the twelve principles amending the 1968 Constitution. Constitutional Monarchy was replaced by what was described as a Presidential Parliamentary Republic. Under the revised Constitution, considerable powers were given to the President, who had exclusive jurisdiction over national defence and security, foreign affairs and public order, and appointed the ministers for these departments, as well as the Prime Minister. The President also had the power, as Commander-in-Chief of the armed forces, to proclaim martial law, and could appoint 20 of the 200 members of Parliament when one was elected. Some steps towards the holding of elections had been made when President Papadopoulos and his régime were overthrown by another military *coup*.

The Constitutional Act published on December 17th, 1973, abolished both the presidential autocracy of the previous régime and the plans for a return to parliamentary rule. The exclusive powers of the President in defence, foreign affairs and public order were abolished, and his term of office reduced from seven to five years. The post of Vice-President was abolished. The President was given the right to convene the Council of Ministers and to preside at its meetings. Until Parliament begins to function—an event for which no date was given—the President appoints and dismisses the government, and on the recommendation of the Council of Ministers he can introduce or lift martial law. The form of government in Greece, in practice rather than the parliamentary theory of the Constitution, is rule by decree. The Council of Ministers and the President have total power, giving their instructions by means of constitutional acts, and despite the temporary and provisional nature of this arrangement, no schedule for a return to parliamentary rule has been published.

POLITICAL PARTIES

At present no political parties are permitted in Greece.

The following parties were suspended by the military junta in April 1967, following the dissolution of the Chamber of Deputies in February:

Centre Union: f. 1961 by G. PAPANDREOU; coalition of Liberals and Progressives together with several smaller groups.

Liberal Democratic Centre Party: f. December 1965 as a breakaway party from the Centre Union by 45 members of the Chamber of Deputies who had supported the Government of Stephanos Stephanopoulos in September 1965.

National Radical Union (*Ethniki Rizospastiki Enosis*): f. 1956 by Constantine Karamanlis; provided the Government elected February 1956 which lasted until 1963; policy of expanded production and economic stability.

E.D.A. (*Ethniki Demokratiki Aristiki*): extreme left party; f. 1953.

Progressive Party: led by SPYROS MARKEZINIS.

Despite the ban on political activity, several clandestine political parties are known to be active in Greece. They include the **Communist Party**, the **Patriotic Front** (also Communist), **Democratic Defence**, and the **Pan-Hellenic Liberation Movement**.

JUDICIAL SYSTEM

The Courts of Law administering justice in Greece are as follows:

The Supreme Court. This is the supreme court in the State, having also appellate powers. It consists of four sections, three Civil and one Penal, and adjudicates in quorum. President V. PATSOURAKOS.

Prosecutor: PANAYIOTIS THERAPOS.

Courts of Appeal. These are eleven in number. They have jurisdiction in cases of Civil and Penal Law of second degree, and, in exceptional cases, of first degree.

Courts of First Instance. There are fifty-eight Courts of First Instance with jurisdiction in cases of first degree, and in exceptional cases, of second degree. They are mixed courts, functioning both as Courts of First Instance and as Penal Courts.

In towns where Courts of First Instance sit there are also Criminal Courts and Juvenile Courts. Commercial Tribunals do not function in Greece, and all commercial

cases are tried by ordinary courts of law. There are, however, Tax Courts in some towns.

Courts of the Justice of Peace. There are 360 of these courts throughout the country.

Magistrates' Courts (or simple Police Courts). There are 48.

In all the above courts, except those of the Justice of Peace and the Magistrates' Courts, there are District Attorneys. In Magistrates' Courts the duties of District Attorney are performed by the Public Prosecutor.

The State Council. In addition to the above there is a State Council, with competence over the following cases:

Administrative disputes

Administrative contraventions of law in force.

Revision of Disciplinary procedure on permanent Civil Servants (1952 Constitution, Articles 87-97).

President ALEXANDROS DIMITSAS.

RELIGION

THE ORTHODOX CHURCH OF GREECE

The Greek branch of the Holy Eastern Orthodox Church is the officially established religion of the country, adhered to by nearly 97 per cent of the population. The Church uses the Credo of the Ecumenical Synods of Nicaea and Constantinople, as it was originally formulated that is without the *filioque*, and administers the seven Holy Sacraments. The administrative body of the Church is the Holy Synod of ten members, elected by the 66 bishops of the Hierarchy. The Primate of Greece is the head of the Church. In 1967 a special synod was set up to nominate a Primate, following the *coup*, and chose Archbishop Ieronymos. Ieronymos was closely linked with the Papadopoulos régime, and resigned after the 1973 *coup*. The new government disqualified 34 bishops from the synod called to elect a new Primate. In January 1974 the President chose the Primate from among the three candidates presented by the synod.

Primate of Greece: Archbishop SERAPHIM of Athens.

Within the Greek State there is also the semi-autonomous Church of Crete, composed of seven Metropolitans and the Holy Archbishopric of Crete. The Church is administered by a Synod consisting of the seven Metropolitans under the Presidency of the Archbishop; it is under the spiritual jurisdiction of the Ecumenical Patriarchate of Constantinople, which also maintains a degree of administrative control.

Archbishop of Crete: The Most Reverend EUGENIUS PSALLIDAKIS (whose See is in Heraklion).

There are also four Metropolitan Sees of Dodecanese, which are spiritually and administratively dependent on the Ecumenical Patriarchate and, finally, the peninsula of Athos, which constitutes the region of the Holy Mountain (Mount Athos) and comprises twenty Monasteries. These are dependent on the Ecumenical Patriarchate of Constantinople, but are autonomous and are safeguarded constitutionally.

OTHER CHURCHES

The Roman Catholic Church: Odos Omirou 9, Athens 135; comprises 7 dioceses: 3 archbishoprics (Naxos-Tinos, Athens and Corfu) and 2 bishoprics (Syra, Santorin), 1 Vacariate Apostolic (Salonika) and two exarchates (one for the Byzantine Rite and one for the Armenian Rite). Archbishop of Athens Most Rev. NICOLAUS FOSCOLOS. The Roman Catholic Church has 127 churches.

The Catholic Church of the Greek Rite in Greece has one parish at Athens (Odos Acharnon 246) and another at Jannitsa (Macedonia); Exarch Apostolic Msgr. HYACINTHUS GAD, titular Bishop of Gratianopolis, Odos Acharnon 246; the Church, Catholic exarchate of Byzantine rite, has about 3,000 adherents; publ. *Katholiki* (weekly), the only Catholic paper in Greece (circ. 2,500).

The Greek Evangelical Church (Presbyterian): Bd. Amélie 50, Athens; f. 1886; comprising 30 organized churches; embraces about 1 per thousand of population; member of World Alliance of Reformed Churches; Moderator Rev. STELIOS KALOTERAKIS; publ. *Star of the East* (monthly).

Muslims: their status is regulated by Law 2345, "On Minorities"; the law provides as religious head of the Muslims a Chief Mufti; the Muslims in Greece possess a number of mosques and schools.

The Jewish Community: the Jewish population of Greece, estimated in 1943 at 75,000 people, was decimated as a result of the German occupation. In 1973 there were about 5,000 Jews in Greece. The Rabbi of Athens is JACOB D. ARAR; temple and offices: 5 Melidoni Street, Athens. The officially recognised representative body for the community is the *Central Board of the Jewish Communities of Greece*, Odos P. Tsaldari 46, Athens; f. 1945; Pres. JOSEPH M. LOVINGER.

THE PRESS

At the beginning of 1967, 123 dailies were being published in Greece, 13 being based in Athens and competing for a share in a total circulation of only 700,000. After the *coup d'état* of April 1967, the number of papers in Athens was halved, total circulation dropped by a third and the remainder of the press was subject to censorship.

Despite constitutional guarantees of press freedom, the Papadopoulos régime exercised strict control over Greek newspapers and magazines. After publication of articles offensive to the Government, issues could be seized, writers and editors arrested and papers closed. State-controlled advertising, a means of subsidizing friendly papers, could be withdrawn as an economic sanction. Post-publication censorship proved an effective means of controlling the dissemination of news.

Immediately after the 1973 *coup* Athens newspaper editors were told that censorship had been lifted, and that they were free to publish whatever they pleased. At the same time, the commander of the Military Police warned editors not to sabotage the new government by printing rumours and other embarrassing items, or anything likely to cause "fear or anxiety among the people". The press was told that it cannot be an enterprise run only for profit. The limits to the new freedom of the press, and the authorities' attitude to criticism were shown by the closure of the Athens daily paper *Vradyni* and the fortnightly *Christianiki*, each of which welcomed the fall of Papadopoulos, but expressed the hope that democracy could soon be restored. In the absence of preventive censorship, the permissible limits of comment are unclear. Control of the press rests with the Military Police, whose policy was demonstrated in the week following the *coup*. The five publishers of the eight national newspapers published in Athens were summoned by the leaders of the Military Police and told to support the new régime or to leave the country.

Jonction-Salonique-Constantinople and the Cie. des Chemins de Fer Orientaux; in 1954 the State Railways absorbed the Franco-Hellenic Railways and the Thessalian Railways and in 1962 the Peloponnes Railways and the Railways of North-West Greece. Started operating as Hellenic Railways Organization Ltd. in 1971. Total length of track: 2,572 km. Gov. P. CHRISTOPOULOS; Vice-Gov. AL. MALASPINAS; Gen. Dirs. M. KALLIANIS, G. MESSOLOGUITIS.

ROADS

There are 39,000 km. of classified roads in Greece. Of this total 8,042 km. are main roads. Several major roads are under construction, including the Egnatia highway (800 km.) linking all districts in north and north-west Greece and a major road connecting eastern and western Crete. The Athens-Lamia-Larissa-Thessaloniki highway, and the Corinth-Patras highway are now in use. Work is also in progress on the Thermopylai-Antirion road.

MOTORING ORGANIZATION

Automobile and Touring Club of Greece (ELPA): 2-4 Mesogion St., Athens 610; f. 1924; 14,500 mems.; publ. *Road Assistance*.

INLAND WATERWAYS

There are no navigable rivers in Greece.

The Corinth Canal: built 1893; over three miles long, links the Corinthian and Saronic Gulfs; depth 26½ ft., bottom width 69 ft., surface width 81 ft. The Canal shortens the journey from the Adriatic to the Piraeus by 202 miles; it is spanned by two single-span bridges, one for road and one for rail. During 1972, 10,367 ships with a total tonnage of 5,479,502 n.r.t. passed through the Corinth Canal. In the first eleven months of 1973 10,618 ships used the canal.

SHIPPING

Merchant shipping accounted for 27.1 per cent of the country's total "invisible" earnings in 1972 with an inflow of some \$433.5 million; these earnings increased by 34.3 per cent in the first nine months of 1973. The development of the merchant fleet has led to the emergence of the shipbuilding and repairing industry. Hellenic Shipyards at Skaramanga, with its 250,000 d.w.t. graving dock, has a capacity of 6 bulk carrier ships of 25,000 tons each a year.

A 500,000 ton d.w. dock is under construction. Eleusis Shipyards are building a bulk carrier of 43,000 tons, and larger ships are planned.

On October 31st, 1973 there were 3,093 merchant ships under the Greek flag, including 2,135 cargo vessels, 447 tankers and 302 passenger ships, totalling 22,938,893 g.r.t. On September 30th, 1973 a further 1,342 Greek-owned and crewed ships were sailing under foreign flags.

Three of the largest shipping companies are:

Hellenic Lines, Ltd.: 79-81 Filonos St., Piraeus; U.S. Atlantic and Mexican Gulf ports; Mediterranean, Red Sea, Persian Gulf and India; Black Sea and Mediterranean-U.K. and European ports; Adriatic ports, East, West and South Africa; Gen. Man. P. G. CALLIMANOPOULOS.

HUNGARY

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Hungary is a state in Eastern Europe, bounded to the north by Czechoslovakia, to the east by the U.S.S.R. and Romania, to the south by Yugoslavia and to the west by Austria. Its climate is Continental with long, dry summers and severe winters. The language is Hungarian (Magyar). Roman Catholics are the largest single religious denomination with over six and a half million adherents. Other groups are the Hungarian Reformed Church, the Lutheran Church, the Hungarian Orthodox Church and a Jewish community numbering about 80,000. The national flag (proportions three by two) consists of three horizontal stripes of red, white and green. The capital is Budapest.

Recent History

Hungary allied herself with Germany during the Second World War, and having sought to break the alliance in 1944 was occupied by German forces. Liberated in 1945 by Soviet troops, Hungary became a Republic a year later. Land redistribution and nationalization measures followed, despite opposition from the Roman Catholic Church under Cardinal Mindszenty, until in 1949 a People's Republic was declared. Mátyás Rákosi became the leading figure as First Secretary of the Workers' Party. Opposition was subsequently removed by means of purges and political trials. Rákosi became Prime Minister in 1952 but after the death of Stalin a year later lost this post to the more moderate Imre Nagy, and a short period of liberalization followed. Rákosi, however, remained as First Secretary of the Party and in 1955 Nagy was forced to resign and András Hegedüs, sponsored by Rákosi, was appointed Prime Minister. In-fighting between the Rákosi and Nagy factions increased in 1956 after the revelations of the 20th C.P.S.U. Congress in Moscow; in July Rákosi was forced to resign but was replaced by a close associate Ernő Gerő. The consequent discontent led to demonstrations in October 1956 which resulted in the return as Prime Minister of Nagy, who promised reforms and in November formed a coalition government. Soviet troops had already entered Hungary, however, and when they had occupied Budapest, a new government was announced under János Kádár, who had taken over as Party leader shortly before. Kádár held the premiership until 1958 and then from 1961 to 1965, and under his leadership government has become less severe and more stable. Economic reforms, in particular those introduced in 1968, have brought a considerable increase in the standard of living and they have been accompanied by modest social and political reforms. The National Assembly elections of 1971 proved to be a cautious experiment in extending democracy, strengthening the right of the electorate to nominate candidates and giving them the opportunity to nominate two or more candidates for a given constituency, thus providing wider representation in the Assembly. The results showed a 98.9 per cent vote in favour of the People's Patriotic Front.

Hungary was admitted to the United Nations in 1955, and is closely aligned with the countries of Eastern Europe

through her membership of the Warsaw Pact, whose forces she joined in entering Czechoslovakia in 1968.

Government

The highest organ of state power is Parliament elected every four years by all citizens over 18 years. Parliament elects the Presidential Council consisting of the President, who is the Head of State, two Vice-Presidents and 17 members. The Council exercises power between sessions of Parliament but it is responsible to it. The highest organ of state administration is the Council of Ministers, elected or removed by Parliament at the suggestion of the Presidential Council. The Hungarian Socialist Workers' Party plays an important part in government through its Central and Political Committees.

Under modifications to the electoral law which came into effect for the 1971 elections, the sole right to nominate candidates for the National Assembly is vested in public pre-election nomination meetings open to all voters. Two or more candidates can be nominated for a single seat, provided each receives the backing of at least 30 per cent of those present, and where the seat is contested the successful candidate must gain 50 per cent or more of the votes cast. Any elector is entitled to stand.

Defence

Hungary was a founder member of the Warsaw Pact in 1955 and in 1969 joined the Geneva Disarmament Commission. Military service starts at the age of 18 years and lasts for a maximum of three years. Total regular forces number 103,000, comprising Army 90,000, Air Force 12,500 and Navy 500. There is also an armed force of 27,000 security troops and border guards known as Workers' Guards, and a Workers' Militia of 250,000. The 1973 budget provided 16,117 million forints for defence expenditure.

Economic Affairs

In 1968 a new system of economic management was introduced, known as the "new economic mechanism". The official definition of the plan is "to harmonize State planning and market development". Until then the economy had been based on the standard Soviet central planning system, but under the new scheme industry is being decentralized to a certain extent. The aim is to evolve a Socialist market economy in which business enterprises produce what they want, engage in competition on the domestic and foreign markets and share profits among the workers. The reform was introduced during the country's third Five-Year Plan (1966-70) in which all major targets, with the exception of labour productivity, were exceeded. National income in 1970 was 39 per cent higher than in 1965, representing an average annual growth of 7 per cent, and foreign trade turnover went up by more than 50 per cent. Real wages rose by an average of almost 17 per cent, while prices were only 3.5 per cent higher. Targets for the fourth Five-Year Plan (1971-75) highlight the modernization of existing industry and the continued expansion of both national and personal incomes. Specific aims include an increase in the use of natural gas and oil as sources of

power and of computers in industry, and plans to make Hungary one of the largest exporters of buses in Europe.

Hungary was formerly a predominantly agricultural country but since the war, industry has come to account for more than half of her total economy. Hungary is an exporter of engineering products, machine tools, buses, telecommunications and electrical equipment, electronic and other instruments. She is still a large exporter of meat, fruit and vegetables and half her exports to Western European countries consists of agricultural produce. Following record crops in 1969 and the export of large amounts of wheat and maize, serious floods brought about a considerable drop in production in 1970. The 1971 harvest showed an 11 per cent increase while in 1972 the increase was 4 per cent. In 1973 there was a further overall increase in agricultural production of 5 per cent, with a record grain harvest of 11,500,000 tons. Over 97 per cent of the total arable area of the country is collectivized. Vineyards cover 500,000 acres. Chief imports are coal, iron ore, crude oil, coke, cotton, timber and consumer goods.

Hungary is a member of the Council for Mutual Economic Assistance (Comecon) and in July 1969 she submitted formal application for membership of GATT. This was accepted and she joined GATT in September 1973. In 1973 trade with members of Comecon and other socialist countries accounted for 66 per cent of total foreign trade.

Transport and Communications

The Hungarian State Railways operate 8,603 kilometres of track of which 1,054 kilometres are electrified. Budapest's first deep-level underground railway started operation on April 4th, 1970, when the first 4½ miles out of a total of 6½ opened. The second section of this east-west line, running under the Danube and linking Pest with Buda, opened in December 1972. Work is now in progress on a north-south line, due to open in 1976. There are about 29,700 kilometres of main or secondary roads, representing about 27 per cent of the total road network. Navigable inland waterways total some 1,633 kilometres. There is a small merchant fleet using mainly Hungarian-built vessels of an average tonnage of 1,100 tons. These operate from the Danube to Mediterranean ports and the United Kingdom. The state airline MALÉV has an extensive network of flights to Europe and the Middle East, but there are no internal flights in Hungary.

Social Welfare

Since April 1st, 1972, all Hungarian citizens have been covered by the country's social insurance network; in the same month the right to care in sickness, old age or disability was written into the Constitution. Before that date about 97 per cent of the population were covered automatically through their employment or membership of a co-operative, while self-employed persons were free to contribute if they wished.

Today the national insurance scheme is largely non-contributory. The employed person, whatever his job, pays a contribution to the pension fund—3 per cent of wages for the average worker, higher for those earning more up to a maximum of 10 per cent of salary. The employer pays 4 per cent into the pension fund for each person employed. Cost of health services and other social services are met by state subsidies and contributions for the place of work. Members of agricultural and handicraft co-operatives pay

a small monthly contribution, while under the new regulations introduced in April 1972, self-employed persons must now pay a monthly contribution which varies with income. Those who earn below a certain limit, however, are exempt.

Social insurance covers sickness benefits which are available from the first day of sickness. Patients are entitled to sick pay for one year, or two years in the case of tuberculosis. All medical consultation and treatment is free, although a charge of 15 per cent of the total price is generally made for medicines and medical appliances. The social insurance scheme also covers maternity benefits—insured women are paid confinement grants for 20–24 weeks—free layettes, child care allowance (a new service which allows a mother to look after her child at home until he is 3 years old), and family allowances which vary according to the number of children in the family.

In Hungary special pension laws determine the right of employed workers, members of agricultural co-operatives, and private tradesmen to pensions. Male workers are entitled to old-age pensions at the age of 60 years (55 for women), if they have been employed for at least ten years. Workers who have been employed in heavy or unhealthy work may qualify for pension five years earlier than this. The employment period for a full pension is 25 years and this pension amounts to 50 per cent of the worker's average wage prior to retirement, plus 1 per cent of this basic pension for every year worked. Various other pensions are paid under the Hungarian social insurance scheme; these include invalid pensions, widows' pensions, and orphans' allowances.

Education

The Educational Act of 1961 modernized the Hungarian educational system and provided the basis of the present-day system. Various changes have been made since 1961, including the revision of the basic school system in 1963, and the introduction of a uniform curriculum in the grammar school in 1965. Children under the age of 3 years attend crèches (*bölcsődék*), and those between the ages of 3 and 6 years attend kindergartens (*óvodák*). Neither of these schools is compulsory and, although attendance is increasing, they are not so well-attended as elsewhere in Eastern Europe. Compulsory education begins for the Hungarian child at 6 years of age when he attends the basic school (*általános iskola*). Basic education continues until the child is 14, during which time he will be taught general subjects together with some practical training. Provision is made in the basic school for talented children, particularly those who are linguistically inclined. Facilities for secondary education were improved as a result of the 1961 Educational Act. Children are now required to attend school until the age of 16 years. There are four types of secondary school, excluding special schools for the very gifted or, alternatively the backward or abnormal child. Children who do not wish to continue with their schooling after the age of 16 years attend the *továbbképző iskola* for two years, in order to complete their compulsory schooling. The majority of children prefer to continue with their education after 16 years of age. The most popular types of secondary schools are the grammar school (*gimnázium*) and the *technikum*. The *gimnázium* provides a four-year course of mainly academic studies, although some vocational training does figure on the curriculum. The *technikum*

HUNGARY—(INTRODUCTORY SURVEY, STATISTICAL SURVEY)

offers full vocational training together with a general education, emphasis being laid on practical work. Apprentice training schools (*ipari tanulóhgyakorló iskolái*), are attached to factories, agricultural co-operatives, etc., and lead to full trade qualifications. General education is less important as part of the curriculum in this type of school. Further educational reform (1973-74) is now being directed at revising the curricula and the way in which the performance of pupils is assessed. One of the main aims is to change the emphasis towards mastering techniques of learning rather than amassing a large volume of facts.

Over the past few years demand for education in Hungary has been increasing at an exceptional rate and this is reflected in the government's promotion of educational expansion. Both the number of higher educational institutes and the number of students have increased considerably since before the Second World War, and there are now about 86,000 students in 62 higher institutes, including 9 universities and 9 technical universities.

Tourism

Tourism is developing rapidly. Lake Balaton is the main holiday centre for boating, bathing and fishing. The cities have great historical and recreational attractions. Budapest has numerous swimming pools watered by thermal springs. In 1973 there were 7,241,000 foreign visitors. A special exchange rate of 58 forints to £1 is available for tourists.

Nationals of Czechoslovakia, Finland, Poland, Romania, U.S.S.R. and Yugoslavia do not require visas to enter Hungary.

Sport

Football is the most popular sport. Swimming, athletics and fencing are also much favoured. Winter sports are popular. Hunting in many parts of the country attracts large numbers of foreign visitors, notably from Germany.

Public Holidays

1974: May 1 (May Day), August 20 (Constitution Day), November 7 (October Revolution Day), December 25 and 26 (Christmas).

1975: January 1 (New Year's Day), April 4 (Liberation Day), April 15 (Easter Monday).

THE CONSTITUTION

(Adopted in August 1949; amended April 1972.)

NATIONAL STATUS

Hungary is a People's Republic, a State of workers and working peasants, in which all power belongs to the working people and is exercised through elected representatives. The Republic defends the power and liberty of the working people and the independence of the country and opposes the exploitation of man.

SOCIAL STRUCTURE

The bulk of the means of production is owned by the State, by public bodies or by co-operative organizations, and state and co-operative ownership enjoy equal status. Means of production may also be privately owned. The national economy is directed by the State power of the people. The economic life of the Republic is determined by a State national economic plan in which the State strives to expand the forces of production, increase national wealth, raise material and cultural standards and strengthen the defences of the country. All natural resources, means of communication and agricultural enterprises are the property of the State. Foreign trade is carried out both by state trading companies and by companies and enterprises with export-import rights.

The Republic recognizes and guarantees the right of the working peasants to the land and regards it as its duty to assist the socialist development of agriculture. The State supports every genuine co-operative movement of the workers that is directed against exploitation. The Constitution recognizes and protects all property acquired by labour and guarantees the right of inheritance. Private enterprise is not allowed to run counter to the public interest.

Labour is the base of the social order and every able-bodied citizen has the right and the duty to work to the best of his ability. By their labour, the workers serve the cause of socialist construction.

STATE AUTHORITY

The highest organ of State authority in the Hungarian People's Republic is Parliament, which exercises all the rights deriving from the sovereignty of the people and determines the organization, direction and conditions of government. Parliament enacts laws, determines the State budget, decides the national economic plan, elects the Presidential Council and the Council of Ministers, directs the activities of ministries, decides upon declaring war and concluding peace and exercises the prerogative of amnesty.

Parliament is elected for a term of four years and members enjoy immunity from arrest and prosecution without parliamentary consent. It meets at least twice a year and is convened by the Presidential Council or by a written demand of one-third of its members. It elects a speaker, two deputy speakers and six recorders from among its own members, and it lays down its own rules of procedure and agenda. As a general rule, the sessions of Parliament are held in public.

Parliament has the right of legislation which can be initiated by the Presidential Council, the Council of Ministers or any member of Parliament. Decisions are valid only if at least half of the members are present, and they require a simple majority. Constitutional changes require a two-thirds majority. Acts of Parliament are

signed by the President and the Secretary of the Presidential Council. Parliament may set up committees.

Parliament may pronounce its dissolution before the expiration of its term, and in the event of an emergency may prolong its mandate or may be re-convened after dissolution. A new Parliament must be elected within three months of dissolution and convened within one month of polling day. At its first sitting Parliament elects from among its members the Presidential Council, consisting of a President, two Vice-Presidents, a Secretary and seventeen members. The Chairman of the Council of Ministers, its Deputy Chairmen and its members are ineligible for election to the Presidential Council.

The Presidential Council may issue the writ for a general election, convene Parliament, initiate legislation, hold plebiscites, direct local government, conclude international treaties, appoint diplomatic representatives, ratify international treaties, appoint higher civil servants and officers of the armed forces, award orders and titles, and exercise the prerogative of mercy. It may annul or modify by-laws, dissolve local organs of government and, when Parliament is not in session, may enact laws. The Presidential Council is responsible to Parliament, which can recall it.

THE HIGHEST ORGAN OF STATE ADMINISTRATION

The highest organ of State administration is the Council of Ministers, responsible to Parliament and consisting of a Chairman, Deputy Chairmen, Ministers of State and other Ministers who are elected by Parliament on the recommendation of the Presidential Council. The Council of Ministers directs the work of the ministries (listed in a special enactment), and ensures the enforcement of laws and the fulfilment of economic plans; it may issue decrees and annul or modify measures taken by any central or local organ of government.

LOCAL ORGANS OF STATE POWER

The local organs of State power are the county, district, town, borough and town precinct councils, whose members are elected for a term of four years by the voters in each area. Local councils direct economic, social and cultural activities in their area, prepare local economic plans and budgets and supervise their fulfilment, enforce laws, supervise subordinate organs, maintain public order, protect public property and individual rights, direct local economic enterprises and support co-operatives. They may issue regulations and annul or modify those of subordinate councils. Local Councils are administered by an Executive Committee elected by and responsible to them.

JUDICATURE

Justice is administered by the Supreme Court of the Hungarian People's Republic, county and district courts. The Supreme Court exercises the right of supervising in principle the judicial activities and practice of all other courts.

All judicial offices are filled by election; Supreme Court, county and district court judges are all elected for an indefinite period; the President and judges of the Supreme Court are elected by Parliament. All court hearings are public unless otherwise prescribed by law, and those accused are guaranteed the right of defence. Under a new

HUNGARY—(THE CONSTITUTION, THE GOVERNMENT)

law on criminal procedure which came into force on January 1st, 1974, an accused person must be considered innocent until proved guilty.

PUBLIC PROSECUTOR

The function of the Chief Public Prosecutor is to watch over the observance of the law. He is elected for a period of six years by Parliament, to whom he is responsible. The organization of public prosecution is under the control of the Chief Public Prosecutor, who appoints the public prosecutors.

RIGHTS AND DUTIES OF CITIZENS

The Hungarian People's Republic guarantees for its citizens the right to work and to remuneration, the right of rest and recreation, the right to care in old age, sickness or disability, the right to education, and equality before the law; women enjoy equal rights with men. Discrimination on grounds of sex, religion or nationality is a punishable offence. The State also ensures freedom of conscience, religious worship, speech, the Press and assembly. The right of workers to organize themselves is stressed in order to promote democracy, socialist construction, cultural and educational development and international solidarity. The freedom of the individual, and the privacy of the home and

of correspondence are inviolable. Freedom for creative work in the sciences and the arts is now also guaranteed by the Constitution under the amendments adopted in 1972.

The basic freedoms of all workers are guaranteed and foreign citizens enjoy the right of asylum.

It is the fundamental duty of all citizens to defend the property of the people, consolidate social assets, increase economic strength, raise the living standards and cultural level of the workers, and strengthen the people's democratic system. Military service and the defence of their country are the duties of all citizens.

ELECTORAL SYSTEM

Members of Parliament are elected on the basis of universal, equal and direct suffrage by secret ballot, and they are accountable to their constituents, who may recall them. All citizens of eighteen years and over have the right to vote, with the exception of those who are unsound of mind, and those who are deprived of their civil rights by a court of law.

COAT OF ARMS, FLAG AND CAPITAL

The Constitution describes the coat of arms of the *Hungarian People's Republic*. The flag is red, white and green, and the capital city is Budapest.

NATIONAL ASSEMBLY

The National Assembly consists of a single chamber of 352 members, elected every four years on a territorial basis. The last elections (April 1971) were the first to be held under the new electoral law, and about two and a half million people, more than a third of the total electorate, took part in the meetings at which candidates were

nominated. Two or more candidates stood in 49 constituencies.

Speaker of the National Assembly: ANTAL APRÓ.

Deputy Speakers: JÁNOS PÉTER, Mrs. GÁBOR VARGA.

POLITICAL PARTIES

In Hungary there is no parliamentary opposition. Opposition parties have either been absorbed in the Patriotic People's Front or dissolved.

JUDICIAL SYSTEM

The Hungarian judicial system was established by a law passed in 1954. This was modified by acts of parliament passed in 1962 and 1973. The administration of justice is the function of the county district courts, the municipal district courts, the county courts, the Municipal Court of Budapest and the Supreme Court. The system of appeal is as follows: appeals against the decisions of county district courts and municipal district courts are considered by the county courts or the Municipal Court of Budapest. Appeals against the decisions of the latter are considered by the Supreme Court. The Chief Public Prosecutor and the President of the Supreme Court have the right to submit to the Supreme Court protest on legal grounds against the final decision of any court.

Under the new 1973 act which came into force on January 1st, 1974, procedure is now differentiated for criminal offences which cover minor infringements of the

law, and for crimes. In the first instance, cases involving a criminal offence can be dealt with by a professional judge. Where a crime is involved, the case is heard before a Council of Five, consisting of two professional judges and three lay assessors. In the second instance and at the Supreme Court, only regular judges may preside. The President and the judges of the Supreme Court are elected by Parliament, the other regular judges are appointed by the Minister of Justice. The lay assessors are elected by the local councils.

The Chief Public Prosecutor is responsible for exercising supervision over legality in all fields of the judicial system.

President of the Supreme Court: Dr. ÖDÖN SZAKÁCS.

Minister of Justice: Dr. MIHÁLY KOROM.

Chief Public Prosecutor: Dr. GÉZA SZÉNÁSI.

THE PRESS

The Hungarian Constitution guarantees freedom of the Press and freedom of speech and many aspects of the organization of the Press including provisions of law have been established to secure these ends. Printing works, publishing houses and paper mills have been nationalized. Failures in public administration, economic, cultural and other fields, are commonly criticized in editorials and grievances publicized in letters from members of the public. Since 1963 all official institutions so criticized have been legally obliged to investigate the matter promptly. In addition close relations are maintained between journalists and readers by means of frequent conferences held in factories and farms.

Conversely, considerable legislation is designed to prevent the abuse of Press rights; Article 127 of the penal code penalizes the provoking of hatred of minorities by the Press; incitement and libel are similarly dealt with. Since a decree in 1959 persons and institutions victimized by false Press reports may claim rectification which a government minister is empowered to enforce.

A period of growing liberalization, a reaction to the personality cult which had developed under Rákosi, began around 1954 but was brought to an abrupt end after the crisis of 1956. The following year the Information Office

was founded with the functions of granting licences, guiding papers, distributing newsprint and controlling the national news agency, Magyar Távirati Iroda, which monopolizes the reception and distribution of news. The scope of the Press is further curtailed by extensive legal provisions regarding state secrets.

As in many East European countries most papers are the organs of political parties, trade unions, youth and social organizations. A wide range of specialist periodicals are published by societies, factories, scientific institutions, etc. There is no private ownership of publications but since 1957 independent commercial organizations have received publishing licences.

The high circulation of daily papers enables publishing houses to produce high standard specialized periodicals. Moreover, the state gives direct subsidies to certain education, medicine and literature publications, to the religious press and to the four minority language papers. As a result at least six literary periodicals of 132-480 pages each are enabled to appear monthly. Some 80 per cent of newspapers are sold by subscription.

There are 20 dailies with an average total circulation of 2,500,000. This averages sixteen dailies per hundred people,

which compares with twenty-eight per hundred in Czechoslovakia. Four of the five Budapest dailies sell a total of about 1,415,000 copies and circulate nationally. In order of popularity they are: *Népszabadság* (756,000), *Népszava* (284,000), the evening *Esti Hírlap* (262,000) and *Magyar Nemzet* (113,000). *Népszabadság*, the most important daily, central organ of the Socialist Workers' Party and required reading for members, consists of twelve pages (twenty on Sundays) and is read aloud in farm and factory and over the radio. Otherwise the paper most respected for the quality of its news coverage and commentary is *Magyar Nemzet*.

Weekly newspapers and periodicals number 468. Among the most popular are the illustrated weeklies, which have recently experienced considerable increases in circulation, and of which the most significant are the satirical *Ludas Matyi* (565,000), the women's magazine *Nők Lapja* (634,000) and the political paper *Szabad Föld* (363,000). A news magazine giving a high standard of reporting and political discussion is *Magyarország*. Specialized periodicals include 20 cultural publications, 24 medical journals, 26 scientific papers, 14 agricultural and 13 religious publications. Of this last category *Új Ember*, *Evangelikus Élet* and *Új Élet* for Catholic, Lutheran and Jewish congregations respectively are representative.

PUBLISHERS

The structure of the book trade in Hungary closely resembles that of the U.S.S.R. Books are regarded primarily as vehicles for education, culture and information rather than as commercial goods, and publishers and book-sellers are controlled by the state. The Board of Publishers in the Ministry for Culture is the directive organ of publishing and distribution. It controls financial matters and all publishing programmes must gain its approval. The Board expects to show a yearly overall profit but may instruct a publishing house to budget for a loss if the Board considers it socially desirable to publish certain uneconomic works. The Council of Publishers, an adjunct of the Board of Publishers, is an advisory board composed of experts, specialists, and representatives of state and social organs. It offers suggestions in connection with publishing policies and expresses opinions on annual and long-term plans of the publishing houses.

Export and import of books is handled by Kultura Hungarian Company for Books and Newspapers. Three million books a year, both Hungarian and foreign language publications, are exported by Kultura which maintains business relations with eighty countries. Five million books per year are imported, mainly from socialist countries, U.K., U.S.A., France and the German Federal Republic. Kultura also deals in periodicals, exporting about fifteen million copies and importing seven million.

Negotiations for the sale or purchase of translation rights between Hungarian authors and publishers, and foreign publishers are conducted by Artisjus. Payments to foreign authors for translation rights are usually in blocked forints which may be used in a number of ways inside Hungary but not to pay for publishing. Generally payments are subject to 20 per cent tax and 10 per cent agency commission to Artisjus.

REACTOR AND ACCELERATOR

Research Reactor. An experimental reactor at Csillebérc, near Budapest, started in 1959. Supplied by the U.S.S.R., it is of the "VVR-S" type, fuelled by enriched uranium, and cooled and moderated by ordinary water. It is used for research in nuclear physics and biology, and the production of radio isotopes.

Training Reactor. In 1970 Hungarian universities inaugurated a low-power reactor of Hungarian design at the Technical University of Budapest for university and postgraduate training and research.

Accelerators. A 5 MeV electrostatic accelerator, a 200 kev and 180 kev cascade accelerator, in Budapest, and a 2.2 MeV electrostatic accelerator, as well as a 800 kev, 300 kev and 100 kev accelerator, in Debrecen, are in operation.

Co-operation. Agreements have been signed for co-operation in the peaceful uses of atomic energy with Czechoslovakia, the German Democratic Republic, India, Poland, Romania and the U.S.S.R. Hungary is a member of the International Atomic Energy Agency, Vienna, and of the Joint Institute for Nuclear Research, Dubna, near Moscow.

ICELAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Iceland is a volcanic island situated near the Arctic Circle in the North Atlantic. The island lies 155 miles south-east of Greenland, 645 miles west of Norway and 500 miles north of Scotland. The Gulf Stream keeps Iceland warmer than might be expected, with average temperatures ranging from 10°C (50°F) in summer to 1°C (34°F) in winter. Icelandic is the official language. The Evangelical Lutheran Church is the established church and embraces 98 per cent of the population. The national flag (proportions 25 by 18) is blue with a red cross bordered with white. The capital is Reykjavik.

Recent History

Iceland became independent in 1944 when the Convention linking it with Denmark under the Danish throne was terminated. Iceland is a founder member of the Nordic Council (1953) and has belonged to both NATO and the Council of Europe since 1949.

Iceland was governed by a coalition of the Independence Party and the Social Democratic Party from 1959 to 1971. Following the death of Prime Minister Benediktsson, an interim government was formed in July 1970 by Mr. Jóhann Hafstein. However, there was a swing to the left in the general elections in June 1971 and Ólafur Jóhannesson, the leader of the Progressive Party, formed a coalition government with the People's Union and the Liberal Left Party.

The limit of Iceland's territorial waters was fixed at 12 miles in 1964, but economic dependence on the fishing industry and the need to exclude competition from foreign trawlers were demonstrated by the failure of the herring catch in 1967 and 1968, when the national income dropped by 16 per cent. The Jóhannesson Government unilaterally extended fishing limits to 50 miles in September 1972. Belgium immediately accepted this decision, and agreed upon a system of licences for restricted fishing within the new limit. The United Kingdom and Federal Germany appealed to the International Court of Justice, and began negotiations over the limit. British and German trawlers continued to fish in the disputed waters, despite occasional harassment by Icelandic gunboats. Compromise settlements were eventually reached, with Norway in July and with Britain in November 1973, though not as yet with Federal Germany. The Marxist members of the Government, the People's Union, came near to leaving the coalition over the fishing dispute, and have also come into conflict with their allies over the NATO base at Keflavik. At first they demanded the total withdrawal of U.S. troops and Iceland's resignation from NATO, but have now accepted a compromise whereby the American presence will be reduced gradually, leaving only maintenance and administrative personnel.

Government

Executive power is vested in the President and the Cabinet consisting of the Prime Minister and other

Ministers appointed by the President. The Althing (Parliament) is divided into an Upper and Lower House and is elected by universal suffrage.

Defence

Iceland has no defence forces of her own but is a member of the North Atlantic Treaty Organization (NATO). There are units of United States Forces at Keflavik air base, which is used for observation of the North Atlantic, under an agreement of 1951 between Iceland and NATO.

Economic Affairs

Very little land is available for cultivation, but good grazing keeps Iceland self-sufficient in meat and milk products. Production costs are high and exports have to be subsidized. Diversification of the economy away from dependence on fishing has included an expansion of aluminium ingot, nitrate and diatomite production, and the development of textiles and other light industries. The exploitation of hydro-electric power could lead to the introduction of ferro-alloy smelting and other power-intensive industries, but at present fishing and its related industries are central to the Icelandic economy, providing some 80 per cent of foreign exchange earnings. The modernized and expanding trawler fleet supplies about 80 freezing plants, which produce white fish fillets, frozen shrimp, scallops, scampi and capelin. Other fish products such as oil, meal and salted fish are major exports. A volcanic eruption in January 1973 threatened to destroy the port of Vestmannaeyjar, which handled some 20 per cent of the total Icelandic catch of fish, but, despite considerable damage, reconstruction has been started, and there are plans for a new fish processing plant.

The expansion of the Icelandic economy since the war, and a rapid rise in the standard of living, have been accompanied by a rising rate of inflation. Between 1960 and 1969 inflation averaged nearly 13 per cent a year, then 16 per cent a year in 1970-72, and rose still further in 1973. The cost of living in Reykjavik doubled between 1968 and 1973. As most wages and salaries are tied to the cost of living index the government traditionally did little to combat inflation. Standards of living remained high, with regular wage increases, low interest rates and frequent devaluations.

The króna was devalued by 10.7 per cent in December 1972 and by 10 per cent in February 1973. An unexpected rise in fish product prices brought a boom to the industry. Fearing that sharp export profit increases could have an inflationary effect, the Government reversed its usual policy. To hold import costs down it revalued the króna by 6 per cent in April, raised interest rates and cut all prices and wage rises by 2 per cent. The Government decided to maintain a restrictive fiscal policy and to reduce public expenditure. A four-day general strike in February 1974 was ended when the Government conceded wage rises averaging some 18 per cent, a return to its previous inflationary policy.

ICELAND—(INTRODUCTORY SURVEY)

The major importer from Iceland is the U.S.A., but the U.K., Denmark and Federal Germany export more to Iceland. Having joined EFTA in 1970, Iceland protected her interests after Denmark and the U.K. joined the EEC by negotiating advantageous trade concessions. The EEC postponed the introduction of tariff concessions on Icelandic fish products until the fisheries dispute between Iceland and EEC members had been settled.

Transport and Communications

There are no railways. Much of the interior is uninhabited and the main roads follow the coast line. Regular motor coach services link the main settlements. Heavy freight is carried by coastal shipping. The development plans provide for new roads and harbour installations. Air transport is particularly important to Iceland and is used, for example, to transport agricultural produce from remote districts. There are regular air services between Reykjavik and outlying townships.

Social Welfare

There is a comprehensive system of social security providing a wide range of insurance benefits including old-age pensions, family allowances, maternity grants, widows' pensions, etc. Contributions to the scheme are compulsory. Pension and health insurance now apply to the whole population. Accident insurance applies to all wage and salary earners and self-employed persons—unless they request exemption—and unemployment insurance to the unions of skilled and unskilled workers and seamen in all towns and villages of over 300 inhabitants, as well as to several unions in villages of less than 300 inhabitants.

Education

Education is compulsory and free for all children between the ages of 7 and 15 years. There is one university and six colleges. In urban regions primary education is available in day schools. In the more remote country districts, where there is no state boarding-school, instruction is provided by the "Travelling Teacher" scheme, whereby the pupil receives education in his own home. Three to four years of ordinary secondary education are then available. A good certificate of education after three years at a middle or general secondary school entitles entry to a High School (*Menntaskóli*) or a teachers' training college. The matriculation examination at the end of four years at High School provides the qualification for University entrance.

Tourism

Iceland's main attraction for tourists lies in the ruggedness of the interior with its geysers and thermal springs. Mountaineering and pony trekking are increasingly popular as well as skiing and the study of bird life. The number of foreign visitors to Iceland increased by 50 per cent between 1968 and 1971 and many tourists came to see the World Chess Championship in Reykjavik in 1972. The "Cod War" of 1973 deterred many visitors.

Visitors from Denmark, Finland, Norway and Sweden do not require a passport to enter Iceland.

Visas are not required by nationals of the following countries: Australia, Austria, Barbados, Belgium, Brazil, Bulgaria, Canada, Chile, Cyprus, Denmark, Fiji, Finland, France, The Gambia, Federal Republic of Germany, Greece, Guyana, Ireland, Israel, Italy, Jamaica, Japan, Republic of Korea, Lesotho, Luxembourg, Malawi, Malaysia, Malta, Mauritius, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Norway, Portugal, Romania, San Marino, Singapore, Spain, Swaziland, Sweden, Switzerland, Tanzania, Trinidad and Tobago, Tunisia, Turkey, U.K. and Dependencies, U.S.A., Vatican City, Yugoslavia.

Sport

The national sport is wrestling; but football, athletics and winter sports are universally popular. All children must, by law, learn to swim.

Public Holidays

1974: May 1 (Labour Day), May 23 (Ascension Day), June 3 (Whit Monday), June 17 (National Day), August 6 (Bank Holiday), December 24, 25 and 26 (Christmas), December 31 (New Year's Eve).

1975: January 1 (New Year's Day), March 27-31 (Easter), April 18 (1st day of Summer).

Weights and Measures

The Metric System is in force.

Currency and Exchange Rates

100 aurar = 1 Icelandic króna.

Exchange rates (March 1974):

£1 sterling = 194.33 krónur;

U.S. \$1 = 83.65 krónur.

THE CONSTITUTION

Settlement in Iceland began in 874, and from 930 until 1264 the land was an independent republic, the Icelandic Free State. In that year it lost its independence, falling under Norwegian rule and then in 1380, with Norway, under Danish rule. When in 1814 Norway came under Sweden, Iceland remained with Denmark, and this continued until 1918, when its sovereign status was recognized. Certain subjects were reserved for joint consideration. The Order of Succession of the Crown was the most important. There was a Joint Committee which reviewed important legislation of both States and promoted bills aiming at co-operation. Citizens of both States enjoyed equal rights in the other, but were exempt from military service in the other. The union with Denmark was dissolved and a new Republican Constitution established on June 17th, 1944.

THE GOVERNMENT

The President is elected for four years by universal suffrage. All those qualified to vote who have reached the age of 35 are eligible for the Presidency.

The Legislative power is jointly vested in the Althing and the President. The Executive power is exercised by the President and other governmental authorities in accordance with the constitution and other laws of the land.

The President summons the Althing every year and determines when the session shall close. He may adjourn meetings of the Althing but not for more than two weeks nor more than once a year. He appoints the Ministers and presides over the State Council. He may be dismissed only if a resolution supported by three-quarters of the Althing is approved by a plebiscite.

The President may dissolve the Althing. Elections must be held within two months and the Althing must reassemble within eight months.

The Althing is composed of 60 members, 49 of whom are elected by 8 proportionately represented constituen-

cies for a period of four years, while 11 supplementary seats are allotted to the parties for equalization, intended to achieve as near a really proportional representation with regard to the total of votes gained by each party as possible, without raising the total number of members above 60. Substitute members are elected at the same time and in the same manner as Althing members. The Althing is divided into two houses, the *efri deild*, or Upper House, and the *nedri deild*, or Lower House; but sometimes both Houses work together as a United Althing. The Upper House consists of a third of the members whom the United Althing chooses from amongst the representatives, the remaining two-thirds forming the Lower House. Each House and the United Althing elects its own Speaker. The voting age, both for local administrative bodies and for the Althing, is twenty and all citizens domiciled in Iceland may vote, provided they are of unblemished character and financially responsible.

The budget must be introduced in the United Althing but other bills may be introduced into either House. They must, however, be given three readings in each house and be approved by a simple majority before they are submitted to the President. If he disapproves a bill it nevertheless becomes valid but must be submitted to a plebiscite. Ministers may speak in either House, but may vote only in that of which they are members. The Ministers are responsible to the Althing and may be impeached by that body, in which case they are tried by the Court of Impeachment.

LOCAL GOVERNMENT

For purposes of Local Government the country is divided into Provinces, Districts and Municipalities. The 8 Urban Municipalities are governed by Town Councils, which possess considerable autonomy. The Districts also have Councils and are further grouped together to form the Provinces, over each of which a centrally appointed Chief Official presides. The franchise for municipal purposes is universal above 20 years, conducted on a basis of proportional representation.

REPUBLIC OF IRELAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Ireland is an independent state comprising 26 of the 32 counties making up the island. The remaining six counties in the north come under the jurisdiction of the United Kingdom Government. Ireland lies in the Atlantic, about 50 miles west of Great Britain. The climate is mild and equable. Irish is the official first language, but English is universally spoken. Official documents are printed in English and Irish. Ninety-five per cent of the population are Roman Catholic and 5 per cent Protestant. The national flag (proportions two by one) consists of three vertical bands of green, white and orange. The capital is Dublin.

Recent History

The Republic remained neutral during the Second World War and has since joined no military alliances. The country has contributed to international affairs in many ways and is an active member of the United Nations.

In the Presidential election of June 1966 Éamon de Valéra, President since 1959, was re-elected. John Lynch, leader of the Fianna Fáil Party, became Prime Minister in November 1966 and was re-elected to that office following the general election of June 1969. Although opposed to the British Army's presence in Northern Ireland, Mr. Lynch pledged his Government to finding a peaceful solution there. Strong measures were taken against the illegal Irish Republican Army, including the setting up of special courts, authorized by the Offences Against the State (Amendment) Act of December 1972.

Mr. Lynch dissolved the Dáil on February 5th, 1973, on the grounds that a strong Government was needed with a popular mandate to deal with problems concerning Northern Ireland. In the elections of February 28th a National Coalition of Fine Gael and the Labour Party gained an overall majority in the Dáil, and a new Government took office on March 14th with Liam Cosgrave (Fine Gael) as Prime Minister. This coalition has continued to seek a peaceful settlement in Ulster and has taken appropriate measures against prescribed organizations.

Following a conference in December 1973 at Sunningdale (England) between the British and Irish Governments and the new Northern Ireland Executive, parallel declarations were made by the British and Irish Governments on the new status of Northern Ireland and it was agreed that a Council of Ireland would be set up, comprising a Council of Ministers, composed of a core of seven members from the Irish Government and seven members from the Northern Ireland Executive, and a Consultative Assembly. The Council of Ministers would have executive and harmonizing functions and a consultative vote, and would act by unanimity, while the Consultative Assembly would have advisory and review functions.

Erskine H. Childers was elected President in May 1973, succeeding Éamon de Valéra on June 25th.

Negotiations for the Republic's entry to the European Economic Community began in 1970, and the Treaty of

Accession was signed in January 1972. Following the positive outcome of the national referendum held on May 10th, 1972, when more than 80 per cent of votes cast were favourable (1,041,000 to 211,891), Ireland became a full member on January 1st, 1973.

Government

The President is elected by direct adult universal suffrage for a seven-year term. As Head of State he summons or dissolves Parliament which consists of the House of Representatives and the Senate. The House of Representatives is elected by universal adult suffrage for a five-year term on the basis of proportional representation. Of the 60 members of the Senate, 49 are elected and 11 nominated by the Prime Minister. Executive functions are exercised by the Government which is responsible to Parliament. The voting age was lowered to 18 following a referendum in December 1972.

Defence

Establishments provide for a Permanent Defence Force of approximately 14,000 all ranks including the Air Corps and the Naval Service. In addition, the Defence Budget for the year ending March 31st, 1974, provides for a Reserve Defence Force of approximately 23,200 all ranks and envisages total expenditure during this period of £34,172,000. Recruitment is on a voluntary basis.

Economic Affairs

The economy is largely based on agriculture, which accounts for about one-sixth of the national income and for nearly 45 per cent of total exports. Government grants of about 20 per cent of the annual budget have been given to agriculture. Ireland's accession to the EEC at a time of world beef shortage and rising prices of other farm produce is expected to contribute to the expansion of the agricultural sector of the economy.

Major industrial expansion has taken place since 1960, and is promoted by the Industrial Development Authority. The principal industrial groups are food and drink, metals and engineering, textiles and tobacco. The average annual increase in GNP has been around 4 per cent since the introduction of the first Programme for Industrial Expansion in 1958, and although the economy has been running slightly below capacity since 1969, a reversal of this trend is expected, with a forecasted increase of 6 per cent for 1974. Inflation, which was running at about 11 per cent during 1973, continues to be a serious problem; although unemployment, averaging about 8 per cent during the same period, began to fall during the second half of the year. Moreover, the Industrial Development Authority's five-year plan, which began in 1973, involves the creation of 55,000 new jobs in manufacturing industry.

The main exports are processed food, live animals and machinery. The United Kingdom is the principal foreign trade partner, accounting for 61 per cent of exports and 51 per cent of imports in 1972. In recent years, however, Ireland has diversified its external trade, and since its

accession to the EEC has forged stronger trade links with other European countries.

Transport and Communications

There are 1,928 miles of railways operated by the State with 221 diesel locomotives, which make this the first fully dieselized rail system in Europe. Roads extend for 54,544 miles, 9,908 miles of which are main roads. Chief sea ports are Dublin and Dun Laoghaire, Cork, Waterford, Rosslare, Limerick, Foynes, Galway, New Ross, Drogheda, Dundalk, Fenit and Whiddy Island. There are international airports at Shannon, Dublin and Cork, of which Shannon is used for transatlantic flights. The national airline is Aer Lingus.

Social Welfare

Social Welfare benefits in Ireland fall into two general categories: (1) those received under compulsory insurance schemes by contributors and their dependants and (2) those received on a non-contributory basis by people of inadequate means. Children's allowances are also paid to all households for each child without regard to family means.

Social Welfare Insurance is now compulsory for both manual and non-manual workers. The social insurance scheme provides for widows', retirement and old age pensions, unemployment, disability and invalidity benefits and death grants. The cost is shared by the employer, the employee and the State. An occupational injuries benefit scheme is also in operation.

People of inadequate means who are not entitled to benefit under these contributory schemes may receive non-contributory pensions or other benefits from the State or other public funds. These benefits include widows' pensions, deserted wives' allowances, old age and blind pensions, home assistance and unemployment assistance.

The Health Service in Ireland operates according to income: all services are available free to lower income groups while middle income groups receive certain services free and upper income groups generally pay for their health services. Approximately 85 per cent of the population are included in the lower and middle income groups. Extension of the free Health Service to include all sections of the population is under consideration and is likely to be introduced during 1974.

Education

Education in Ireland is compulsory from the age of 6 to 15. Most children attend a National School of their own religious denomination, although religious instruction is optional. The State entrusts the local management of primary schools as much as possible to the various religious denominations, but meets most of the cost, and maintains a large measure of control by prescribing the programme and subjecting the schools to regular inspection. Irish history, music and traditions are emphasized and the Irish language used as far as possible. There are a few private primary schools in urban areas.

Post-primary education takes place in four sorts of schools: *Secondary Schools* are private institutions run by boards of governors or religious communities. However, the Department of Education pays a grant in respect of each eligible pupil, and in effect all but a very small

proportion of secondary schools offer free education. £400 of a teacher's salary is paid by his school authority and the balance by the Department. The programme is prescribed by the Department of Education and courses last five or six years starting at the age of 12. Pupils take the *Intermediate Certificate* at 15 or 16 after a balanced, general curriculum and then specialize in five recognized subjects in which they sit the *Leaving Certificate* at 17 or 18. *Vocational Schools* provide primary school leavers with a general and practical training for employment, as well as providing more specialized courses in technical training. In each county these schools come under the management of a Vocational Education Committee elected by the local authority. Two-thirds of the cost is borne by the Department of Education and the balance by the local authority. In order to provide a curriculum that includes both academic and technical subjects, *Comprehensive Schools*, of which there are now 14, have been established in recent years. They are financed by the State and are run by a Board of Management, one member of which is nominated by the Minister of Education. The three-year curriculum includes a variety of compulsory and optional subjects, and may lead to the *Intermediate Certificate*. After this some pupils continue at a technical school, which may be part of the same school or a separate college. *Community Schools* which have been set up in 12 areas, provide the facilities available in comprehensive schools and also provide adult education. Their educational policy and financial arrangements are the same as those of the Comprehensive Schools. Their Boards of Management include members of the community they serve but no member nominated by the Minister. In general, the Community Schools have sought to replace existing vocational and secondary schools, but further ones are to be established in new city areas.

Regional technical colleges have been established in seven provincial centres: Athlone, Carlow, Dundalk, Galway, Limerick, Sligo and Waterford. An eighth, the largest is in course of construction at Cork and is expected to be ready for occupation in late 1974. The colleges provide senior, post-primary apprenticeship, technical, professional and other courses.
